15 Days

SILVER & GOLD QUALITY CERTIFICATE

Silver Quality Certificate is the second level of Ayushman Bharat Quality Certification which is revised terminology for Entry level NABH/NQAS Certification.

Gold Quality Certificate is the third & the highest level of Ayushman Bharat Quality Certification which is revised terminology for NABH full /JCI Certification.

15 Days

HOW TO OBTAIN AB PM-JAY GOLD / SILVER / BRONZE QUALITY CERTIFICATE

GOLD QUALITY CERTIFICATE FOR AB PM-JAY

Gold Quality Certificate is the highest level of Ayushman Bharat Quality Certification which signifies that the certified hospital is complying with most of the healthcare protocols to ensure best quality of services and patient care. Gold Quality Certificate is revised terminology for already existing outcome -based incentivization structure i.e. NABH Full / JCI Accreditation to AB PM-JAY Gold Quality Certification. Silver Quality Certified hospital can directly apply for this certification. Gold Quality Certified hospitals will get additional and higher financial benefits over and above the 'Hospital benefit plans'.

GOLD QUALITY CERTIFICATE FOR AB PM-JAY

SILVER QUALITY CERTIFICATE FOR AB PM-JAY

Silver Quality Certificate is the **second level** of Ayushman Bharat Quality Certification which is revised terminology for already existing outcome -based incentivization structure i.e. Entry level NABH/NQAS Certification. It indicates that hospital has better quality of services and patient care but need to focus next on organization centered standards in terms of responsibility of management system among others. It is intended to motivate hospitals to keep increasing the level of quality in their services. Bronze Quality Certified hospital can directly apply for this certification. Silver Quality Certified hospitals will get additional financial benefits over and above the 'Hospital benefit plans'.

SILVER QUALITY CERTIFICATE FOR AB PM-JAY

QUESTIONS FOR AB PM-JAY GOLD / SILVER QUALITY CERTIFICATION:-

Questions are divided in two parts-

1. AB PM-JAY Specific Questions (25)

2. Quality Audit Checklist Questions (20)

Note:- After completion of Quality Audit Checklist please submit and take Screenshot and this Screenshot should be upload as an evidence of AB PM-JAY Specific Question number – 25.

1. Are 'scope of services' registered under AB PM-JAY clearly defined and displayed at prominent place (e.g. Hospital entrance, Registration area, Waiting area, etc.) ?

2. Are 'scope of services' registered under AB PMJAY displayed bilingually (Malayalam & English)?

3. Is the hospital staff aware of 'scope of services' registered under AB PMJAY?

Sub: Appointment for the post of Medical Clinical Coordinator (Trainee)

With reference to your Campus interview held on **14.11.2016** at this institute for the post of **Medical Clinical Coordinator (Trainee)**, we are pleased to appoint you as a **Medical Clinical Coordinator (Trainee)** at this Institution purely on probation with the following terms and conditions.

1. You will have to join the post within a week from the date of issue of this letter or within the time limit extended on your request by the Institute, failing which your appointment order will be treated as cancelled.
2. Your appointment has been made for a period of six months from the date of joining purely on probation. The probation period may be extended at the sole discretion of the Institute or your service may be dispensed with earlier either during the probation period or during the extended period of probation. You will continue to be on Probation without any increment till you are given confirmation letter by the Institute.
3. On completion of probation period satisfactorily, your appointment will be on contractual basis for a period of **TWO YEARS** which includes the probation period.
4. Your appointment will not be treated as confirmed employee, unless you are given confirmation letter by the Institute and the period would automatically expire after the completion of the said period, and there will be severance of relationship between you and the Institute.
5. You have to undergo special training for **3 months** at the Institute and during such training period, your pay will be **Rs.25000/- (Rupees Twenty Five Thousand Only)** per month. After completion of successful training, satisfactory, your pay will be **Rs.27500/- (Rupees Twenty Seven Thousand Five Hundred Only)** per month. No other allowances of any kind will be admissible. You will be ordinarily given **10%** yearly increment.
6. Group Health Insurance & other benefits would be given as per the rules of the Institute. EPF & Gratuity will be applicable as per the rules.
7. During probation period your services shall be liable for termination without any notice. No notice of termination is necessary on expiry of probation period or at the end of contractual period.
8. In view of the fact that you are working in Cardiac institute it would be mandatory for you to give **"two months"** notice for getting relieved from the services for the Institute before leaving the job during the period of contractual appointment. Unless your resignation is accepted following proper formality, experience certificate and No Objection Certificate will not be issued. You will hand over the books, journal or any other property of the Institute to the concerned officer and produce no due certificate before you are relieved.

CODE BLUE EVALUATION FORM
GOVERNMENT (CLASC) SPINE INSTITUTE AND PHYSIOTHERAPY COLLEGE
AHMEDABAD

(This form is to be kept in crash cart should be available in all Wards/OTs/Departments)

Name of Patient: _____ UHID No: _____ IPD No: _____
Ward: _____ Date: ___/___/20___ Age: _____ Sex: Male Female
Site: _____

1. Date and Time of Cardiac Arrest:
2. Was the control room informed
3. Code Blue activated: Yes/No
If Yes: Time: _____
If No: Reason: _____
4. Was the code announcement audible in all areas
5. Time of Code Blue Team Arrival:
6. Time Duration of Event Happened and Code Blue Team Arrival:
Response time
7. Primary Diagnosis:

6. Informed consent about the information on risks involved, benefits, alternatives for the procedures, surgeon who will perform the requisite procedure in an understandable language

Evidence Required	Method of Assessment	Response sheet	Mark	Available evidence (Photo to be uploaded)
<p>a) SOP developed for taking the informed consent from patient or patient relative.</p> <p>b) See minimum 5 in-patients files of previous month and check availability of:</p> <p>i) Clearly defined information on risks involved, benefits, alternatives for the procedures by surgeon who will perform the requisite procedure in an understandable language.</p> <p>ii) Informed consent is duly signed by patient or patient relative and countersigned by concerned surgeon.</p> <p>iii) Post operative notes by concerned surgeon.</p>	<p>Direct observation, Record review, Patient interview & Staff interview</p>	<p>100% compliance of all four evidences.</p>	<p>10</p>	<p>Informed consent form and Post operative notes in patient files.</p>
		<p>if any of the four evidence is found to be non-compliant.</p>	<p>5</p>	
		<p>Non-compliance of all four evidences.</p>	<p>0</p>	

7. The regular and periodic monitoring of anaesthesia components like recording of heart rate, cardiac rhythm, respiratory rate, blood pressure, oxygen saturation, airway security and patency and level of anaesthesia should be done.

Evidence Required	Method of Assessment	Response sheet	Mark	Available evidence (Photo to be uploaded)
<p>See minimum 5 post-operative files of previous month and check for:</p> <p>a) Availability of completely filled Pre-anaesthesia, during anaesthesia and post- anaesthesia form in each patient file.</p> <p>b) Pre-anaesthesia consent is duly signed by patient or patient relatives and countersigned by anaesthetists in each patient file..</p> <p>c) Complete documentation (e.g. Recording of heart rate, cardiac rhythm, respiratory rate, BP, oxygen saturation, airway security recorded) in each patient file.</p>	Record review & Staff interview	100% compliance of all three evidences.	10	<p>a) Complete documentation: Recording of heart rate, cardiac rhythm, respiratory rate, BP, oxygen saturation, airway security</p> <p>b) Pre-anaesthesia consent duly signed by pt. or pt. relatives and countersigned by anaesthetists</p>
		if any of the three evidence is found to be non-compliant.	5	
		Non-compliance of all three evidences.	0	

8. The documented procedure is defined and adhered to, for the prevention of adverse events like wrong site, wrong patient and wrong surgery.

Evidence Required	Method of Assessment	Response sheet	Mark	Available evidence (Photo to be uploaded)
<p>See minimum 5 post-operative files of previous month and check :</p> <p>a) Availability of WHO safety checklist.</p> <p>b) WHO safety checklist is filled and signed by anaesthetist(before induction of anaesthesia), surgeon(before skin incision) and OT incharge(before patient leaves OT)</p>	Record review & Staff interview	100% compliance of all two evidences.	10	WHO safety checklist signed by OT Incharge, anaesthetist and surgeon
		if any of the two evidence is found to be non-compliant.	5	
		Non-compliance of all two evidences.	0	

8. The documented procedure is defined and adhered to, for the prevention of adverse events like wrong site, wrong patient and wrong surgery.

CHECKLIST BEFORE SURGERY

SURGICAL SAFETY CHECKLIST
(To be filled by Operating Surgeon & Anesthetist)

GSI-IPD-FF-25 

Patient Name _____ Age _____ UHID _____
 Unit/Word _____ Date _____

Before induction of Anesthesia (with at least nurse and anesthetist)	Before skin incision (with nurse, anesthetist and surgeon)	Before Patient leaves operating (with nurse, anesthetist and surgeon)
Has the patient confirmed his/her identity, site, procedure and consent? Yes	Confirm all team members have introduced themselves by name and role. Confirm the patient's name, procedure and where the incision will be made.	Nurse verbally confirms: The name of the procedure Completion of instrument, sponge and needle counts Specimen labeling (read specimen labels aloud, including patient name) Whether there are any equipment problems to be addressed
Is the site marked? Yes Not applicable	Has antibiotic prophylaxis been given within the last 60 minutes? Yes Not applicable	To Surgeon, Anesthetist and Nurse: What are the key concerns for recovery and management of this patient?
Is the anesthesia machine and medication check complete? Yes	Anticipated Critical Events To Surgeon: What are the critical or non-routine steps? How long will the case take? What is the anticipated blood loss?	Name of Surgeon Sign Name Of Anesthesiologist Sign Name of Scrub Nurse Sign
Is the pulse oximeter on the patient and functioning? Yes	To Anesthetist: Are there any patient-specific concerns? To Nursing Team: Has sterility (including indicator results) been confirmed? Are there equipment issues or any concerns?	
Does the patient have a: Known allergy? No Yes	Is essential imaging displayed? Yes	
Difficult airway or aspiration risk? No Yes, and equipment/assistance available		
Risk of > 500ml blood loss (7ml/kg in children)? No Yes, and two IVs/central access and fluids		

9. Documented procedure for management of medication are defined and implemented e.g. Sound alike and look alike medications are stored separately.

Evidence Required	Method of Assessment	Response sheet	Mark	Available evidence (Photo to be uploaded)
a) Defined list of sound alike and look alike medications b) Display of the sound alike and look alike medications list in all patient-care area c) Sound alike and look alike medications are stored separately in pharmacy and all patient-care area	Direct observation, Record review & Staff interview	100% compliance of all three evidences.	10	a) List of sound alike and look alike defined and displayed in all patient-care area b) Sound alike and look alike medications are stored separately in pharmacy and all patient-care area
		if any of the three evidence is found to be non-compliant.	5	
		Non-compliance of all three evidences.	0	

9. Documented procedure for management of medication are defined and implemented e.g. Sound alike and look alike medications are stored separately.

LOOK ALIKE

PRE-TRANSFUSION CHECKLIST

1. The drug administered only by qualified person (nurse/doctor) and not allowed for dispensing.

2. The drug should be double checked by the person handling the administration of these medicines to verify the drug of administration.

3. If any of the medication is not administered, the administration of these drugs is discontinued and concerned doctor is informed immediately. The sample of the drug administered is preserved for analysis. There are no verbal orders for these high risk drugs and managed by the Management of these drugs.

4. These necessary precautions are taken for the reduction of transfusion related risk and to prevent the death.

5. Consequences of these high risk drugs are:

- Potentially fatal medication errors
- Verbal orders
- Similar packaging
- Similar names
- Improper packaging leading to improper verbal administration
- One drug in 10 vials
- 1 Topical product used in IV vials
- Storage of products in similar containers in the same location
- Similar abbreviations
- Improper storage of concentrated & stock vials

6. The high risk drugs are:

- Insulin (Low Molecular Weight)
- Digoxin
- Digoxin concentrate
- Digoxin
- Digoxin suspension
- Digoxin
- Digoxin

7. The high risk drugs are:

- Insulin (Low Molecular Weight)
- Digoxin
- Digoxin concentrate
- Digoxin
- Digoxin suspension
- Digoxin
- Digoxin

PRE-TRANSFUSION CHECKLIST

HIGH RISK MEDICATIONS : A-PINCH

The acronym 'APINCH' is designed to serve as a reminder that even routinely administered medicines pose a high risk to patient safety.

Assisted

- A** ANTI-INFECTIVES
- P** POTASSIUM AND OTHER ELECTROLYTES
- I** INSULIN
- N** NARCOTICS AND OTHER SEDATIVES
- C** CHEMOTHERAPEUTIC AGENTS
- H** HEPARIN AND OTHER ANTICOAGULANTS

11. Verification of dosage, route, timing and expiry date before administering the medication should be done.

Evidence Required	Method of Assessment	Response sheet	Mark	Available evidence (Photo to be uploaded)
a) Defined SOP for process of administration of medication b) Check minimum 5 in-patients files of previous month and look for implemented process as defined in SOPs (dosage, route, timing and expiry date before administering the medication) c) Medication orders are clear, legible, dated, named and signed by the concerned doctor.	Direct observation, Record review & Staff interview	100% compliance of all three evidences.	10	a) Policy of Management of Medications b) Patient files with Medication orders that are clear, legible, dated, named and signed by the concerned doctor.
		if any of the three evidence is found to be non-compliant.	5	
		Non-compliance of all three evidences.	0	

11. Verification of dosage, route, timing and expiry date before administering the medication should be done.

QUALITY ASSURANCE AND ACCREDITATION PROGRAM
GMERS MEDICAL COLLEGE ATTACHED GENERAL HOSPITAL, HIMMATNAGAR

Minutes of Meeting

The meeting was called out to discuss regarding hospital acquired infections. The following points were discussed in the meeting:

- Infection Control Reports:**
No bacterial growth seen in swab report of site of laboratory in the month of October but seen in the month of September. No bacterial growth seen in swab report of General, Eye, OR, Ortho, GI and Gynaec DT.
- BSI in Microbiology Department for ward reports:**
All wards should be done on a regular basis for BSI reports.

Minutes of Meeting

The minutes of meeting are to be used to monitor the agreed action items to get done. All members are expected to use a range of other means of communication and keep a note with them for personal reference.

Sl. No.	Agenda	Action to be taken
1.	Resolution of infection control team	All infection control team has been instructed (through A.I.)
1.	Infection control in OT	Adequate infection control measures to be taken (through A.I.)
1.	OT. Dress	OT dress for handgloves and aprons to be made available.
4.	Use of cap, mask and gloves	Cap, mask and gloves to be used in all medical staff to prevent spread of infection.
3.	Hand Hygiene	Working regarding program hand washing to be given.
1.	Bacterial Infection	Bacterial swab reports to be done in all medical staff and proper resolution of swab report to be done.

Minutes of Meeting

14. All the healthcare providers should have easy accessibility to the hand washing facility in all patient care areas. Hand hygiene steps to be displayed at each hand washing facilities.

14. All the healthcare providers should have easy accessibility to the hand washing facility in all patient care areas. Hand hygiene steps to be displayed at each hand washing facilities.

How to Handwash?

WASH HANDS WHEN VISIBLY SOILED (EITHERWISE USE HAND RUB)

Duration of the entire procedure: 40-60 seconds

- Wet hands with water
- Apply enough soap to cover all hand surfaces
- Rub hands palm to palm
- Palm to palm with fingers interlaced
- Back of fingers to opposing palm with fingers interlaced
- Rub hands with water
- Rinse hands thoroughly with a single stream
- Use towel to turn off tap
- Use towel and air dry

Your 5 Moments for Hand Hygiene

- BEFORE TOUCHING A PATIENT
- BEFORE CLEANING/ASEPTIC PROCEDURE
- AFTER BODY FLUID EXPOSURE RISK
- AFTER TOUCHING A PATIENT
- AFTER TOUCHING PATIENT SURROUNDINGS

How to Handrub?

RUB HANDS FOR HAND HYGIENE! WASH HANDS WHEN VISIBLY SOILED

Duration of the entire procedure: 20-30 seconds

- Apply a portion of the product in a cupped hand, covering all surfaces
- Rub hands palm to palm
- Right palm over left dorsum with interlaced fingers and vice versa
- Palm to palm with fingers interlaced
- Back of fingers to opposing palm with fingers interlaced
- Rotational rubbing of left thumb clasped in right palm and vice versa
- Rotational rubbing, back thumb and forehand with clasped fingers of right hand in left palm and vice versa
- Drag the right thumb over left

Moment	When	Why
1	BEFORE TOUCHING A PATIENT	Clean your hands before touching a patient when approaching his/her. To protect the patient against harmful germs carried on your hands.
2	BEFORE CLEANING/ASEPTIC PROCEDURE	Clean your hands immediately before performing a clean/aseptic procedure. To protect the patient against harmful germs, including the patient's own, from entering his/her body.
3	AFTER BODY FLUID EXPOSURE RISK	Clean your hands immediately after an exposure risk to body fluids (and after glove removal). To protect yourself and the health-care environment from harmful patient germs.
4	AFTER TOUCHING A PATIENT	Clean your hands after touching a patient and his/her immediate surroundings, when leaving the patient's side. To protect yourself and the health-care environment from harmful patient germs.
5	AFTER TOUCHING PATIENT SURROUNDINGS	Clean your hands after touching any object or furniture in the patient's immediate surroundings, when leaving - even if the patient has not been touched. To protect yourself and the health-care environment from harmful patient germs.

