

COVID VACCINATION

In Private Health Facilities

- Worlds **biggest** COVID vaccination drive.
- Priority groups decided by **NEGVAC**
- Launched on **16th January** 2021.
- Nearly **6 Lakh** doses administered to HCW & FLW in the State.
- Excellent support from Private sector in Phase one

- Age appropriate groups included from 1st March 2021.
 - a) ≥ 60 years (as on 1st January 22)
 - b) 45-59 years with any of the specified comorbidities(45 years as on 1st January 22).
- Very large Cohort.
- State aims to cover the target group in shortest time possible
- Further engagement of private sector needed .

Which all private facilities included?

Private Covid Vaccination Centre(PCVC)

1. All Hospitals empanelled under the PMJAY/KASP
2. All Hospitals empanelled under the CGHS.
3. All Hospitals empanelled under the health insurance scheme(s) of State.
4. All private hospitals as decided by the State Health Department.

Prerequisite

To be verified by District RCHO

1. Sufficient Cold Chain equipment and capacity.
2. Sufficient rooms/space for waiting area, vaccination and observation post vaccination.
3. Sufficient number of trained vaccinators and verifiers
4. Ability to manage the Adverse Events Following Immunization (AEFI), as per the norms and guidelines of the Ministry.

Vaccines available at present

Vaccines available at present

- Covishield
- Covaxin

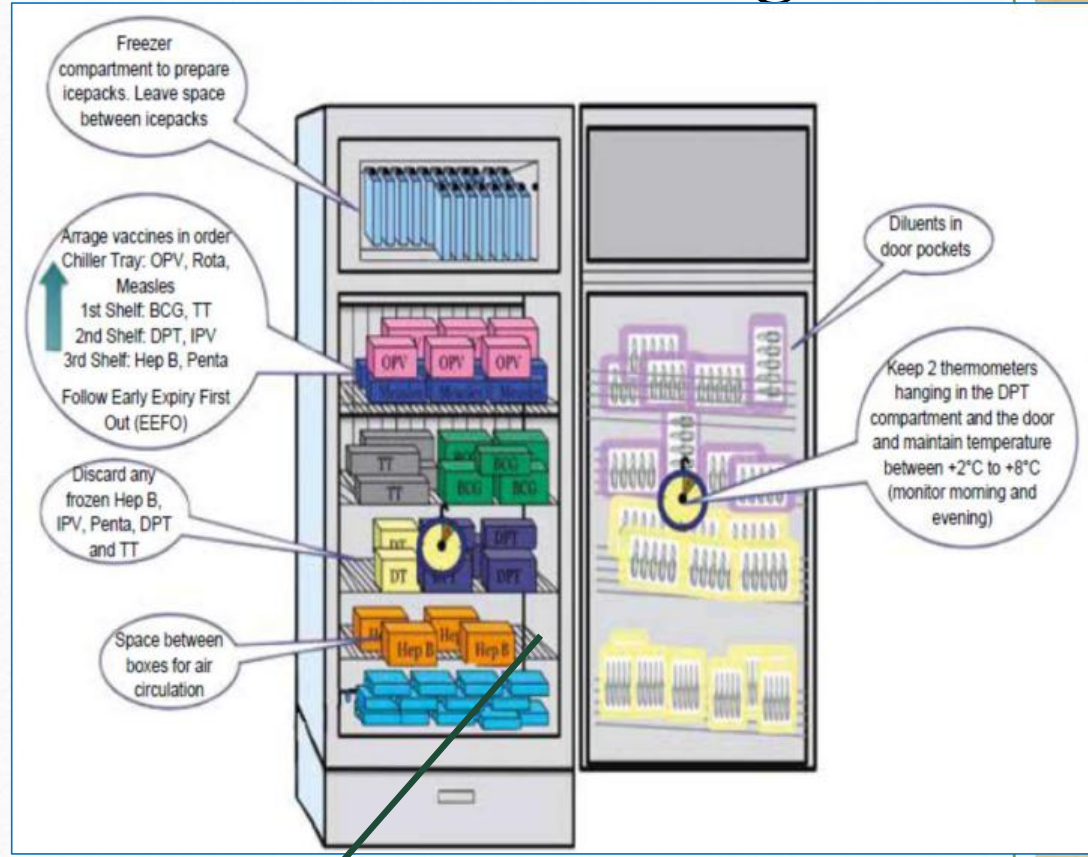

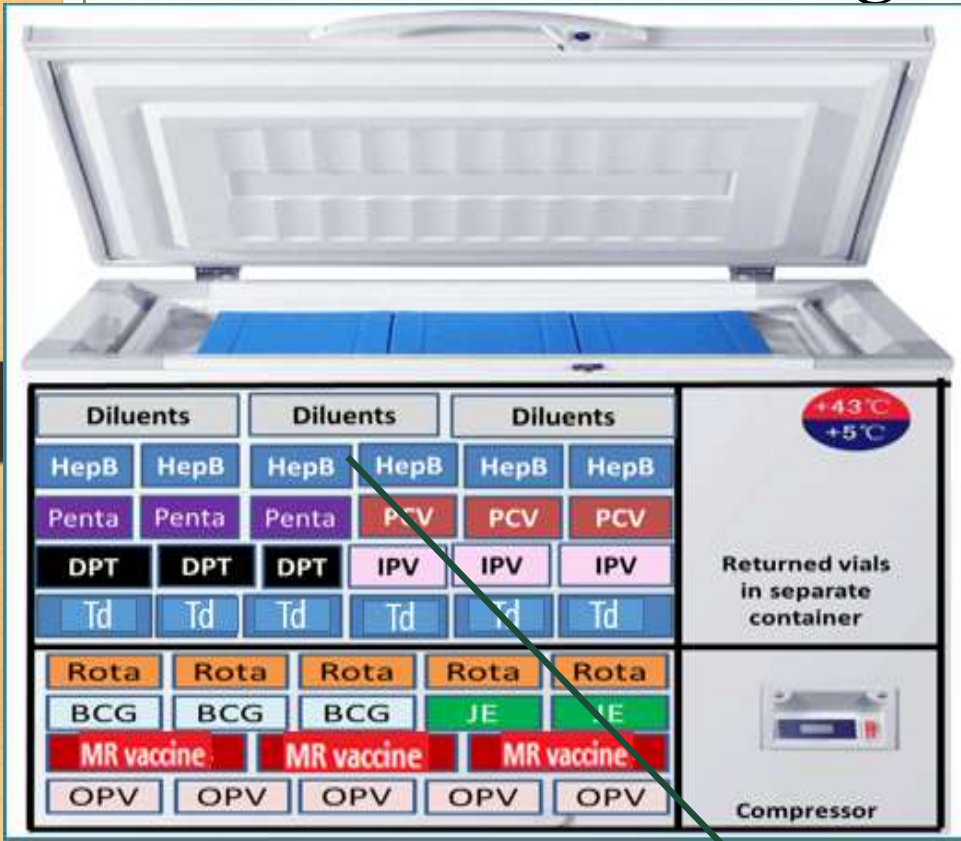

Cold Chain Management

General Points to remember

- Liquid vaccine
- Freeze Sensitive
- To be stored at 2-8 C

- The COVID19 vaccines would be provided by the district while other logistics will be made available by the private hospital.
- Only COVID-19 vaccines to be stored in identified equipment at private facilities – **no other items or vaccines to be stored**
- Ensure that all Cold Chain Equipment (CCE) are functional and have continuous power supply
- **Twice daily monitoring of CCE temperature** to be ensured and monitored by CVC Incharge
- Contingency plan for vaccine storage in cold boxes or shifting to alternate locations to be prepared in case of power supply issues or other contingencies