18. Safe exit plan for fire and non-fire emergencies should be documented and ensure the awareness amongst the hospital staff and Fire Mock drills should be conducted at least twice in a year.

Evidence Required	Method of Assessment	Response sheet	Mark	Available evidence (Photo to be uploaded)
<p>a) SOP defined and implemented for safe exit plan in case of fire and non-fire emergencies.</p> <p>b) Signages displayed of do's and don't's in case of fire</p> <p>c) Display of fire exit plan in all patient care areas.</p> <p>c) Record of Mockdrill's conducted and CAPA done</p>	<p>Direct observation, Record review & Staff interview.</p>	<p>100% compliance of all four evidences.</p>	<p>10</p>	<p>a) All the signages are displayed with fire exit plan.</p> <p>b) Document of mock drills conducted at regular intervals</p>
		<p>if any of the four evidence is found to be non-compliant.</p>	<p>5</p>	
		<p>Non-compliance of all four evidences.</p>	<p>0</p>	

18. Safe exit plan for fire and non-fire emergencies should be documented and ensure the awareness amongst the hospital staff and Fire Mock drills should be conducted at least twice in a year.

18. Safe exit plan for fire and non-fire emergencies should be documented and ensure the awareness amongst the hospital staff and Fire Mock drills should be conducted at least twice in a year.

18. Safe exit plan for fire and non-fire emergencies should be documented and ensure the awareness amongst the hospital staff and Fire Mock drills should be conducted at least twice in a year.

FIRE MOCK DRILL / INCIDENT CHECKLIST

GOVERNMENT (CI&SC) SPINE INSTITUTE
AND PHYSIOTHERAPY COLLEGE, AHMEDABAD

Fire Drill and/or Incident Report					
Date:		Time:		Location:	
Section 1	1 st Response to fire				
Describe fire drill scenario, fire incident or fire alarm occurrence:					
Drill or Actual incident	Yes	No		Yes	No
Was the fire alarm activated					
Was the control room informed			At what time		
Was the code red activated			At what time		
Was the code announcement audible in all areas					
Rapid response team arrived			At what time		
Higher authorities informed					
Was the fire department called?					
Were people in immediate danger evacuated? See for stop, drop, cover and rolls technique			Zone of origin evacuated?		
Was immediate first aid provided if needed					
Were doors closed and latched to confine the fire and reduce smoke spread?					
Was an attempt made to extinguish the fire?			Was attempt appropriate?		
Did sufficient staff respond and evacuate endangered occupants in an organized and timely manner?					
Was scene being supervised?			Were instructions clear?		
Was evacuation conducted?					

19. The services provided by the medical professionals and nursing staff should be in line with their qualification, training and registration.

Evidence Required	Method of Assessment	Response sheet	Mark	Available evidence (Photo to be uploaded)
<p>See minimum 5 personal files of staffs (e.g. Consultant RMO & Nurses, etc.) and check for their qualification, training and privileging</p> <p>a) Medical professionals are granted privileges to admit and care of patients in consonance with their qualification, training, experience and registration.</p> <p>b) Medical professionals admit and care care for patients as per their privileging.</p> <p>c) Nursing staff is granted privileges in consonance with their qualification, training, experience and registration.</p> <p>d) Nursing professional care for patients as per their privileging.</p> <p>e) System developed for updating the personal files of staff.</p>	Record review & Staff interview	100% compliance of all five evidences.	10	All files are maintained by HR Dept. with all the the required details
		if any of the five evidence is found to be non-compliant.	5	
		Non-compliance of all five evidences.	0

PRIVILEGEFORM FOR NURSING STAFF
GOVERNMENT (CL&SC) SPINE INTIUTE AND PHYSIOTHERAPY COLLEGE AHMEDABAD

Employee Name: _____
 Date of Joining: _____
 Department: _____
 Designation: _____

Required Qualifications	Yes (v)
• GNM	
• B.Sc. Nursing	
(1) Nursing Initial Assessment	
(2) General Nursing Care	
• Back care, Mouth care, Sponges, Nail Cutting, Bed Making, Hair wash	
(3) Intra Muscular Injection Administration	
(4) Intra Venous Injection	
(5) Blood Transfusion Monitoring	
(6) Assisting Operation Procedure	
(7) Oxygen Administration	
(8) Administration of High Risk Medicine	
(9) Urinary Catheterization	
(10) Pre-Operative Care	
• Patient Identity check	
• Part Preparation	
• Consent Signed	
• Pre Mastication given	
• Correct Side Marking	
• Site Preparation	
• Site Marking	
• Bladder/Bowel-wash	
(11) Post-Operative Care	
• Vital Sign Monitoring	
• Maintain Intake Output Chart	
• Iv Injections	
• Catheter Care	
• Drainage care	
• CVP Care	
• Operation site Monitoring	
• Proper Positioning to Patient	
(12) Equipment Handling	
• ECG	
• Nebulizer	
• Glucometer	
• Defibrillator	
• Vec Machine	
(13) Multi Para Monitoring	
(14) Bedsores Dressing

Acknowledgment of Nurse
I have requested only those privileges for which by education, training, current experience, and demonstrated performance I am qualified to perform and for which I wish to exercise at Shri Ganapati Netralaya and I understand that:
a. In exercising any clinical privileges granted, I am constrained by hospital and medical staff policies and rules applicable generally and any applicable to the particular situation.
b. Any restriction on the clinical privileges granted to me is waived in an emergency situation, and in such situation my actions are governed by the applicable section of the medical staff bylaws or related documents.

Signed: _____ Date: 15/04/2018

Shri Ganapati Netralaya
Nurses Clinical Privileges

I recommend the requested clinical privileges with the applicant and the supporting documentation for the named applicant and I recommend all requested privileges with the standard professional practice plan and the following:
I recommend privileges with the standard professional practice plan and the following:
I recommend the following requested privileges: Privilege Condition/Modification/Explanation

Discharge Name: Dr. Ambekar Signature: _____ Date: _____
Director Name: Dr. Rushikesh Naigaonkar Signature: _____ Date: 15/04/2018
Dr. Rushikesh Naigaonkar
Medical Director

19. The services provided by the medical professionals and nursing staff should be in line with their qualification, training and registration.

Shri. Ganapati Netralaya
Ophthalmology Clinical Privileges

Name: Dr. HEMANTH THIRIALE
Emp. Code / Application No: 5288005
Minimum Qualification: M.B.B.S., DD, DNB
Experience after degree / Diploma: 2, 2, 20266

Initial privileges (initial appointment) Renewal of privileges (reappointment) Addition of privileges

All new applicants should meet the following requirements as approved by the Hospital Management:

Applicants check the "Requested" box for each privilege requested. Applicants are responsible for producing required documentation for a proper evaluation of current skill, current clinical activity, and other qualifications and for making any costs related to qualifications for requested privileges. Please provide this supporting information separately.

Department/Program Head or Leaders/Chief/CEO: Check the appropriate box for recommendation on the last page of form and include your recommendation for any required evaluation, if recommended with conditions or not recommended, provide the condition or explanation on the last page of this form. Current experience is an estimate of the level of activity below which a hospital committee should support should be triggered. It is not a guarantee. The decision should be guided not only by the expectations and standards outlined in the dictionary but also by the risk inherent in the privilege being requested and by similar activities that contribute to the skill under consideration. This is an opportunity to reflect with a respected colleague on one's professional practice and to collaboratively plan an approach in skills maintenance.

Other requirements:

- Note that privileges granted may only be exercised at the stated (and/or settings) that have sufficient space, equipment, staffing, and other resources required to support the privilege.
- The document is focused on defining qualifications related to competency to exercise clinical privileges. The applicant must also adhere to any additional organizational, regulatory, or accreditation requirements that the organization is obligated to meet.

Note: The dictionary will be reviewed over time to ensure it is reflective of current practices, procedures and technologies.

Supervising: Practitioners holding privileges prior to implementation of the dictionary will continue to hold those privileges as long as they meet current experience and quality requirements.

Definition: Ophthalmology is that specialty which is concerned with the screening, diagnosis, prevention and management of ocular, medical and surgical disorders of the eye, its adnexa, the visual pathways, and the visual system.

Qualifications for Ophthalmology

Initial privileges: To be eligible to apply for privileges in ophthalmology, the applicant should meet the following criteria: Certification as an Ophthalmologist by the State Medical Council / Medical Council of India.

Recommended current experience: At least 75 Ophthalmology surgery procedures or a minimum of 150 operative hours as the primary surgeon over the past 24 months, reflective of the scope of privileges requested, OR successful completion of a residency or clinical fellowship within the past 24 months. The department head will have the authority to override these scenarios through a similar process as outlined in the return to currency section.

Renewal of privileges: Demonstrated active Ophthalmology practice with documented CME over the previous 24 months; Periodical renewal of registration by the state Medical Council; or Demonstrated competence and sufficient experience (at least 75 Ophthalmology surgery procedures or a minimum of 150 operative hours as the primary surgeon over the past 36 months), reflective of the scope of privileges requested, based on results of ongoing professional practice evaluation and outcomes acceptable to the department head.

Return to practice: As a minimum, mentoring with a colleague who holds the same privileges in Ophthalmology for a period of time sufficient for the mentor to attest to competency.

Shri. Ganapati Netralaya
Ophthalmology Clinical Privileges

All initial and renewing non-core privileges should meet the specific threshold criteria as outlined.

Non-core privileges: Oculoplastic / orbit surgery

<input type="checkbox"/> Requested Botox injections	<input type="checkbox"/> Requested Exploration by lateral orbitotomy
<input type="checkbox"/> Requested Posterior orbital tumor removal	<input type="checkbox"/> Requested Exenteration
<input type="checkbox"/> Requested Orbital fracture repair	<input type="checkbox"/> Requested Posterior orbital foreign body removal
<input type="checkbox"/> Requested Dacryocystostomy	<input type="checkbox"/> Requested Management of orbital vascular lesions
<input type="checkbox"/> Requested Phakic IOL	<input type="checkbox"/> Requested Repair of malposition
<input type="checkbox"/> Requested BCR / DCR	<input type="checkbox"/> Requested Probing and irrigation
<input type="checkbox"/> Requested Crowfoot tube intubation	<input type="checkbox"/> Requested Enucleation w/ or without BOLL implant
<input type="checkbox"/> Requested Strabismic, strabismic surgery	<input type="checkbox"/> Requested Intraocular and Exogenous IOL biopsy
<input type="checkbox"/> Requested Nasolacrimal surgery, dacryocystostomy, probing and irrigation, and Crawford tube intubation. Removal of anterior lamellar body	
<input type="checkbox"/> Requested globe repair, repair of emphysema, repair of laceration, tumor, flaps, enucleation	

Initial privileges: Successful completion of a postgraduate training program in oculoplastic, lacrimal and orbital surgery with experience in the above surgical procedures. AND

Recommended current experience: Demonstrated active oculoplastic, lacrimal and orbital surgery practice (300 hours over the previous 24 months) with documented CME OR completion of fellowship within 24 months.

Renewal of privileges: Demonstrated active oculoplastic, lacrimal and orbital surgery practice (150 hours over the previous 36 months) with documented CME.

Return to practice: As a minimum, mentoring with a colleague who holds this non-core privilege for a period of time sufficient for the mentor to attest to competency.

Non-core privileges: Corneal surgery

<input type="checkbox"/> Requested Penetrating keratoplasty	<input type="checkbox"/> Requested Lamellar keratoplasty
<input type="checkbox"/> Requested Endothelial keratoplasty	<input type="checkbox"/> Requested Ocular surface stem cell transplant
<input type="checkbox"/> Requested Refractive surgery	<input type="checkbox"/> Requested LAMK
<input type="checkbox"/> Requested FEMTO - LASIK	<input type="checkbox"/> Requested QAR
<input type="checkbox"/> Requested ICL	<input type="checkbox"/> Requested IOL

Initial privileges: Successful completion of a postgraduate training program in corneal surgery with experience in the above surgical procedures. AND

Recommended current experience: Demonstrated active corneal surgery and refractive practice (100 hours over the previous 24 months) with documented CME OR completion of fellowship within 24 months.

Renewal of privileges: Demonstrated active corneal and refractive surgery practice (150 hours over the previous 36 months) with documented CME.

Return to practice: As a minimum, mentoring with a colleague who holds this non-core privilege for a period of time sufficient for the mentor to attest to competency.

Shri. Ganapati Netralaya
Ophthalmology Clinical Privileges

Renewal Primary strabismus surgery

Initial privileges: Successful completion of a postgraduate training program in pediatrics and strabismus with experience in the above surgical procedures. AND

Recommended current experience: Demonstrated active pediatrics and strabismus practice (100 hours over the previous 24 months) with documented CME OR completion of fellowship within 24 months.

Renewal of privileges: Demonstrated active pediatrics and strabismus practice (150 hours over the previous 36 months) with documented CME.

Return to practice: As a minimum, mentoring with a colleague who holds this non-core privilege for a period of time sufficient for the mentor to attest to competency.

Non-core privileges: Ocular Oncology

<input type="checkbox"/> Requested Radioactive plaque placement	<input type="checkbox"/> Requested Treatment of retinoblastoma
<input type="checkbox"/> Requested Intraocular chemotherapy	<input type="checkbox"/> Requested Eye wall resection

Renewal: Biopsy of intraocular tumors

Initial privileges: Successful completion of a postgraduate training program in ocular oncology with experience in the above surgical procedures. AND

Recommended current experience: Demonstrated active ocular oncology practice (100 hours over the previous 24 months) with documented CME OR completion of fellowship within 24 months.

Renewal of privileges: Demonstrated active ocular oncology practice (150 hours over the previous 36 months) with documented CME.

Return to practice: As a minimum, mentoring with a colleague who holds this non-core privilege for a period of time sufficient for the mentor to attest to competency.

Context specific Privileges: Context refers to the capacity of a facility to support an activity. None identified at this time.

Process for requesting privileges not included in the dictionary

Where a member of the medical staff requests a privilege not included in the core, non-core or context specific privileges for a discipline, the following process will be followed:

1. The practitioner will submit a request in writing to the head of department or chief of staff identifying the privilege requested, the location within the facility where the privilege would be exercised, and the relevant training and experience held by the practitioner in this area.
2. The department head of department will determine if the request is reasonable.
3. If it is determined that the request is reasonable, the head of department will consult his or her administrative counterpart to determine if the facility can support the activity.
4. Where it is deemed appropriate, the practitioner, the department head or chief of staff and the medical director will agree on any additional training required, and a minimum level of activity required to maintain the privilege. The specific minimum number requirement indicating the level of experience required to demonstrate skill to obtain clinical privileges for the requested procedure must be evidence-based, and where no supporting literature exists for a specific number, the criteria are established by the consensus of a multidisciplinary group of practitioners who do not have a self-interest in creating an artificially high volume requirement.
5. Before proceeding with training the request will be reviewed by the Medical Director.
6. Any additional training will be done in a facility that normally trains practitioners in this activity. Exceptions may be granted in circumstances where all that is required is training by a member of the medical staff who holds the privilege in question.
7. On satisfactory completion of training, the department head may recommend to the governing body through the medical advisory committee that the privilege be granted.

Ophthalmology Clinical Privileges Version: 1st 2018 Page 5

Shri. Ganapati Netralaya
Ophthalmology Clinical Privileges

Acknowledgment of Practitioner

I have requested only those privileges for which my education, training, current experience and the facility resources I am qualified to perform and for which I wish to exercise at:

Shri. Ganapati Netralaya, KASAP, Kollam

I am requesting the following clinical privileges granted, I am responsible for hospital and medical staff compliance with applicable general and any applicable to the particular situation.

I am requesting the clinical privileges granted to me is valid in an emergency situation where my actions are governed by the applicable section of the medical staff bylaws or medical director's bylaws.

Specialty: Ophthalmology Date: 27/11/18

Head of department's Recommendation:

1. I have reviewed the requested clinical privileges and supporting documentation for the above activity.
2. I recommend all the requested privileges.
3. I do not recommend the following requested privileges: None
4. Privilege Committee will be notified.

Name: Dr. Anand Jayaram Date: 27/11/18

Head of the department's Signature: Dr. Anand Jayaram

Medical Director's Signature: Dr. Anand Jayaram Date: 27/11/18

3. MEDICAL AUDIT COMMITTEE

- Chairperson: Medical Superintendent, GMERS General Hospital, Himmatnagar
- Member Secretary: AHA, GMERS General Hospital, Himmatnagar
- Members:

Sr No.	Designation
1	RMO
2	Pathologist
3	Orthopedic Surgeon (Dr. Ambrish J Vyas)
4	AO
5	MO (Rajesh K Varma)
6	Matron
7	Senior Head Nurse

Background

- Audit in the wider sense is simply a tool to find what you do now—often to be compared with what you have done in the past or what you think you may wish to do in the future.
- Medical audit involves the study of some part of the structure, process and outcome of core clinical activities carried out by those personally engaged in the activity. It measures whether set objectives have been attained or not. It thus assesses the quality of care delivered.

Involves

- A systematic examination of performance parameters
- Comparison of results against set criteria
- Assessment of quality of care with a view to improvement

Why audit

- Educational value for participants
- Improve effectiveness and efficiency of care
- Reassure Consumers.

How to audit

- Define standards you should realistically reach for the areas which you intend to audit. Standards should be:
 - Realistic
 - Control/Ownable
 - Parallel to existing standards
- Set the criteria by which you will measure those standards
- Compare your results against your defined standard. Is change needed?
- Review the results of any changes made

6

 Medical Superintendent
 GMERS General Hospital
 Himmatnagar

Objectives of the committees to use different performances parameters from various hospital departments to demonstrate that outcome are continuously being improved upon. All audits will be documented.

Meetings of the Committee: thrice in a Year, Minutes of the meeting will be maintained and form the basis for a) remedial actions b) new initiatives c) the creation of a cultures of continuous quality improvement in the various department of the hospital.

Medical Superintendent
 GMERS General Hospital
 Himmatnagar

MEDICAL RECORDS	
1. Is there separate space for medical records?	Yes
2. How to general layout of the department?	Good
3. Availability and labelling of studies, abstracts?	Yes
4. Post control done regularly?	Yes
5. Provision of review and liaison records?	Yes
6. Minimum patient deficit?	0
AMBULANCE SERVICE	
1. Number of in-hospital ambulances in working condition?	Good
2. General condition of ambulance?	Good
3. Availability of ambulance driver/paramedics?	Yes
4. Average number of trips made per day?	12
SECURITY AND SERVICE	
1. Number security guards available?	Yes
2. How security measures identified and checked?	Yes
3. How the facility get help from the organization?	Yes
4. Entry and exit control by security guards?	Yes
DISASTER PLAN	
1. Evacuation route defined?	Yes
2. Evacuation plan available?	Yes
3. Evacuation drills conducted?	Yes
REGISTRATION SERVICES	
1. Availability of registration?	Yes
2. Source of registration information?	Not yet reported

Medical Superintendent
 GMERS Medical College Attached
 Genani Hospital
 Himmatnagar, G.C.

Discharge Card

Discharge Card form with handwritten details in Malayalam, including patient name, date, and medical notes.

Laboratory Investigations

Laboratory investigation form with handwritten results for various tests like Hb, Hct, WBC, RBC, etc.

GUIDELINE FOR HOW TO ACHIEVE **BRONZE** QUALITY CERTIFICATE IN AB PM-JAY EMPANELED HOSPITALS

ELIGIBILITY

Hospitals that are empanelled with AB PM-JAY scheme and which do not possess any accreditation or certification from any other recognized certification body (NQAS, NABH & JCI) can apply for this certificate.

STEPS FOR CERTIFICATION PROCESS

Hospitals that are empanelled with AB PM-JAY scheme and which do not possess any accreditation or certification from any other recognized certification body (NQAS, NABH & JCI) can apply for this certificate.

STEPS FOR CERTIFICATION PROCESS

1. Login on HEM Portal
2. Click "Apply for certificate"
3. Fill the "Registration Form"
4. Fill-up the "Application Form"
5. Submit and pay the nominal Application Fee
6. Desktop Assessment
7. Reply to the desktop Non-Compliances (if any)
8. On-site Assessment
9. Reply to on-site Non-Compliances (if any)
10. Review of the application
11. Issue of the Digital Quality Certificate

BENEFITS OF THE BRONZE QUALITY CERTIFICATION

Additional Support to Create Quality Culture: Bronze Quality Certification will help hospitals to acquire recognized quality standards. The AB PM-JAY Bronze Quality Certification are inclusive and captures all the aspects of patient care and safety. The standards are also universally applicable as they remain same for all kinds of hospitals irrespective of their ownership and the scope of services provided.

Nationwide Recognized: The list of certified hospitals will be published online in a public domain that would help hospitals obtain a recognition among its peers.

Increased Credibility of Healthcare Provider: This certificate will establish trust amongst the beneficiaries for quality treatment in certified hospital.

Patient Safety and Increased Care for Patient: The certification focuses on quality protocols and patient safety which will help hospital in increasing their service quality with time.

THE SUMMARY OF THE CHAPTER OF BRONZE QUALITY STANDARDS ARE AS FOLLOWS

Chapters	No. of Standards	No. of Means of Verification
Chapter 1 : Key Inputs	10	40
Chapter 2 : Clinical Services	11	41
Chapter 3 : Support Services	10	40
Chapter 4 : Patient Care	11	41
Chapter 5 : Health Outcome	11	20
Total	53	182

CHAPTER 1: KEY INPUTS (OVERVIEW)

It is essential that a hospital should have a framework to support ongoing quality improvements and patient wellbeing. This section of key inputs broadly covers the **structural part** of the hospital. The certification criteria given in this chapter take into consideration **the facility infrastructure, human resources requirements and training, appropriate space in hospital for patient movement, proper lighting facility in the hospital, medical instruments and equipment requirements and maintenance, fire-fighting equipment and basic amenities like drinking water, waiting area, canteen, suitable toilets for men and women etc.** However, the focus of the standards has been in ensuring compliance to minimum level of inputs, which are required for ensuring delivery of committed level of the services.

Chapter 1: Key Inputs

KI 1	Physical facility of the building and hospital environment shall be developed and maintained for the safety of Patients, visitors, and staff
KI 2	Hospital should have adequate space for ambulance and patient movement
KI 3	Access to the hospital should be provided without any physical barrier and friendly to people with disabilities
KI 4	The indoor and outdoor areas of the facility should be well-lit
KI 5	Basic amenities should be provided for all patients, hospital staff and visitors
KI 6	The hospital should ensure that all medical staff is adequately credentialed as per the statutory norms
KI 7	The facility has functional equipment & instruments as per scope of services
KI 8	Hospital should have fire detection and fire-fighting equipment installed as per fire safety norms along with staff training
KI 9	Staff involved in direct patient care shall be trained in Cardio Pulmonary Resuscitation (CPR) and Basic Life Support (BLS) along with a display of the same in all critical care areas
KI 10	Annual Training Plan should be prepared for all staff covering all training needs.

KI 1 - PHYSICAL FACILITY OF THE BUILDING AND HOSPITAL ENVIRONMENT SHALL BE DEVELOPED AND MAINTAINED FOR THE SAFETY OF PATIENTS, VISITORS, AND STAFF

Interpretation – The standard guide the provision of safe and secure environment for patients, visitors and staff. To ensure this, the hospital premises must have basic essentialities of infrastructure and shall have annual maintenance plan for infrastructure development. This includes appearance of the facility, cleaning processes, infrastructure maintenance and control of stray animals at the facility.

KI 1 - PHYSICAL FACILITY OF THE BUILDING AND HOSPITAL ENVIRONMENT SHALL BE DEVELOPED AND MAINTAINED FOR THE SAFETY OF PATIENTS, VISITORS, AND STAFF

(Means of verification)

- 1. There should be no cattle or stray animals within the premises**
- 2. The facility should have a guard available 24*7**
- 3. The hospital boundary should be intact and not broken**
- 4. Hospital (Building(s)) should be well maintained i.e. walls are well plastered (no cracks or seepage) and painted**
- 5. Windows and doors are intact and have grill/ wire meshwork**
- 6. The facility should have an annual maintenance plan for its infrastructure**
- 7. Non-structural components such as cupboards, cabinets and other heavy equipment or hanging objects should be properly fastened and secured**
- 8. Hospital building should not have wire hanging loosely**
- 9. There should be no stains, grease, cobwebs and bird nest on walls and roofs of the hospital**
- 10. There should be a closed drainage system with no direct contact with the environment**

THERE SHOULD BE NO CATTLE OR STRAY ANIMALS WITHIN THE PREMISES

THE FACILITY SHOULD HAVE A GUARD AVAILABLE 24*7

THE HOSPITAL BOUNDARY SHOULD BE INTACT AND NOT BROKEN

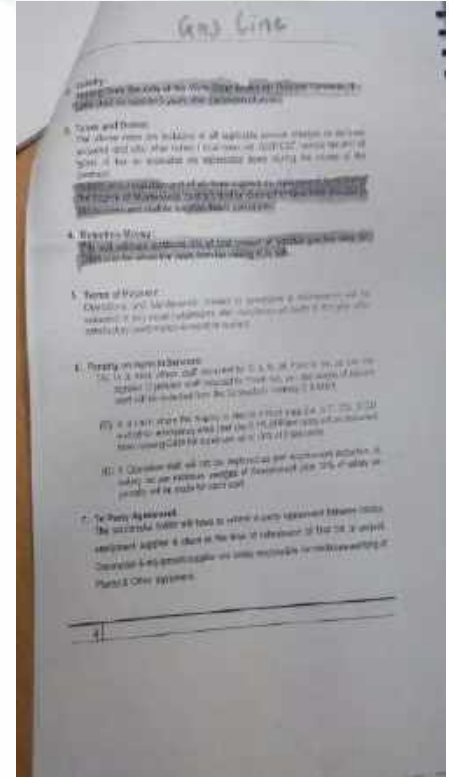

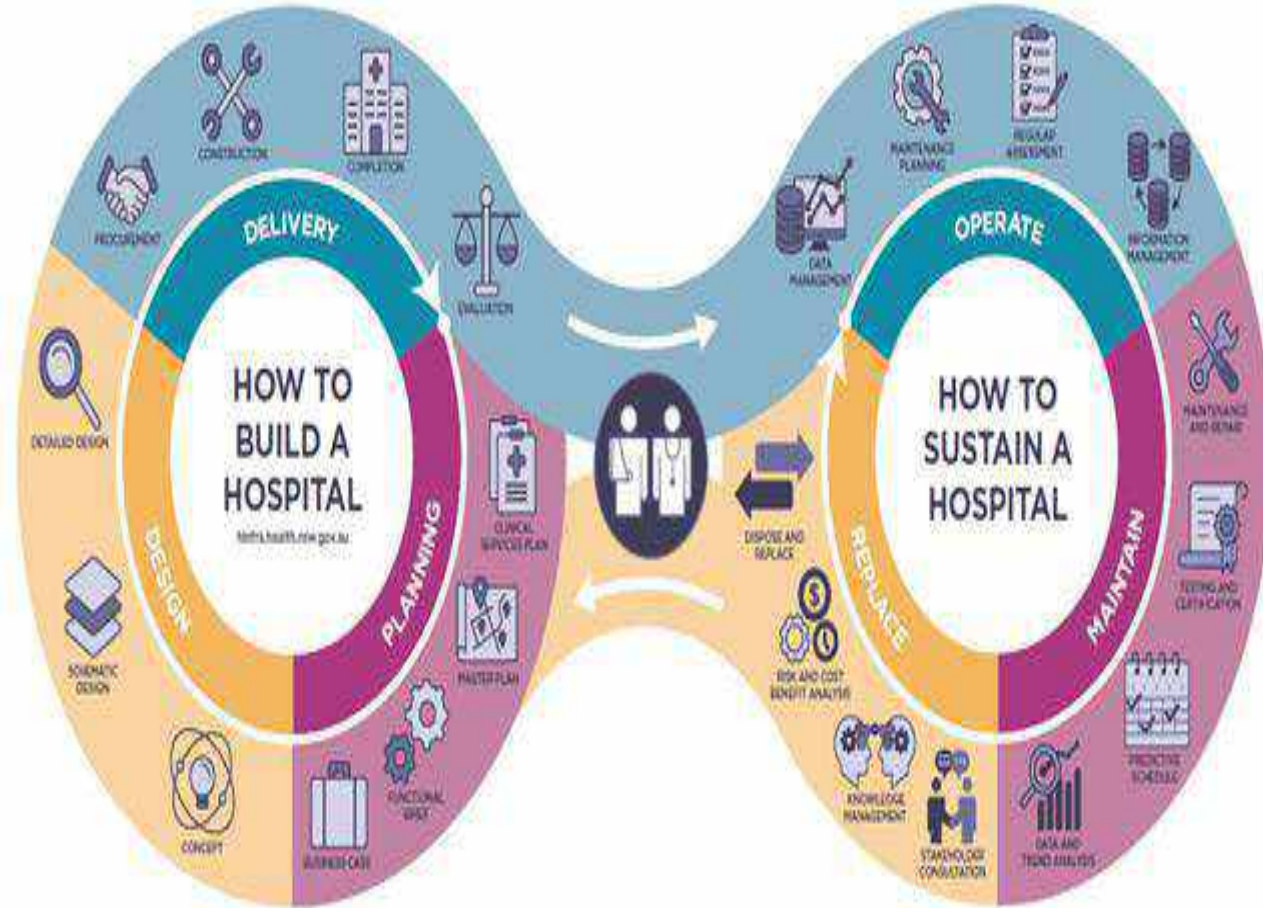

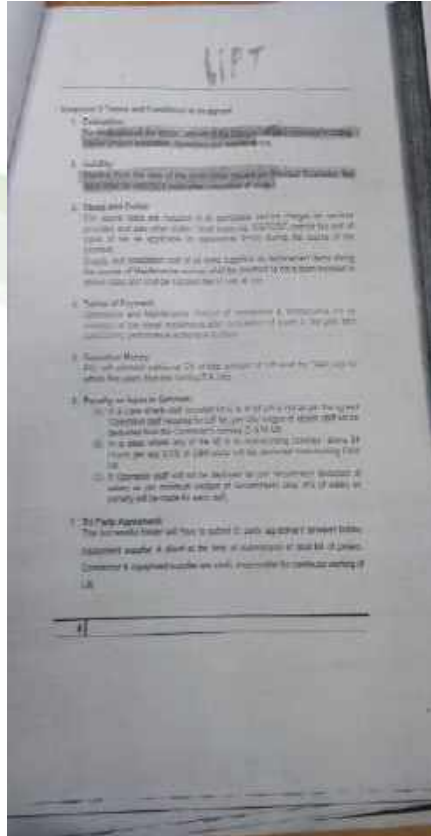

HOSPITAL (BUILDING(S)) SHOULD BE WELL MAINTAINED I.E. WALLS ARE WELL PLASTERED (NO CRACKS OR SEEPAGE) AND PAINTED

WINDOWS AND DOORS ARE INTACT AND HAVE GRILL/ WIRE MESHWORK

THE FACILITY SHOULD HAVE AN ANNUAL MAINTENANCE PLAN FOR ITS INFRASTRUCTURE

NON-STRUCTURAL COMPONENTS SUCH AS CUPBOARDS, CABINETS AND OTHER HEAVY EQUIPMENT OR HANGING OBJECTS SHOULD BE PROPERLY FASTENED AND SECURED

HOSPITAL BUILDING SHOULD NOT HAVE WIRE HANGING LOOSELY

THERE SHOULD BE NO STAINS, GREASE, COBWEBS AND BIRD NEST ON WALLS AND ROOFS OF THE HOSPITAL

THERE SHOULD BE A CLOSED DRAINAGE SYSTEM WITH NO DIRECT CONTACT WITH THE ENVIRONMENT

KI 2 - HOSPITAL SHOULD HAVE ADEQUATE SPACE FOR AMBULANCE AND PATIENT MOVEMENT

Interpretation – This standard requires that facility should ensure adequate space for ambulance movement and parking. The access to the emergency/ receiving area should be smooth and spacious for the ease of patient movement and safe handling.