- In case of any CCE break down, **RCHO** to be immediately informed to support safe storage of vaccines

COVID Vaccine storage in ILR/ domestic refrigerator

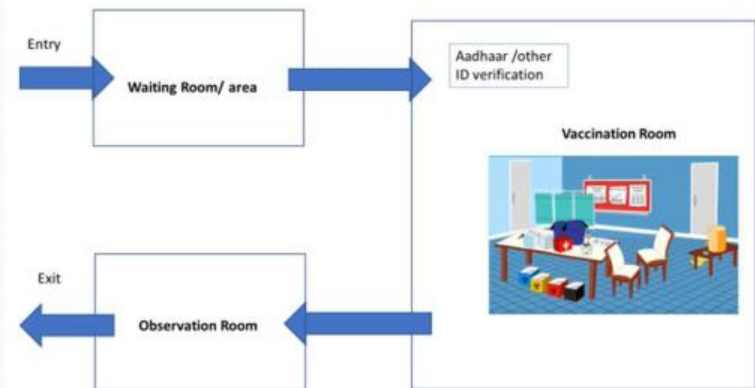

COVID vaccine

Conduct of session

■ Designate three separate rooms or areas

- Waiting room/ area
- Vaccination Room
- Observation Room

Vaccination
Officer 1

- Will identify the beneficiary based on available list and lets in

Vaccination
Officer 2/
Verifier

- Validates beneficiary in the CoWIN application

Vaccinator
Officer

- Administers vaccine

Vaccination
Officer 3 & 4

- Beneficiary in Observation room for 30 minutes → AEFI
- IEC messages

Please remember to:

- Follow safe injection practices
- **Date and time** of opening of vials needs to be written on the vial.
- All open vaccine vials need to be **discarded after 4 hours of opening** or at the end of session, whichever is earlier –
- These discarded vials will be stored in a separate box clearly marked as **“Used COVID-19 Vaccine vials for observation as per AEFI guidelines”** and discarded after 48 hours of completion of the session as per biomedical waste management guidelines.
- Unopened vials from the previous session have to be used on priority in the next session

HR

CVC Manager

- Each CVC will have a CVC Manager.
- The CVC Manager will be registered by the DIO.
- He/ She will be responsible for all operations at the CVC, as per the Operational Guidelines and SOP shared from MOHFW and State .
- To ensure adequate logistics arrangement/ deployment of trained HR as per Guideline.
- Management of vaccine stock.
- Management of CoWIN portal including scheduling sessions and ensuring all vaccinations are recorded on CoWIN

Each Session to be managed by a 5 membered vaccination team.

Vaccination
Officer 1

- Will identify the beneficiary based on available list and lets in

Vaccination
Officer 2/
Verifier

- Validates beneficiary in the CoWIN application

Vaccinator
Officer

- Administers vaccine

Vaccination
Officer 3 & 4

- Beneficiary in Observation room for 30 minutes → AEFI
- IEC messages

Adverse Event Following Immunisation
(AEFI)
Management & Reporting