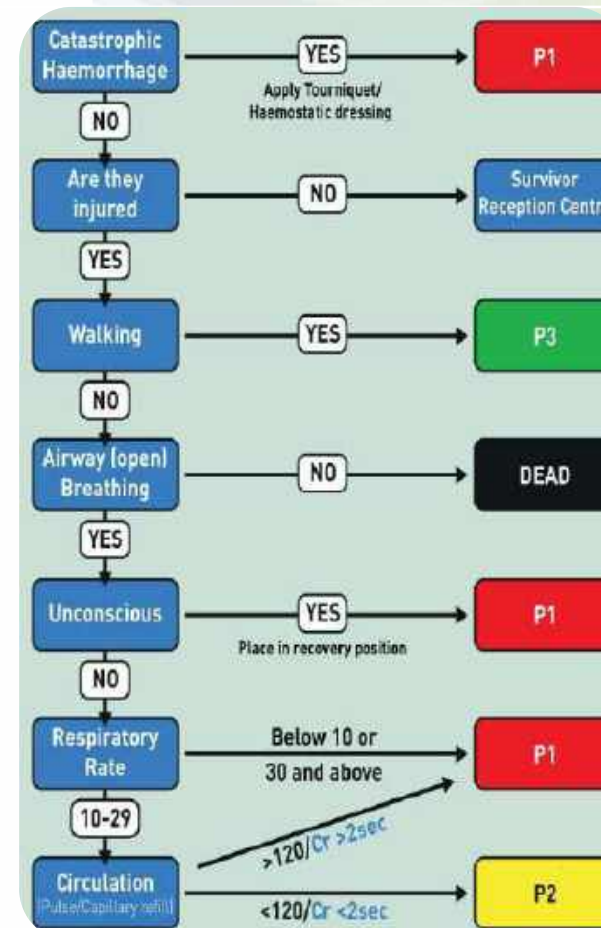

Means of verification:

1. Ambulance should have direct access to the emergency/ receiving/ triage area and access road to emergency should be wide enough to streamline the movement of the patient till the emergency/ receiving area
2. No vehicle should be parked on the way or in front of the emergency entrance
3. Dedicated parking area for the ambulance

AMBULANCE SHOULD HAVE DIRECT ACCESS TO THE EMERGENCY/ RECEIVING/ TRIAGE AREA AND ACCESS ROAD TO EMERGENCY SHOULD BE WIDE ENOUGH TO STREAMLINE THE MOVEMENT OF THE PATIENT TILL THE EMERGENCY/ RECEIVING AREA

Triage category	Priority	Color	Conditions
Immediate	1	RED	Chest wounds, shock, open fractures, 2-3 burns
Delayed	2	YELLOW	Stable abdominal wound, eye and CNS injuries
Minimal	3	GREEN	Minor burns, minor fractures, minor bleeding
Expectant	4	BLACK	Unresponsive, high spinal cord injury

NO VEHICLE SHOULD BE PARKED ON THE WAY OR IN FRONT OF THE EMERGENCY ENTRANCE

DEDICATED PARKING AREA FOR THE AMBULANCE

KI 3 - ACCESS TO THE HOSPITAL SHOULD BE PROVIDED WITHOUT ANY PHYSICAL BARRIER AND FRIENDLY TO PEOPLE WITH DISABILITIES

Interpretation –Provisions should be available for physically challenged/ vulnerable person to make the entrance accessible with ramps and grab bars. The facility should have facility of wheelchair, stretcher and trolleys with safety belts for immediate support of the patient.

Means of verification:

1. Availability of wheelchair, stretcher for emergency with straps to protect the patient from falling
2. The wheelchair, stretcher and trolleys should be clean, operational and their wheels should be properly aligned.
3. Availability of ramps with railings at the entrance of the facility

AVAILABILITY OF WHEELCHAIR, STRETCHER FOR EMERGENCY WITH STRAPS TO PROTECT THE PATIENT FROM FALLING

THE WHEELCHAIR, STRETCHER AND TROLLEYS SHOULD BE CLEAN, OPERATIONAL AND THEIR WHEELS SHOULD BE PROPERLY ALIGNED

AVAILABILITY OF RAMPS WITH RAILINGS AT THE ENTRANCE OF THE FACILITY

KI 4 - THE INDOOR AND OUTDOOR AREAS OF THE FACILITY SHOULD BE WELL-LIT

Interpretation – In order to provide safe, secure and comfortable environment to patients and staff the hospital should have provision of comfortable environment in terms of illumination either through electric bulbs and tubes at all the places, accompanied by natural source of light. Also, the front, entry and exit areas should also be well lit.

Means of verification:

1. There should be proper lighting in the indoor areas through natural light and by using sufficient electric bulbs
2. The facility's front, entry gate and access road are well illuminated

THERE SHOULD BE PROPER LIGHTING IN THE INDOOR AREAS THROUGH NATURAL LIGHT AND BY USING SUFFICIENT ELECTRIC BULBS

THE FACILITY'S FRONT, ENTRY GATE AND ACCESS ROAD ARE WELL ILLUMINATED

KI 5 - BASIC AMENITIES SHOULD BE PROVIDED FOR ALL PATIENTS, HOSPITAL STAFF AND VISITORS

Interpretation – The hospital must have an appropriate waiting area with seating arrangement, drinking water, clean toilets sensitive to gender and physically challenged visitors and staff personnel should be present within the premises.

Means of verification:

1. Availability of seating arrangement in the waiting area(s) within the hospital premises for attendants
2. Availability of potable drinking water on each floor (functional RO/filters)
3. There should be a provision of canteen facility for visitors & staff inside the premises
4. Every floor should have at least one toilet for hospital staff and visitors
5. Availability of clean and functional toilets with no foul smell in and around the toilet along with functional water taps
6. The toilets floor should be dry and no drain should be overflowing
7. Availability of disabled friendly toilet with bars or railings and is accessible through a ramp
8. Availability of 24*7 working telephone help line in hospital for effective communication

AVAILABILITY OF SEATING ARRANGEMENT IN THE WAITING AREA(S) WITHIN THE HOSPITAL PREMISES FOR ATTENDANTS

AVAILABILITY OF POTABLE DRINKING WATER ON EACH FLOOR (FUNCTIONAL RO/FILTERS)

THERE SHOULD BE A PROVISION OF CANTEEN FACILITY FOR VISITORS & STAFF INSIDE THE PREMISES

EVERY FLOOR SHOULD HAVE AT LEAST ONE TOILET FOR HOSPITAL STAFF AND VISITORS

AVAILABILITY OF CLEAN AND FUNCTIONAL TOILETS WITH NO FOUL SMELL IN AND AROUND THE TOILET ALONG WITH FUNCTIONAL WATER TAPS

THE TOILETS FLOOR SHOULD BE DRY AND NO DRAIN SHOULD BE OVERFLOWING

AVAILABILITY OF DISABLED FRIENDLY TOILET WITH BARS OR RAILINGS AND IS ACCESSIBLE THROUGH A RAMP

AVAILABILITY OF 24*7 WORKING TELEPHONE HELP LINE IN HOSPITAL FOR EFFECTIVE COMMUNICATION

KI 6 - THE HOSPITAL SHOULD ENSURE THAT ALL MEDICAL STAFF IS ADEQUATELY CREDENTIALLED AS PER THE STATUTORY NORMS

Interpretation – The organization shall ensure that the medical professionals who have required qualification, training, experience and consonance with the law are permitted to provide the services and such information should be appropriately verified. Also, the facility should maintain an adequate number and mix of staff to meet the care, treatment and services needs of patients.

Means of verification:

1. Doctor/ Nurse/ Paramedic Staff/ Admin & Support Staff along with the current designation, educational qualification, registration council of name and the associated registration number along with the date of joining and area/working department
2. Organization should plan human resource with adequate number and with mix and credentials of staff as per the statutory norms
3. Hospital has dedicated staff (3 members) for AB PM-JAY

HOSPITAL HAS DEDICATED STAFF FOR AB PM-JAY

KI 7 - THE FACILITY HAS FUNCTIONAL EQUIPMENT AND INSTRUMENTS AS PER SCOPE OF SERVICES

Interpretation – The hospital must have all the equipment and instruments according to the scope of services they are offering. Basic functional diagnostic equipment should also be ready available.

Means of verification:

1. Availability for examination and monitoring of patients - BP apparatus, Multipara meter Torch, hammer, an instrument to measure height, weight and Blood Pressure (BP) to conduct a general examination

AVAILABILITY FOR EXAMINATION AND MONITORING OF PATIENTS - BP APPARATUS, MULTIPARA METER TORCH, HAMMER, AN INSTRUMENT TO MEASURE HEIGHT, WEIGHT AND BLOOD PRESSURE (BP) TO CONDUCT A GENERAL EXAMINATION

KI 8 - HOSPITAL SHOULD HAVE FIRE DETECTION AND FIRE-FIGHTING EQUIPMENT INSTALLED AS PER FIRE SAFETY NORMS ALONG WITH STAFF TRAINING

Interpretation – The facility should have plan and provisions for early detection, abatement and containment of fire emergencies such as documented safe fire exit plan and trained staff. The periodic training shall include information, demonstration to use fire extinguisher and mock drills.

Means of verification:

1. Check if fire extinguisher, fire/smoke detectors are installed in patient care areas with fire-panel
2. Check for date of expiry on fire extinguisher which should be the beyond current date
3. The organization has a documented safe exit plan in case of fire and non-fire emergencies
4. Periodic training with mock drill is provided for using fire extinguishers

CHECK IF FIRE EXTINGUISHER, FIRE/SMOKE DETECTORS ARE INSTALLED IN PATIENT CARE AREAS WITH FIRE-PANEL

CHECK FOR DATE OF EXPIRY ON FIRE EXTINGUISHER WHICH SHOULD BE THE BEYOND CURRENT DATE

THE ORGANIZATION HAS A DOCUMENTED SAFE EXIT PLAN IN CASE OF FIRE AND NON-FIRE EMERGENCIES

PERIODIC TRAINING WITH MOCK DRILL IS PROVIDED FOR USING FIRE EXTINGUISHERS

KI 9 - STAFF INVOLVED IN DIRECT PATIENT CARE SHALL BE TRAINED IN CARDIO PULMONARY RESUSCITATION (CPR) AND BASIC LIFE SUPPORT (BLS) ALONG WITH A DISPLAY OF THE SAME IN ALL CRITICAL CARE AREAS

Interpretation – The organization shall provide regular training to the staff providing direct patient care. If the facility has a CPR team (e.g. code blue team) it shall ensure that it is trained in advanced cardiopulmonary resuscitation (adult, pediatric and neonatal) and is present in all shifts. All doctors and nurses working in ICU/ HDU should undergo appropriate training and display the CPR algorithm at all the critical areas.

Means of verification:

1. Training Records for Basic Life Support (BLS)
2. There should be a code blue protocol in the organization
3. Check the display of CPR algorithm in or near ICU, Clinical area and Emergency areas.
4. Check the records for CPR events & CPR Mock drill along with the corrective & Preventive measures taken

TRAINING RECORDS FOR BASIC LIFE SUPPORT (BLS)

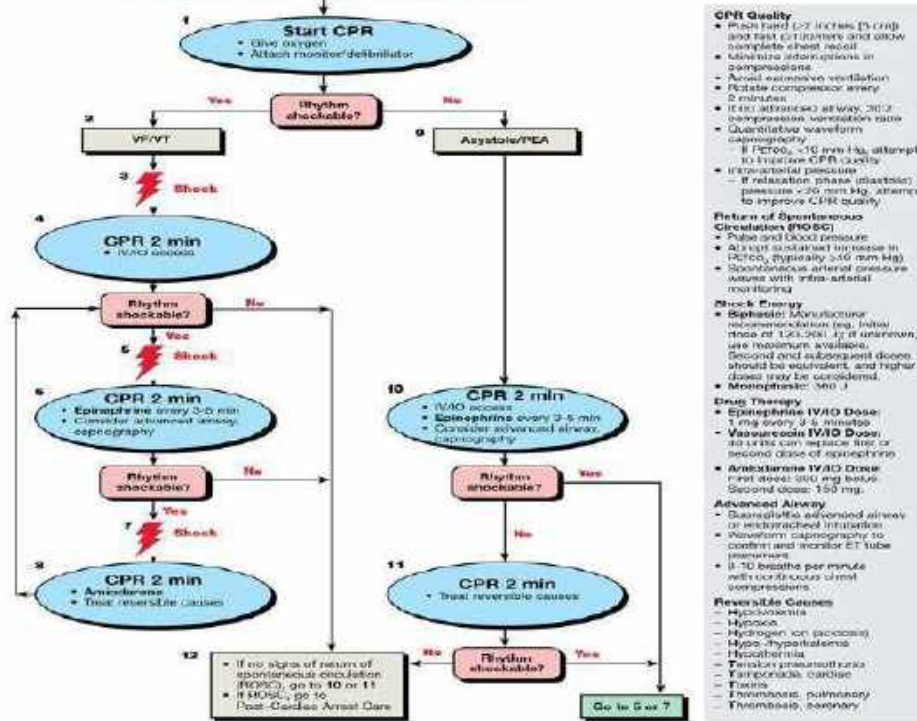

THERE SHOULD BE A CODE BLUE PROTOCOL IN THE ORGANIZATION

Cardiac Arrest Algorithm

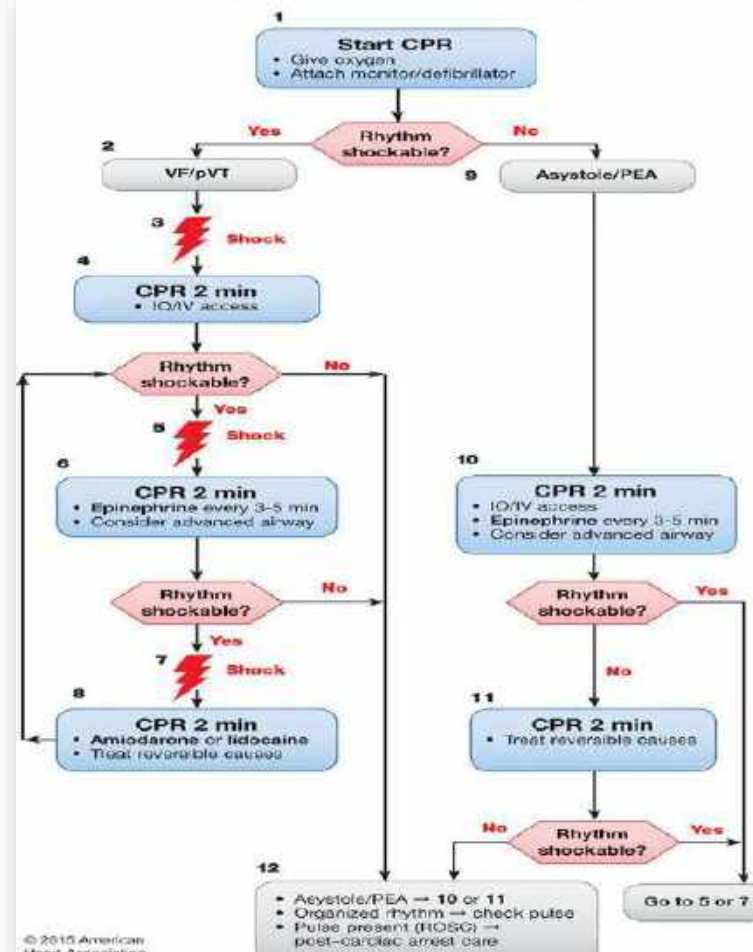

Adult Advanced Cardiovascular Life Support

Shout for Help/Activate Emergency Response

Pediatric Cardiac Arrest Algorithm—2015 Update

CPR Quality

- Push hard (2/3 of anteroposterior diameter of chest) and fast (100-120/min) and allow complete chest recoil.
- Minimize interruptions in compressions.
- Avoid excessive ventilation.
- Rotate compressor every 2 minutes, or sooner if fatigued.
- If no advanced airway: 15:2 compression-ventilation ratio.

Shock Energy for Defibrillation

- First shock 2 J/kg, second shock 4 J/kg, subsequent shocks ≥ 4 J/kg, maximum 10 J/kg or adult dose

Drug Therapy

- **Epinephrine IO/IV dose:** 0.1 mg/kg (0.1 mL/kg of 1:10,000 concentration), Repeat every 3-5 minutes. If no IO/IV access, may give endotracheal dose: 0.1 mg/kg (0.1 mL/kg of 1:1,000 concentration).
- **Amiodarone IO/IV dose:** 5 mg/kg bolus during cardiac arrest. May repeat up to 2 times for refractory VF/pulseless VT.
- **Lidocaine IO/IV dose:** Initial: 1 mg/kg loading dose. Maintenance: 20-50 mg/kg per minute infusion (repeat bolus dose if infusion initiated > 15 minutes after initial bolus therapy).

Advanced Airway

- Endotracheal intubation or supraglottic advanced airway
- Waveform capnography or capnometry to confirm and monitor ET tube placement
- Once advanced airway in place, give 1 breath every 6 seconds (10 breaths/min) with continuous chest compressions

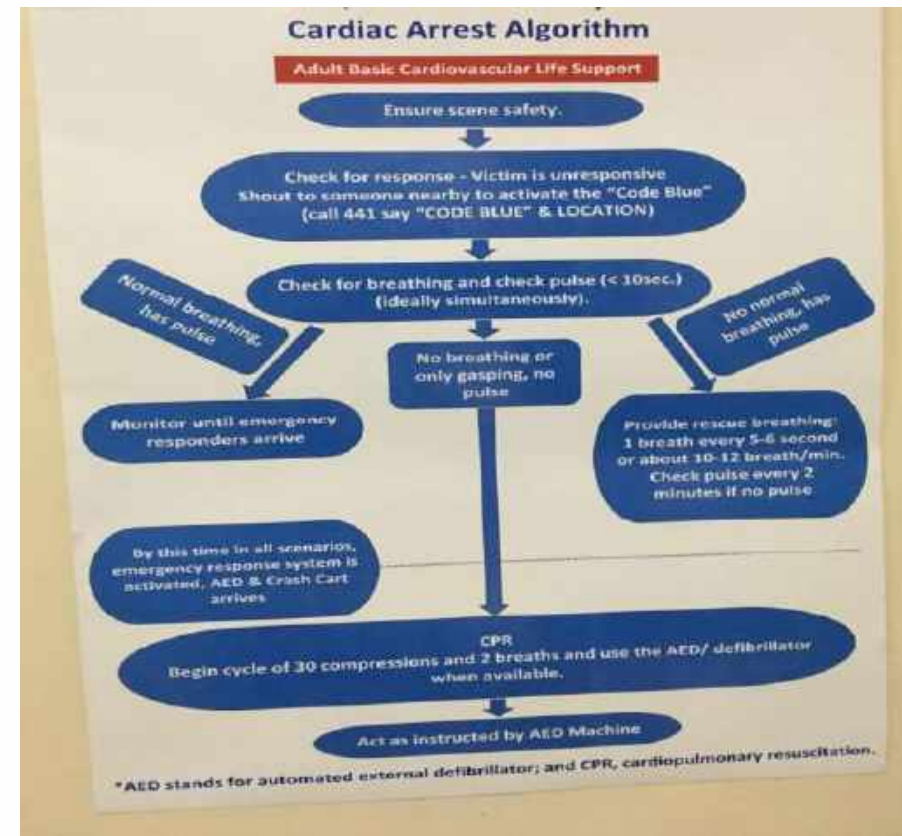

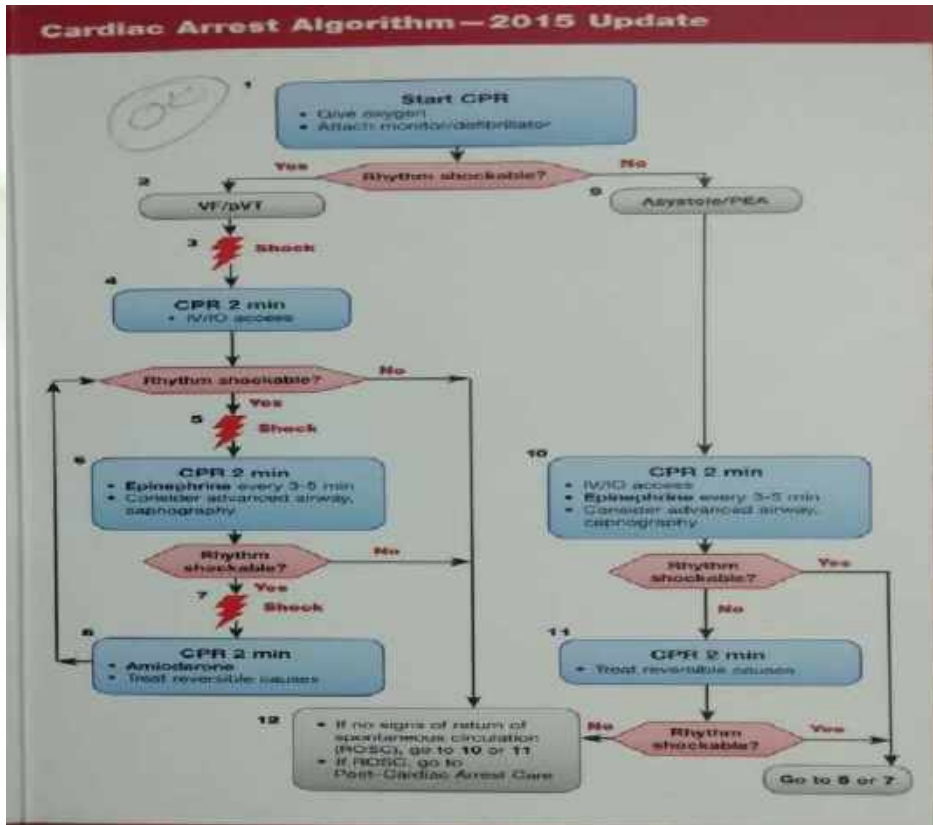

Return of Spontaneous Circulation (ROSC)

- Pulse and blood pressure
- Spontaneous arterial pressure waves with intra-arterial monitoring

Reversible Causes

- Hypovolemia
- Hypoxia
- Hydrogen ion (acidosis)
- Hypoglycemia
- Hypo-/hyperkalemia
- Hypothermia
- Tension pneumothorax
- Tamponade, cardiac
- Toxins
- Thrombosis, pulmonary
- Thrombosis, coronary

CHECK THE DISPLAY OF CPR ALGORITHM IN OR NEAR ICU, CLINICAL AREA AND EMERGENCY AREAS

CHECK THE RECORDS FOR CPR EVENTS & CPR MOCK DRILL ALONG WITH THE CORRECTIVE & PREVENTIVE MEASURES TAKE

 **CODE BLUE EVALUATION FORM** 
GOVERNMENT (C.I.S.C) OF INSTITUTE AND PHYSIOTHERAPY COLLEGE
AHMEDABAD

(This form is to be kept in crash cart should be available in all Wards/OTs/Departments)

Name of Patient: _____ UHD No.: _____ IPD No.: _____
Ward: _____ Date: ___/___/20___ Age: _____ Sex: Male Female
Site: _____

1. Date and Time of Cardiac Arrest:
2. Was the control room informed
3. Code Blue activated: Yes/No
If Yes: Time:
If No: Reason:
4. Was the code announcement audible in all areas
5. Time of Code Blue Team Arrival:
6. Time Duration of Event Happened and Code Blue Team Arrival:
Response time
7. Primary Diagnosis:

KI 10 - ANNUAL TRAINING PLAN SHOULD BE PREPARED FOR ALL STAFF COVERING ALL TRAINING NEEDS

Interpretation – The hospital should document plan and prepare a training calendar to ensure staff is able to identify the patient’s rights and responsibilities, potential hazards, maintain required quality and take appropriate actions during any disaster.

Means of verification:

1. Facility prepares training calendar as per training need assessment, training feedback records - Training on Disaster Management, Patient safety and rights, facility level Quality Assurance.
2. AB PM-JAY specific training (e.g. BIS, TMS, HEM & Support Portal, etc) to all concerned staff.

FACILITY PREPARES TRAINING CALENDAR AS PER TRAINING NEED ASSESSMENT, TRAINING FEEDBACK RECORDS - TRAINING ON DISASTER MANAGEMENT, PATIENT SAFETY AND RIGHTS, FACILITY LEVEL QUALITY ASSURANCE

Training Calendar 2016

Month	Training Topics
February	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance
March	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance
April	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance
May	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance
June	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance
July	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance
August	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance
September	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance
October	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance
November	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance
December	Disaster Management, Patient Safety and Rights, Facility Level Quality Assurance

AB PM-JAY SPECIFIC TRAINING (E.G. BIS, TMS, HEM & SUPPORT PORTAL, ETC) TO ALL CONCERNED STAFF

CHAPTER 2: CLINICAL SERVICES (OVERVIEW)

The definitive motive of a hospital is to provide clinical care. Therefore, clinical services are the most basic and significant in hospitals. These are the processes that determine the outcome of services and quality of care. **These standards include processes such as consultation, clinical assessment, continuity of care, nursing care, identification of high risk and vulnerable patients, prescription practices, safe drug administration, blood bank requirement, antibiotic policy, maintenance of clinical records etc.** These standards are based on the technical guidelines published by the Government of India (GoI) on individual programs and processes. It may be difficult to assess clinical processes; as direct observation of clinical procedure may not always be possible at the time of certification assessment. Therefore, assessment of these standards would largely depend upon a review of the clinical records and documents as well.

CHAPTER 2: CLINICAL SERVICES

CS 1	Patients privacy should be maintained in Out Patient Department (OPD) and In-Patient Department (IPD)
CS 2	The lab diagnostic services, whether in house or outsourced, should be as per the scope of services
CS 3	Blood bank services if available shall be as per the statutory/regulatory norms.
CS 4	The hospital should adhere to the radiation safety precautions as per the regulatory requirements
CS 5	Intensive Care unit (ICU) services should be available as per the scope of services along with the required infrastructure and manpower
CS 6	OT complex should be available as per the regulatory requirements
CS 7	Look-alike and sound-alike medicines need to be identified and stored separately to avoid any dispensing and administration errors.
CS 8	Policies and procedures for identification, safe dispensing and administration of all high-risk medicines should be documented and implemented
CS 9	The facility has defined and established antibiotic policy
CS 10	Pre-operative, Intra-operative and post-operative assessment should be done and documented by appropriately qualified staff in standardized format.
CS 11	Pre-Anesthesia assessments, type of Anesthesia and Post Anesthesia status should be documented.

CS 1 - PATIENTS PRIVACY SHOULD BE MAINTAINED IN OUT PATIENT DEPARTMENT (OPD) AND IN-PATIENT DEPARTMENT (IPD)

Interpretation – During all the stages of patient care, be it examination or carrying out a procedure, hospital staff shall ensure that the patient's privacy and dignity is maintained. There should be a provision of screens and curtains to ensure precautions are taken while providing care to patients.

Means of verification:

1. Check availability for privacy screens or curtains in OPD and wards for maintaining visual privacy for the patients

CHECK AVAILABILITY FOR PRIVACY SCREENS OR CURTAINS IN OPD AND WARDS FOR MAINTAINING VISUAL PRIVACY FOR THE PATIENTS

CS 2 - THE LAB DIAGNOSTIC SERVICES, WHETHER IN HOUSE OR OUTSOURCED, SHOULD BE AS PER THE SCOPE OF SERVICES

Interpretation – The facility should have MoU/ Agreement for the out-sourced laboratory services, which incorporates quality assurance and requirements of this standard. Also, a list of services provided by the hospital or outsourced should be available. If the services are outsourced, then the hospital should ensure safe and timely transportation of specimens.

Means of verification:

1. List the number of in-house lab services
2. List the number of outsourced lab services with their scope of work.
3. In the case of outsourced services, is there a sample collection room and a procedure to monitor the quality and adequacy of these services.
4. There should be a system in place for the daily round by matron/hospital manager/ hospital superintendent/ Hospital Manager/ Matron in charge of monitoring diagnostic services

LIST THE NUMBER OF OUTSOURCED LAB SERVICES WITH THEIR SCOPE OF WORK

Annual Building Inspection Checklist

Facility Exterior	YES	NO	N/A
Is the building address or identification clearly visible?			
Are exterior lights in working order?			
Are the exits onto public streets free from visibility obstructions?			
Are all building sides accessible to emergency equipment?			
Does the building appear to be in good repair?			
Are exterior walls free from cracks or other damages?			
Are windows free from cracks or broken panes?			
Are paved surfaces inspected and repaired (i.e., lifts, cracks, etc.)?			
Are stairs, landings and handrails in good repair and fastened securely? (inspect the bottom of each step)			
Are facilities periodically inspected and documented?			
Are all sewer clean out caps in place?			
Are all irrigation covers in place?			
Do entrance doors close slowly to avoid hazards to fingers?			
Facility Interior	YES	NO	N/A
Electrical Systems			
Are all electrical panels secured?			
Have all electrical circuits been identified?			
Are all electrical switches and receptacles in good repair?			
Have Ground Fault Interrupters been provided on circuits in proximity to water?			
Is there a "lock-out" procedure in place?			

Laboratory Safety - Self-Audit

Laboratory Name: _____ Date of Inspection: _____
 Department: _____ Inspector/Auditor Name: _____
 Responsible Party: _____

Year	ITEM	Year	ITEM
1. LAB ROOMS	<ul style="list-style-type: none"> a. Primary & secondary exhausts graded with gloves b. Warning & restriction signs (post, curtains, barrier - if needed) c. Emergency phone numbers posted in lab d. Emergency action plan/procedure is available & up to date 	<ul style="list-style-type: none"> a. "No Food or Drink" sign b. Food/drink not stored in unit c. Flammable stored in approved flammables refrigerator d. "Food or Drink Only" sign in approved refrigerator 	
2. LAB EQUIPMENT	<ul style="list-style-type: none"> a. Fire extinguisher available within max 20' wt 1. Unobstructed & pressure at designated location (low top) 2. Extinguisher has annual inspection, sealed, and charged 3. Appropriate extinguisher for hazard (Class A, B, C, or D) b. Aircon's available on site in either central location c. Eyewash present (within 15' or 30' sec travel) <ul style="list-style-type: none"> 1. Unobstructed 2. Checked/tested within past month (record tag) 3. First Aid kit available & stocked <ul style="list-style-type: none"> 1. Stocked, up to date d. Fall signs & emergency lighting operating (if needed) 	<ul style="list-style-type: none"> a. Chemical stored by reaction class (Flamm, acids, toxics, etc.) b. Incompatible chemicals physically separated c. Chemicals properly labeled (original or secondary label implied) 1. Secondary containers w/ PFA labels (filled in correctly) 2. Storage areas labeled with hazard & PPE required d. Special labels & storage (radioactive, biohaz or asbestos) e. Acid/oxidizers/alkalis stored in compatible trays f. No organic chems. on bench top/next to bench/under sinks g. Flammable &/or corrosive solvents available (if needed) 	
3. BIOSHIELDING	<ul style="list-style-type: none"> a. PPE (goggles, gloves, apron) readily available in lab b. Proper eye protection use (safety glasses/goggles/face shield) c. Safety glasses readily available d. Proper chemical resistant/heat resistant/organic glasses e. No shorts/sleeveless/shirtless/sleeveless shirts in use f. Rubber apron available (if concentrated acid/alkali) 	<ul style="list-style-type: none"> A. Mixed with receipt & open dates B. Chemical forms have required disposal date 	
4. GENERAL MAINTENANCE	<ul style="list-style-type: none"> a. Walkways & doors unobstructed b. Adequate lighting and switches 7. Loose brick, tiles, & paper removed promptly 8. No rotting, dripping, seeping or fluid storage in lab 	<ul style="list-style-type: none"> 1. Waste CHEMICALS <ul style="list-style-type: none"> a. Waste form completed & located in container b. Container closed & sealed appropriately if needed 2. VENTILATION - FLOORS <ul style="list-style-type: none"> a. Exhaust hood & return (if applicable) working b. Annual inspection sticker within year (80-120 days) 2. Such hood 2-3' closed except for adjustment c. Cert. integrity hood in use for BSL-1 laboratory (bio safety level 2) d. Hood housekeeping - properly maintained, no excess storage 3. LABORATORIES <ul style="list-style-type: none"> a. Refs, policy sheets, missing parts gathered b. Alarm switch in easily accessible c. Equipment is secured (i.e., bolted to floor) d. Electrical disconnect unobstructed e. Unobstructed operating equipment labeled 3. LABORATORY INSPECTION <ul style="list-style-type: none"> a. Annual inventory available at 100%* status <ul style="list-style-type: none"> 1. Up to date and complete 2. Copy to EHS/ITP coordinator within year b. MSDS readily available for all chemicals (within 10 minutes) 4. TRAINING <ul style="list-style-type: none"> a. Hazard Training - training dock & video under review resp. b. Lab Safety & Training dock & video under review CIP (chemical hygiene plan) 1. Repeat Annual Chemical Hygiene Officer (designated) 2. Chemical Hygiene Plan (available, current) c. Annual Biohazard Training (if aerosol) - documentation 3. Exposure control plan (available, up to date) d. Hazardous waste training (if regular waste stream) e. Radiation, Laser, & other training as appropriate 	
5. ELECTRICAL	<ul style="list-style-type: none"> a. Proper power cord use (ground fault/overloading, no trip hazard) b. Extension cords - large amp, single only (no daisy chain) 8. Power surge (w/ surge protection) - computer equip, only 3. No vertical break up walls, floors or ceiling b. Electrical work not frayed & good insulation c. 3-pronged plug not allowed 1. GFCI (Ground Fault Circuit Interrupter) near sinks & rubber mats are always in use area a. Electrical panels are disconnected and unobstructed 		
6. GLASSWARE	<ul style="list-style-type: none"> a. Properly secured (restricted access) auto recommended b. Storage bottle with orange or full labels c. Cylinder labeled as to contents d. Cap on cylinders not in use 		

* Employees Occupational Safety and Health Program

NOTES: _____

CS 3 - BLOOD BANK SERVICES IF AVAILABLE SHALL BE AS PER THE STATUTORY/REGULATORY NORMS

Interpretation – The blood bank should be functioning and adhere to standards procedures for blood collection and testing. In case the hospital doesn't have the blood bank, it shall have a MoU with the blood bank or the organization having a blood bank which has a valid license. IEC material for blood donation should also be displayed at all strategic locations.

Means of verification:

1. Blood bank services are available in house or outsourced. If outsourced then adequate supply/storage shall be ensured from a nearby authorized blood bank
2. Blood bank has a valid license under Rule 122(G) Drug and cosmetic act
3. Blood bank has a facility of blood collection and storage along with emergency stock of blood
4. IEC material is displayed in blood bank and nearby area to provide information and promote blood donation
5. Check for availability of adequate functional equipment for blood products - Blood bags refrigerator with thermograph and alarm device, Insulated carrier boxes with ice packs, Blood bag weighing machine and deep freezer

BLOOD BANK SERVICES ARE AVAILABLE IN HOUSE OR OUTSOURCED. IF OUTSOURCED THEN ADEQUATE SUPPLY/STORAGE SHALL BE ENSURED FROM A NEARBY AUTHORIZED BLOOD BANK

BLOOD BANK HAS A VALID LICENSE UNDER RULE 122(G) DRUG AND COSMETIC ACT

GOVERNMENT OF KERALA
DRUGS CONTROL DEPARTMENT

ML2-6550/2014/DC
Date: 23/05/2014

Office of the Drugs Controller
Thiruvananthapuram-695 035

VALIDITY CERTIFICATE

This is to certify that Vadannam, Alappuzha Dist., is holding Blood Bank Licence in Form 28C bearing No. 181/28C/RER/DC-CLAA/2009 dated 25/04/2009, issued by this department to operate a Blood Bank, for processing Whole Human Blood LP & its components as per the provision of Drugs & Cosmetics Act, 1940 and Rules there under.

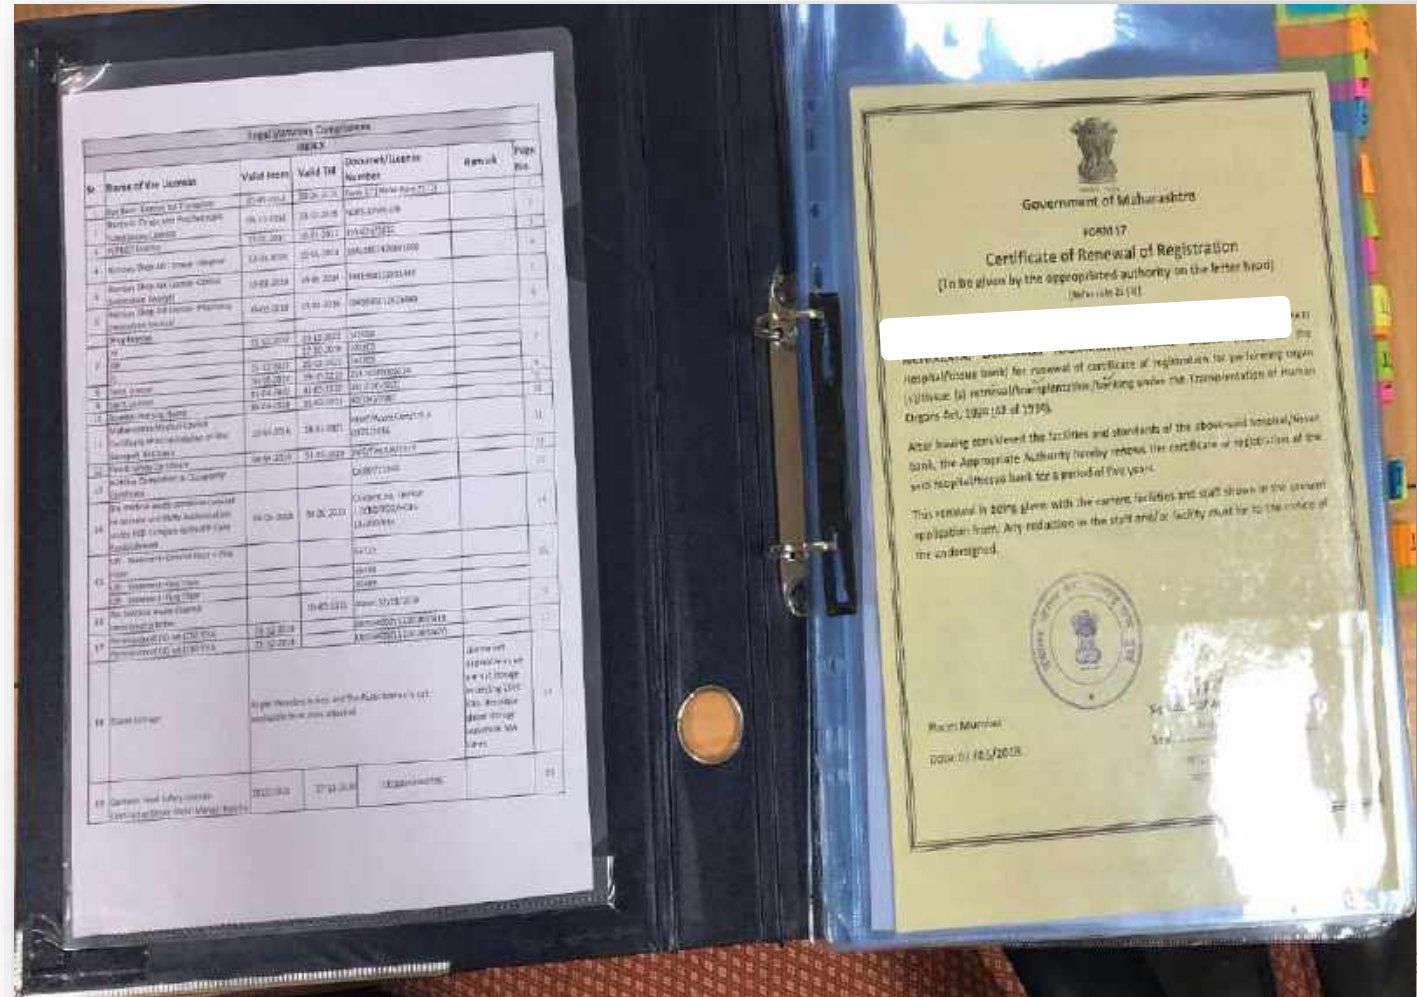

It is further certified that the renewal application of the license of the institution is received in this office for the period 25/04/2014 to 24/04/2019 and the file is under process.

As per the provisions of Drugs and Cosmetics Act, 1940 and Rules there under, the licence shall continue to be in force, until orders are passed on the application and as such the institution is entitled to collect, storage and process Whole Human Blood LP & Blood Components under the above license.

The licence is currently valid under rule- 122G and 122F of the Drugs and Cosmetic Rules 1945.

This certificate is issued on the request of the institution, for submitting before the Medical Council of India and is valid up to 22/05/2015.

P. HARI PRASAD
Drugs Controller and Licensing Authority
Kerala State

BLOOD BANK HAS A FACILITY OF BLOOD COLLECTION AND STORAGE ALONG WITH EMERGENCY STOCK OF BLOOD

IEC MATERIAL IS DISPLAYED IN BLOOD BANK AND NEARBY AREA TO PROVIDE INFORMATION AND PROMOTE BLOOD DONATION

स्वात वक्र उपहार करेली जीवन वक्र संतार

AFTER BLOOD DONATION

RAKTDAAAN
रक्तदान

Rest for atleast 15 minutes

Drink more liquids: water, juice

Remove bandage after 6 hours

Contact blood bank in case of any discomfort

रक्तदान के बाद 15 मिनट तक आराम करें।
पानी, जूस आदि तरल पदार्थों का अधिक सेवन करें।
6 घण्टों के बाद बैंडज को हटा दें।
कोई भी असुविधा होने पर रक्तदान केंद्र से संपर्क करें।

CHECK FOR AVAILABILITY OF ADEQUATE FUNCTIONAL EQUIPMENT FOR BLOOD PRODUCTS - BLOOD BAGS REFRIGERATOR WITH THERMOGRAPH AND ALARM DEVICE, INSULATED CARRIER BOXES WITH ICE PACKS, BLOOD BAG WEIGHING MACHINE AND DEEP FREEZER

CS 4 - THE HOSPITAL SHOULD ADHERE TO THE RADIATION SAFETY PRECAUTIONS AS PER THE REGULATORY REQUIREMENTS

Interpretation – Shielding of body parts of staff and patients, attendants should be adhered to by using protective devices and equipment, along with precautions as per law for radiation safety. The facility should also ensure standard practices, usage and supply of Personal Protective Equipment (PPE).

Means of verification:

1. Clean gloves, aprons and masks are available at the point of use
2. TLD badges should be provided to each staff member in the radiation room
3. Lead aprons, thyroid shields and other radiation protection devices should be provided for the staff in the radiation field. These should be tested once in 2 years as per AERB norms
4. Availability of ECG services

CLEAN GLOVES, APRONS AND MASKS ARE AVAILABLE AT THE POINT OF USE

Bouffant Caps

Disposable Apron

Face Mask

Nitrile Examination

Plastic Gloves

PP Nose Mask

Shoe Cover

Surgical Gloves

Surgeon Caps

TLD BADGES SHOULD BE PROVIDED TO EACH STAFF MEMBER IN THE RADIATION ROOM

LEAD APRONS, THYROID SHIELDS AND OTHER RADIATION PROTECTION DEVICES SHOULD BE PROVIDED FOR THE STAFF IN THE RADIATION FIELD. THESE SHOULD BE TESTED ONCE IN 2 YEARS AS PER AERB NORMS

AVAILABILITY OF ECG SERVICES

CS 5 - INTENSIVE CARE UNIT (ICU) SERVICES SHOULD BE AVAILABLE AS PER THE SCOPE OF SERVICES ALONG WITH THE REQUIRED INFRASTRUCTURE AND MANPOWER

Interpretation – The ICU should be equipped with necessary monitoring equipment along with the suitably manned by trained staff. The hospital should provide proper and safe environment to the infected patients and necessary procedures should be followed for the same.

Means of verification:

1. Flooring of the ICU should be non-slippery and smooth
2. Windows/ air vents if any should be intact and sealed
3. Comfortable temperature & humidity should be maintained
4. Availability of general duty doctor, nursing staff, paramedic and security staff as per requirements
5. Critical care equipment is available and maintained- Refrigerator, Crash cart/Drug trolley, instrument trolley, dressing trolley, Ventilator, Infusion pump, C-PAP, tray, monitors, Electrical panel with a bed, bedhead panel with an outlet for Oxygen and vacuum, X-ray view box, defibrillator
6. Availability of isolated area for infectious patient
7. Isolation and barrier nursing procedures are followed for septic cases

FLOORING OF THE ICU SHOULD BE NON-SLIPPERY AND SMOOTH

WINDOWS/ AIR VENTS IF ANY SHOULD BE INTACT AND SEALED

COMFORTABLE TEMPERATURE & HUMIDITY SHOULD BE MAINTAINED

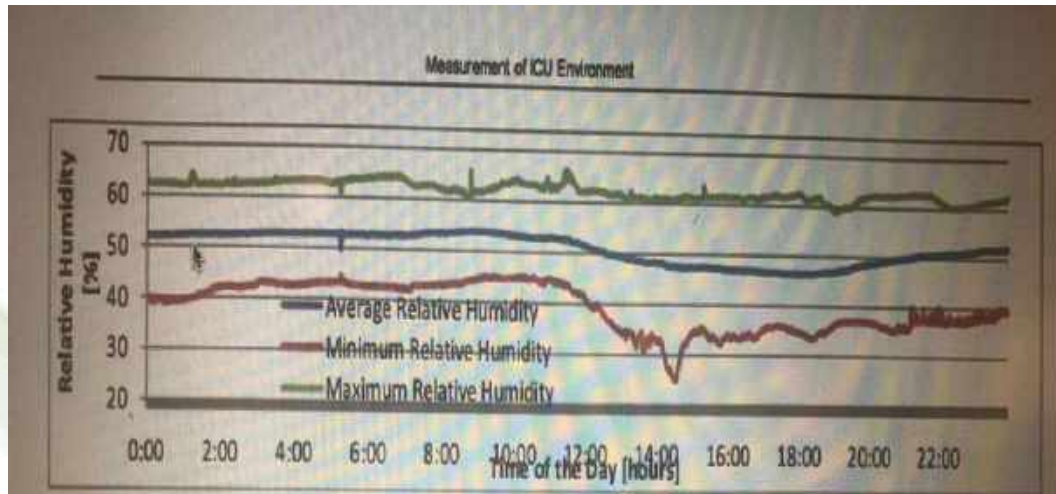

Figure: Average, minimum & maximum relative humidity in Summer continuous measurements over a 24-hour period at the ICB

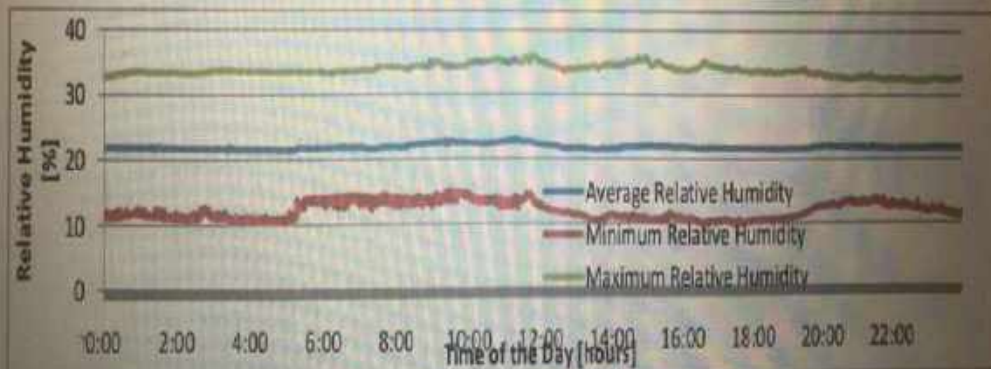

Figure: Average, minimum & maximum relative humidity in the Winter continuous measurements over a 24-hour period at the ICB

Figure: Average, minimum & maximum radiant temperature in Summer continuous measurements over a 24-hour period at the ICB

Figure: Average, minimum & maximum radiant temperature in Winter continuous measurements over a 24-hour period at the ICB

CRITICAL CARE EQUIPMENT IS AVAILABLE AND MAINTAINED- REFRIGERATOR, CRASH CART/DRUG TROLLEY, INSTRUMENT TROLLEY, DRESSING TROLLEY, VENTILATOR, INFUSION PUMP, C-PAP, TRAY, MONITORS, ELECTRICAL PANEL WITH A BED, BEDHEAD PANEL WITH AN OUTLET FOR OXYGEN AND VACUUM, X-RAY VIEW BOX, DEFIBRILLATOR

AVAILABILITY OF ISOLATED AREA FOR INFECTIOUS PATIENT

ISOLATION AND BARRIER NURSING PROCEDURES ARE FOLLOWED FOR SEPTIC CASES

A Nurse's Guide To Isolation Precautions

- Contact Isolation Precautions
- Droplet Isolation Precautions
- Airborne Isolation Precautions
- Neutropenic and Radiation Precautions

Follow CONTACT ISOLATION

- Used to prevent transmission of microorganisms spread by direct/indirect contact with the source
- examples:
 - MRSA
 - VRE
 - C. diff
 - contagious skin infections... Lice & Scabies

Five major routes of transmission

1. Contact:
 - Direct (person-person)
 - Indirect (through an object)
2. Droplet
3. Airborne
4. Common vehicle
5. Vector borne

What germs are on our hands ??

The same organism may be transmitted by more than one route

CS 6 - OT COMPLEX SHOULD BE AVAILABLE AS PER THE REGULATORY REQUIREMENTS

Interpretation – The organization shall ensure that the operation theater has facilities for demarcated areas, separate changing rooms for males and females along with proper illumination and temperature.

Means of verification:

1. Proper demarcation of the following areas: protective zone, clean zone, sterile zone and disposal zone
2. Availability of signage stating that the entry to OT is restricted
3. Pre-operative and post-operative area should be well-lit
4. Change rooms are available for male and female staff; entry in OT should be allowed only after change in attire
5. Temperature and humidity are maintained and record of same is kept

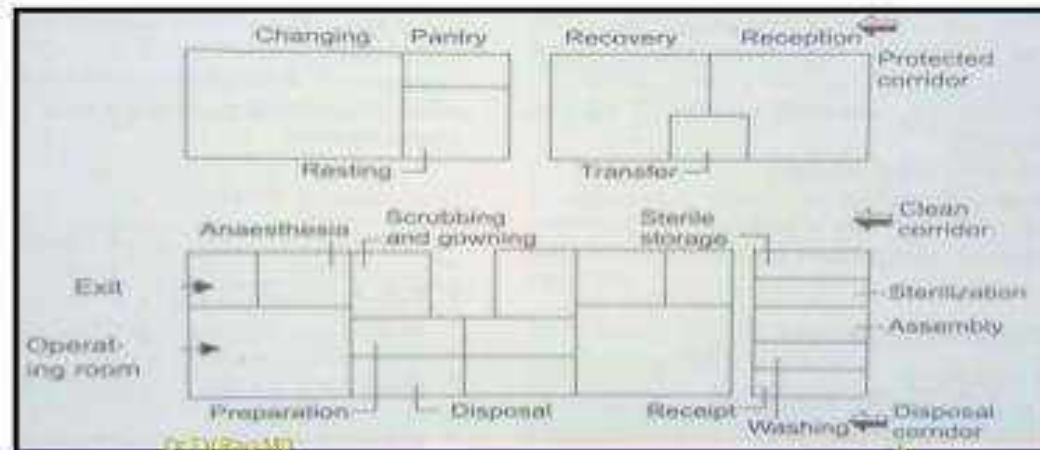

PROPER DEMARCATION OF THE FOLLOWING AREAS: PROTECTIVE ZONE, CLEAN ZONE, STERILE ZONE AND DISPOSAL ZONE

Planning consideration

Zoning :

To ensure the aseptic condition the operating dept is divide into 4 zone :

1. Protective zone
2. Clean zone
3. Sterile zone
4. Disposal zone

AVAILABILITY OF SIGNAGE STATING THAT THE ENTRY TO OT IS RESTRICTED

PRE-OPERATIVE AND POST-OPERATIVE AREA SHOULD BE WELL-LIT

CHANGE ROOMS ARE AVAILABLE FOR MALE AND FEMALE STAFF; ENTRY IN OT SHOULD BE ALLOWED ONLY AFTER CHANGE IN ATTIRE

TEMPERATURE AND HUMIDITY ARE MAINTAINED AND RECORD OF SAME IS KEPT

Maintaining the Operation theaters is a priority

- Stress must be laid on
- Temperature
- Humidity
- Ventilation
- Temperature : 24-27°C
- Relative Humidity : 45% – 60% for adult
- 55% – 65% for infants

CS 7 - LOOK-ALIKE AND SOUND-ALIKE MEDICINES NEED TO BE IDENTIFIED AND STORED SEPARATELY TO AVOID ANY DISPENSING AND ADMINISTRATION ERRORS.

Interpretation – The drug store should arrange the stock in alphabetic/ uniform/ standardised order and storage requirement of the drugs should be adhered to. The overall cleanliness and temperature of the storage area should be maintained. One look alike should be stored apart from its other look alike.

Means of verification:

1. Product of similar name and different strength (look alike and sound alike drugs) should be stored separately.
2. Medicine storage shall be in a clean, well lit, and in a safe environment in accordance with the applicable laws and regulations.
3. Stock is arranged neatly in alphabetic order with the name facing the front and labels must have drug name, strength and frequency
4. Drug store has inventory management software

MEDICINE STORAGE SHALL BE IN A CLEAN, WELL LIT, AND IN A SAFE ENVIRONMENT IN ACCORDANCE WITH THE APPLICABLE LAWS AND REGULATIONS

STOCK IS ARRANGED NEATLY IN ALPHABETIC ORDER WITH THE NAME FACING THE FRONT AND LABELS MUST HAVE DRUG NAME, STRENGTH AND FREQUENCY

DRUG STORE HAS INVENTORY MANAGEMENT SOFTWARE

CS 8 - POLICIES AND PROCEDURES FOR IDENTIFICATION, SAFE DISPENSING AND ADMINISTRATION OF ALL HIGH-RISK MEDICINES SHOULD BE DOCUMENTED AND IMPLEMENTED

Interpretation – Clear policies to be laid down for dispensing of high-risk medicines and the list of such medicines should be available at the drug store. The narcotics drugs should be stored in secure manner.

Means of verification:

1. Documented procedure incorporating storage, prescription and dispensing of medications
2. Narcotic medicines are kept in double lock
3. Pharmacy has a list of high-risk drugs available with it

Shri Ganapati Netralaya

HIGH RISK MEDICATIONS : A- PINCH

The acronym 'APINCH' is designed to serve as a reminder that even routinely administered medicines pose a high risk to patient safety.

Assumed:

- A** ANTI-INFECTIVES
- P** POTASSIUM AND OTHER ELECTROLYTES
- I** INSULIN
- N** NARCOTICS AND OTHER SEDATIVES
- C** CHEMOTHERAPEUTIC AGENTS
- H** HEPARIN AND OTHER ANTICOAGULANTS

CS 9 - THE FACILITY HAS DEFINED AND ESTABLISHED ANTIBIOTIC POLICY

Interpretation – The Hospital must have an established antibiotic policy ensuring rational use of antibiotic/drug.

Means of verification:

1. Facility should ensure the rational usage of antibiotics/ drugs and policy for the same is in place and implemented.

FACILITY SHOULD ENSURE THE RATIONAL USAGE OF ANTIBIOTICS/ DRUGS AND POLICY FOR THE SAME IS IN PLACE AND IMPLEMENTED

STOP OVERUSE AND MISUSE OF ANTIBIOTICS COMBAT RESISTANCE

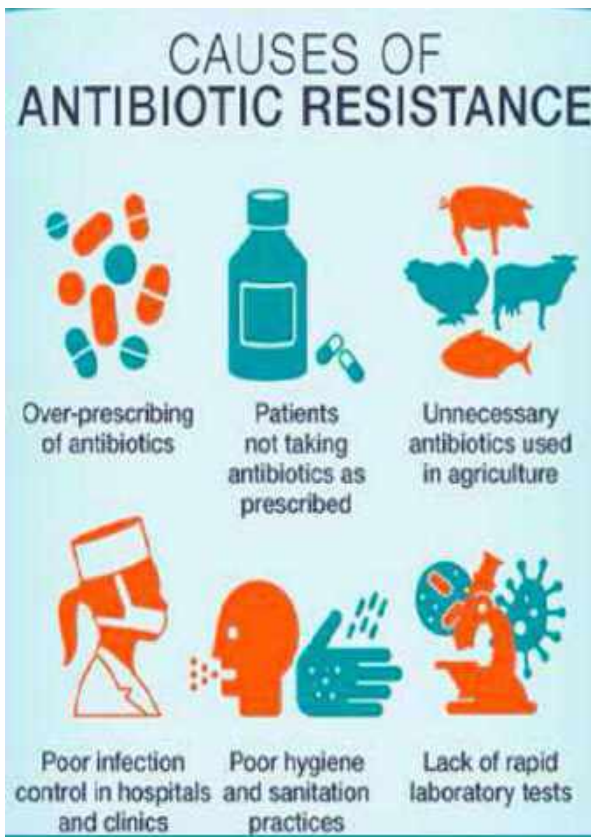

Antimicrobial resistance happens when bacteria and other microorganisms change after being exposed to antimicrobial drugs. Antibiotics are among the most common antimicrobial drugs used in humans and animals. The overuse and misuse of antibiotics is speeding up the development of resistance and putting us all at risk.

Antibiotic resistance can affect anyone, of any age, in any country. It is a threat to human health, food security and sustainable development.

WHAT YOU CAN DO

- 1 Stop overuse and misuse of antibiotics by:**
 - > Seeking advice from a qualified health professional before using antibiotics
 - > If prescribed antibiotics, following a health professional's advice on how to take them
 - > Educating family and friends about antibiotic resistance
- 2 Prevent the spread of infection by:**
 - > Washing hands regularly
 - > Preparing food hygienically
 - > Keeping vaccinations up to date

CS 10 - PRE-OPERATIVE, INTRA-OPERATIVE AND POST-OPERATIVE ASSESSMENT SHOULD BE DONE AND DOCUMENTED BY APPROPRIATELY QUALIFIED STAFF IN STANDARDIZED FORMAT

Interpretation – All the patients undergoing surgery should be assessed pre-operative, intra-operative and post-operative by the trained staff, which should be documented in a standardized format. Also, a documented procedure should be available for preventing adverse like wrong site, wrong patient and wrong surgery.

Means of verification:

1. There is a procedure for pre-operative and intra-operative assessment - Physical examination, result of lab investigation, diagnosis and proposed surgery (3 samples)
2. Patient reports with post-operative notes that should contain vital signs, pain control, urine and gastrointestinal fluid output, other medications and Laboratory investigations (3 samples)
3. Documented procedure to address the prevention of adverse events like wrong site, wrong patient and wrong surgery.

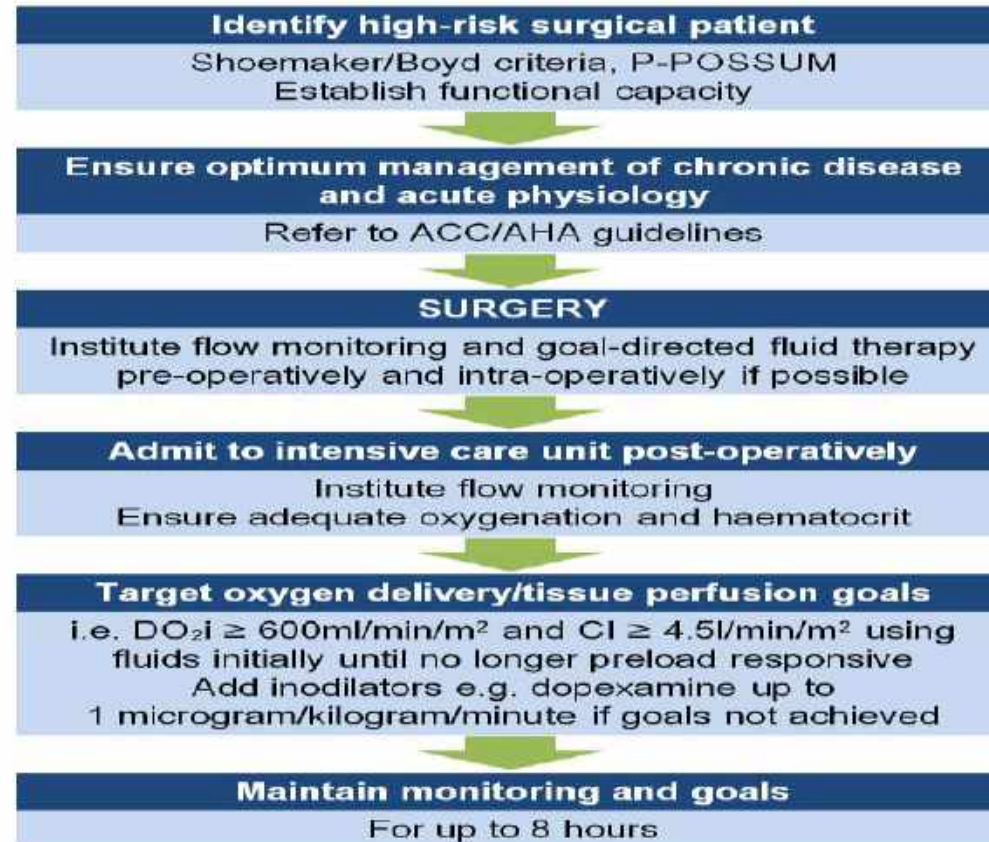

THERE IS A PROCEDURE FOR PRE-OPERATIVE AND INTRA-OPERATIVE ASSESSMENT - PHYSICAL EXAMINATION, RESULT OF LAB INVESTIGATION, DIAGNOSIS AND PROPOSED SURGERY

A UNIT OF MAHYCO RESEARCH FOUNDATION TRUST
CHECKLIST BEFORE SURGERY

Name of the patient : MRD Number :
Name of the doctor : Date :

Adapted from Lees et al (2009) Clinical review: Goal-directed therapy in high risk surgical patients. *Critical Care*, 13:231
CI = cardiac index, DO_{2i} = oxygen delivery index

PATIENT REPORTS WITH POST-OPERATIVE NOTES THAT SHOULD CONTAIN VITAL SIGNS, PAIN CONTROL, URINE AND GASTROINTESTINAL FLUID OUTPUT, OTHER MEDICATIONS AND LABORATORY INVESTIGATIONS

Postoperative care

Post-operative notes and orders

The patient should be discharged to the ward with comprehensive orders for the following:

- Vital signs
- Pain control
- Rate and type of intravenous fluid
- Urine and gastrointestinal fluid output
- Other medications
- Laboratory investigations

The patient's progress should be monitored and should include at least:

- A comment on need for analgesia/observational
- A specific comment on the wound or operation site
- Any complications
- Any changes made in treatment

Aftercare: Prevention of complications

- Encourage early mobilization
 - Deep breathing and coughing
 - Active daily exercise
 - Joint range of motion
 - Muscle strengthening
- Make walking aids such as canes, crutches and walkers available and provide instructions for their use
- Ensure adequate nutrition
- Review skin breakdown and pressure sores:
 - Turn the patient frequently
 - Keep skin area clean and dry
- Provide adequate pain control

Discharge note

On discharging the patient from the ward, attend to the notes:

- Deposes on admission and discharge
 - Certify at course in hospital
 - Instructions about further management, including drug prescribed
- Ensure that a copy of this information is given to the patient, together with details of any follow-up appointments.

DOCUMENTED PROCEDURE TO ADDRESS THE PREVENTION OF ADVERSE EVENTS LIKE WRONG SITE, WRONG PATIENT AND WRONG SURGERY

Before entering OR	Before inducing anesthesia	Final pause before incision	Before leaving OR	Postoperative destination

CS 11 - PRE-ANESTHESIA ASSESSMENTS, TYPE OF ANESTHESIA AND POST ANESTHESIA STATUS SHOULD BE DOCUMENTED

Interpretation – The pre-anesthesia, post anesthesia and type of anesthesia should be monitored and documented in a standardized format. Also the patient records must contain regular and periodic monitoring records of patients who are under observation Post Operative/Anesthesia for the purpose of taking corrective and preventive actions.

Means of verification:

1. Department has documented procedure for pre-operative anesthesia checkup
2. Anesthesia plan is documented before entering into OT
3. Post anesthesia status is monitored and recorded
4. Post-Operative/Anesthesia monitoring includes regular and periodic recording of heart rate, cardiac rhythm, respiratory rate, blood pressure, oxygen saturation, airway security and patency

ANESTHESIA PLAN IS DOCUMENTED BEFORE ENTERING INTO OT

Anesthesia Care Plan Development: DOS

- ✓ Review current lab data
- ✓ Review medical & surgical history with the patient
- ✓ Perform physical assessment for anesthesia
- ✓ Discuss plan with supervisor
- ✓ Revise the plan as needed
- ✓ Discuss plan with patient and obtain consent

The anesthetic care plan is based on:

- A review of the medical record available
- Medical history
- Prior anesthetic experiences
- Drug therapies
- Medical examination and assessment of any physical conditions that might affect the decision about the preoperative risk management
- A review of medical test and consultations that might reflect on the anesthesia administration
- An appropriate preoperative medications needed for the conduct of anesthesia
- Providing appropriate preoperative instructions and other preparations as needed

3 Stages of Plan Development

Prior to Day of Surgery (DOS):

- Patient / nursing completes a health assessment including pre-anesthesia
- Old medical records, including anesthesia, may be reviewed
- Develop a care plan based on this information**

DOS:

- Conduct patient interview
- Perform anesthesia physical assessment
- Review current lab data
- Revise the preliminary plan if needed**

Intraoperative:

- Provide vigilant care
- Continually assess the plan and prepare to revise as needs arise**

POST-OPERATIVE/ANESTHESIA MONITORING INCLUDES REGULAR AND PERIODIC RECORDING OF HEART RATE, CARDIAC RHYTHM, RESPIRATORY RATE, BLOOD PRESSURE, OXYGEN SATURATION, AIRWAY SECURITY AND PATENCY

CHAPTER 3: SUPPORT SERVICES (OVERVIEW)

Support services are fundamental foundation of every healthcare facility and helps other departments things run smoothly. And when things are running well, patients receive better care, so the expected clinical outcome cannot be visualized in the absence of support services. This chapter includes parameters to **evaluate cleanliness, sterilization, infection control practices, security and facility management, water and power supply, dietary services and laundry.** These standards also cover some of the administrative processes like legal and statutory compliances, contract management, Bio-Medical waste disposal etc. If these services and facilities are in place and are managed efficiently, supported and maintained, mainline healthcare delivery will be effective.

CHAPTER 3: SUPPORT SERVICES

SS 1	Hospital should be clean and have well managed flooring
SS 2	Temperature control and ventilation should be maintained in patient care and nursing area
SS 3	The hospital should have arrangement of water storage and should be tested periodically as per requirement
SS 4	The hospital should have 24 hours supply of electricity, either through direct supply or from other sources
SS 5	Medical gases and vacuum shall be made available all the time and stored safely. Compressed air should be made available as per the scope of services.
SS 6	The facility should adhere to the practices specified under statutory compliances as per the scope of services - Licenses with Certificate number, date of issue and date of expiry
SS 7	The hospital should ensure that appropriate infection control practices are being followed along with hand hygiene practices
SS 8	Hospital should ensure Bio-Medical Waste management practices as per the statutory norms (BMW (Amendment) Rules, 2018)
SS 9	Hospital should ensure that services i.e. (Laundry, Housekeeping, Dietary, security, Ambulance, Mortuary, Central Sterile Supply Department (CSSD) etc. are available (in-house or outsourced).
SS 10	Sexual harassment and grievance handling procedure should be available.

SS 1 - HOSPITAL SHOULD BE CLEAN AND HAVE WELL MANAGED FLOORING

Interpretation – The flooring of the hospital should be well managed and have adequate cleaning processes like mopping, scrubbing etc. conducive for the infection control.

Means of verification:

1. The floor should be non-slippery and dry
2. The floor surface should be smooth enough for effective cleaning and walking
3. The facility should be cleaned at least twice in the day with a wet mop and are also rigorously cleaned with scrubbing at least once in a month. Check cleaning records for regular and frequency of cleaning

THE FLOOR SHOULD BE NON-SLIPPERY AND DRY

THE FLOOR SURFACE SHOULD BE SMOOTH ENOUGH FOR EFFECTIVE CLEANING AND WALKING

THE FACILITY SHOULD BE CLEANED AT LEAST TWICE IN THE DAY WITH A WET MOP AND ARE ALSO RIGOROUSLY CLEANED WITH SCRUBBING AT LEAST ONCE IN A MONTH. CHECK CLEANING RECORDS FOR REGULAR AND FREQUENCY OF CLEANING

GNERS General hospital, Himmabagar
Sgt. Laxmi Hospital (GNERS)

Sl. No.	Room	Room No.	Room Name	Room Type	Room Category	Room Status	Room No.	Room Name	Room Type	Room Category	Room Status

9	109	109	109	109	109	109	109	109	109	109	109
10	110	110	110	110	110	110	110	110	110	110	110

A detailed cleaning record form with multiple columns for room details, cleaning dates, and frequencies. The form is filled out with handwritten entries.

SS 2 - TEMPERATURE CONTROL AND VENTILATION SHOULD BE MAINTAINED IN PATIENT CARE AND NURSING AREA

Interpretation – Arrangement for comfortable work environment in terms of temperature control should be available in patient care areas and work stations.

Means of verification:

1. Availability of fans/ air conditioning/ heating/ exhaust/ air vents as per the requirement and weather condition.

AVAILABILITY OF FANS/ AIR CONDITIONING/ HEATING/ EXHAUST/ AIR VENTS AS PER THE REQUIREMENT AND WEATHER CONDITION

SS 3 - THE HOSPITAL SHOULD HAVE ARRANGEMENT OF WATER STORAGE AND SHOULD BE TESTED PERIODICALLY AS PER REQUIREMENT

Interpretation – The hospital shall ensure that there is sufficient water supply to meet the requirements at all point of use round the clock. Alternate source of water should be available as backup for any failure or shortage and same should be tested on regular basis. The results of the tests should be documented.

Means of verification:

1. At least 200 liters of water per bed per day is available on a daily 24x7 basis. Adequate backup for continuous water supply should be available (check alternate sources also)
2. Water is available at all points of use for hand washing, OT, Labor room, wards, Patients toilet & bathroom.
3. All water tanks are kept tightly closed to ensure safety
4. Check the records for periodic tests of the quality of water from the source (municipal supply, borewell, etc.) for bacterial and chemical content as per the guidelines

AT LEAST 200 LITERS OF WATER PER BED PER DAY IS AVAILABLE ON A DAILY 24X7 BASIS. ADEQUATE BACKUP FOR CONTINUOUS WATER SUPPLY SHOULD BE AVAILABLE (CHECK ALTERNATE SOURCES ALSO)

According to WHO guidelines, the **minimum water** requirement of a **hospital** is about 50 litres **per person per day**. Normally, the **water** requirement is 115 litres **per person per day**. A district **hospital** with about 100 patients and 200 personnel, or a total of 300 people, will **need** at least 34,500 litres of **water per day**.

Examples of alternative water sources include:

- Harvested rainwater from roofs
- Harvested storm water
- Reclaimed wastewater
- Gray water
- Captured condensate
- Additional alternative water sources**
 - Atmospheric water generation
 - Discharged water from water purification processes
 - Foundation water
 - Blowdown water
 - Desalinated water.

WATER IS AVAILABLE AT ALL POINTS OF USE FOR HAND WASHING, OT, LABOR ROOM, WARDS, PATIENTS TOILET & BATHROOM

ALL WATER TANKS ARE KEPT TIGHTLY CLOSED TO ENSURE SAFETY

SS 4 - THE HOSPITAL SHOULD HAVE 24 HOURS SUPPLY OF ELECTRICITY, EITHER THROUGH DIRECT SUPPLY OR FROM OTHER SOURCES

Interpretation – Hospital should have availability of power back up in the form of emergency lights, DG sets, solar energy, UPS, noiseless generators or any other suitable source. The staff involved in maintenance of electricity must have rubber mats, gloves and boots for safe working and prevention from any mis happening.

Means of verification:

1. Check the availability of power back up, availability of UPS, emergency lights or noiseless generators
2. Rubber mats are available in the electrical room below the panels and rubber gloves, boots and safety gears are provided to the electrical staff

CHECK THE AVAILABILITY OF POWER BACK UP, AVAILABILITY OF UPS, EMERGENCY LIGHTS OR NOISELESS GENERATORS

UPS

Emergency lights

RUBBER MATS ARE AVAILABLE IN THE ELECTRICAL ROOM BELOW THE PANELS AND RUBBER GLOVES, BOOTS AND SAFETY GEARS ARE PROVIDED TO THE ELECTRICAL STAFF

SS 5 - MEDICAL GASES AND VACUUM SHALL BE MADE AVAILABLE ALL THE TIME AND STORED SAFELY. COMPRESSED AIR SHOULD BE MADE AVAILABLE AS PER THE SCOPE OF SERVICES.

Interpretation – Manifold room should be accessible and have adequate back up of oxygen cylinders. Availability of central oxygen and vacuum supply should especially be assessed in critical area like OT and ICU with standardized colour coding of cylinders and pipelines. A prompt replacement procedure and alarm system should be available to indicate any abnormal pressure change in the room. The instructions for operating different equipment's in manifold room should be displayed clearly.

Means of verification:

1. The manifold room should be located on the ground floor and entry to the room is prohibited for the unauthorized people.
2. The manifold room should have at least 3 days of oxygen and other medical gases stock, that is chained appropriately
3. Colour of the gas pipeline (if applicable) and the gas cylinder has to be as per the standards
4. The alarm system should be operational to indicate any abnormal pressure change
5. Adequate back-up of B-type cylinders in critical areas like ICU, OT and for patient transfer purpose
6. The procedure being followed for prompt replacement of empty cylinders with filled cylinders
7. Instruction for operating different equipment in the manifold room should be clearly displayed

THE MANIFOLD ROOM SHOULD BE LOCATED ON THE GROUND FLOOR AND ENTRY TO THE ROOM IS PROHIBITED FOR THE UNAUTHORIZED PEOPLE

THE MANIFOLD ROOM SHOULD HAVE AT LEAST 3 DAYS OF OXYGEN AND OTHER MEDICAL GASES STOCK, THAT IS CHAINED APPROPRIATELY

COLOUR OF THE GAS PIPELINE (IF APPLICABLE) AND THE GAS CYLINDER HAS TO BE AS PER THE STANDARDS

Gas pipeline

Gas Cylinder

	USA	ISO
Carbon Dioxide	Grey	Grey
He-O ₂	Brown and Green	Brown and White
Medical Air	Yellow	Black and White
Nitrogen	Black	Black
Nitrous Oxide	Blue	Blue
O ₂ -He	Green and Brown	White and Brown
Oxygen	Green	White
Vacuum (Suction)	White	Yellow
WAGD (EVAC)	Purple	Purple

Colour classification by hazard property:

Bright Green	Inert
Light Blue	Oxidising
Yellow	Toxic and/or Corrosive
Red	Flammable

Colour classification by specific gas:

Maroon	Acetylene
White	Oxygen
Dark Green	Argon
Black	Nitrogen
Grey	Carbon Dioxide
Brown	Helium

Material Property	Letter Color on Field Color	Example
Single Gases		
Oxygen USP [†]	White on Green	→ OXYGEN 50-55 PSI →
Carbon Dioxide [†]	White on Gray	→ CARBON DIOXIDE →
Nitrous Oxide [†]	White on Blue	→ NITROUS OXIDE →
Cyclopropane [‡]	Black on Orange	→ CYCLOPROPANE →
Helium USP [†]	White on Brown	→ HELIUM 50-55 PSI →
Nitrogen NF [†]	White on Black	→ NITROGEN 160-200 PSI →
Medical Air USP [†]	Black on Yellow	→ MEDICAL AIR →
Instrument Air [†]	White on Red	→ INSTRUMENT AIR →
Waste Anesthetic Gas Disposal [†]	White on Purple	→ WASTE ANESTHETIC →
Laboratory Air [†]	Black on White/Yellow Checkerboard	→ LABORATORY AIR →
Laboratory Vacuum [†]	Black on Black/White Checkerboard ²	→ LABORATORY VACUUM →
Medical-Surgical Vacuum [†]	Black on White	→ MEDICAL VACUUM →

THE ALARM SYSTEM SHOULD BE OPERATIONAL TO INDICATE ANY ABNORMAL PRESSURE CHANGE

ADEQUATE BACK-UP OF B-TYPE CYLINDERS IN CRITICAL AREAS LIKE ICU, OT AND FOR PATIENT TRANSFER PURPOSE

Cylinder valve
(some B10 cylinders)

Caution
Red indicates empty and the cylinder should be changed immediately.

THE PROCEDURE BEING FOLLOWED FOR PROMPT REPLACEMENT OF EMPTY CYLINDERS WITH FILLED CYLINDERS

Cylinder Safety

Below is a summary of the DO's/DON'Ts when working with gas cylinders

DO	DON'T
Ensure a regulator is fitted before use	Repaint a cylinder
Ensure cylinder is firmly secured	Change the markings on a cylinder
Ensure connections are tight and suitable	Use oil or lubricants on cylinder valve
Ensure cylinders are stored and used away from ignition sources	Tamper with the gas cylinder test tag
Store full and empty cylinders separately	Tamper with or remove the barcode from a gas cylinder
Ensure valve guards or caps are fitted when cylinders are not in use	Roll cylinders along the ground
Use mechanical assistance when handling cylinders	Attempt to fight a fire involving a gas cylinder
Ensure adequate ventilation is available for the gas in question	Transport gas cylinders in the passenger compartment of a vehicle
Ensure exposure limits are not exceeded	Use a cylinder that shows evidence of damage or corrosion
Read the SDS	Fill cylinders with any material at all
Follow appropriate SWP	
Have gas detection devices installed if required	

INSTRUCTION FOR OPERATING DIFFERENT EQUIPMENT IN THE MANIFOLD ROOM SHOULD BE CLEARLY DISPLAYED

4. GAS MANIFOLD

Gas manifolds are designed to supply the pipeline system with sufficient quantity of gas by cylinders and/or tanks.

The typical manifold for medical gases usually consists of a two-sided cylinder supply with automatic changeover between the empty and full side, and an additional third source for emergency supply.

MANIFOLD ROOM

- Consists of a cylinder manifold and a control panel
- Manifold can be of 2 banks of 2 cylinders each or 2 banks of 20 cylinders each.
- Control panel: primary and secondary pressure regulations: warning lamp.

SS 6 - THE FACILITY SHOULD ADHERE TO THE PRACTICES SPECIFIED UNDER STATUTORY COMPLIANCES AS PER THE SCOPE OF SERVICES - LICENSES WITH CERTIFICATE NUMBER, DATE OF ISSUE AND DATE OF EXPIRY

Interpretation – Hospital should adhere to the statutory norms/ compliances laid down by government as per the scope of services and must provide certificates/ licenses for the same.

Means of verification:

1. Fire Department Clearance Certificate
2. NOC from Pollution Control Board for air and water pollution
3. Lift License (if applicable)
4. Hospital Registration Certificate
5. Bio-Medical Waste Management
6. PCPNDT Act Registration
7. AERB
8. Pharmacy License & Narcotics Drugs License (if applicable)
9. Ambulance Registration Certificate, insurance Policy, pollution control and Driver License (if in house or outsourced)

NOC FROM POLLUTION CONTROL BOARD FOR AIR AND WATER POLLUTION

HARYANA STATE POLLUTION CONTROL BOARD
 C-11, SECTOR-6, FARIDKOLA
 Ph. 2879750 to 6 with fax/whatsapp numbers
 GGS Indraprastha

Whereas the Board had issued a policy order vide Order No. 10155-10218 dated 07.03.2014 published in the Haryana Government Gazette on 15.04.2014, specifying the procedure for obtaining consent to establish and consent to operate, according to which all the cases of consent to establish and consent to operate under Water Act, 1974, Air Act, 1981 and authorization under Hazardous Waste (MH&TM) Rules, 2008 are being decided at the level of the Chairman of the Board through Online Consent Management and Monitoring System.

Whereas powers of deciding CTE and CTO applications in some specified cases were delegated to Regional Officers for deciding the applications vide order No. 3711-34 dated 20.10.2015 in view of the decision taken by the Board in its 179th meeting held on 29.09.2015.

Whereas the Haryana Government, Industries & Commerce Department had notified Haryana Categories Permission Policy, 2015 on 18 October 2015 for facilitating ease of doing business and further modified the notification of the committee at State Level and District Level vide no. 40/SI/2003-1121 dated 03.02.2018 to provide single window service under one roof for time bound clearance of new projects and for accelerating the pace of investment in the State.

A meeting of officers was held on 25.02.2016 under the Chairmanship of Chairman HSPCB wherein it was decided that the powers to Regional Officers be delegated in view of above said notifications dated 01.10.2015 and 03.02.2018 issued by Government of Haryana, Industries & Commerce Department, being one of the members of the District Level Committee created by Deputy Commissioner of the Districts for grant/renewal of consent to establish and consent to operate applications under Water (Prevention & Control of Pollution) Act, 1974, Air (Prevention & Control of Pollution) Act, 1981 and authorization under Hazardous Waste (MH&TM) Rules, 2008 in respective areas of jurisdiction for red and orange category of industries with an investment upto Rs. 10 crore or CILF runs upto 1 acre in manufacturing area.

In view of above, all Regional Officers are hereby delegated powers to grant/renewal of consent to establish and consent to operate applications under Water (Prevention & Control of Pollution) Act, 1974, Air (Prevention & Control of Pollution) Act, 1981 and to grant authorization under Hazardous Waste (MH&TM) Rules, 2008 in their respective areas of jurisdiction for red and orange category of industries with an investment upto Rs. 10 crore or CILF runs upto 1 acre in manufacturing area.

These orders shall come into force with immediate effect.

Dated Faridkola, the **1st March, 2016** **Anandh Rastogi, IAS**
 Chairman

Order No. HSPCB/PLG-136/2016/SHW-5052 Dated: 01/03/16

A copy of the above is forwarded to the following for information and necessary action:

- 1. All Branch Incharge in Head Office.

SS 7 - THE HOSPITAL SHOULD ENSURE THAT APPROPRIATE INFECTION CONTROL PRACTICES ARE BEING FOLLOWED ALONG WITH HAND HYGIENE PRACTICES

Interpretation – The hospital infection control and prevention process should be documented which aims at preventing and reducing risk of healthcare associated infection. The organisation shall also adhere to hand hygiene, cleaning, disinfection and sterilization guidelines.

Means of verification:

1. Availability of wash basin near the point of use along with antiseptic soap with soap dish/ liquid antiseptic with dispenser
2. Availability of alcohol-based hand rub
3. Availability of disinfectant/cleaning agent as per requirement
4. Check if infection control manual showing periodic update and surveillance activities available/ monitoring takes place
5. The facility should follow standard practices and materials for disinfection and sterilization of instruments/ equipment
6. Staff should be trained for all infection control practices, hand hygiene guideline, occupational risk and its prevention.

AVAILABILITY OF WASH BASIN NEAR THE POINT OF USE ALONG WITH ANTISEPTIC SOAP WITH SOAP DISH/ LIQUID ANTISEPTIC WITH DISPENSER

AVAILABILITY OF ALCOHOL-BASED HAND RUB

When should I use?

Soap and Water

- Before, during, and after preparing food
- Before eating food
- Before and after caring for someone who is sick
- Before and after treating a cut or wound
- After using the bathroom, changing diapers, or cleaning up a child who has used the bathroom
- After blowing your nose, coughing, or sneezing
- After touching an animal, animal food or treats, animal cages, or animal waste
- After touching garbage
- If your hands are visibly dirty or greasy

Alcohol-Based Hand Sanitizer

- Before and after visiting a friend or a loved one in a hospital or nursing home, unless the person is sick with *Clostridium difficile* (if so, use soap and water to wash hands).
- If soap and water are not available, use an alcohol-based hand sanitizer that contains at least 60% alcohol, and wash with soap and water as soon as you can.
- Do **NOT** use hand sanitizer if your hands are visibly dirty or greasy; for example, after gardening, playing outdoors, or after fishing or camping (unless a handwashing station is not available). Wash your hands with soap and water instead.

U.S. Department of Health and Human Services
Centers for Disease Control and Prevention

How should I use?

Soap and Water

- **Wet** your hands with clean running water (warm or cold) and apply soap.
- **Lather** your hands by rubbing them together with the soap.
- **Scrub** all surfaces of your hands, including the palms, backs, fingers, between your fingers, and under your nails. Keep scrubbing for 20 seconds. Need a timer? Hum the "Happy Birthday" song twice.
- **Rinse** your hands under clean, running water.
- **Dry** your hands using a clean towel or air dry them.

Alcohol-Based Hand Sanitizer

- Use an alcohol-based hand sanitizer that contains at least 60% alcohol. Supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in schools and childcare facilities.
- **Apply.** Put enough product on hands to cover all surfaces.
 - **Rub** hands together, until hands feel dry. This should take around 20 seconds.
- Note:** Do not rinse or wipe off the hand sanitizer before it's dry; it may not work as well against germs.

AVAILABILITY OF DISINFECTANT/CLEANING AGENT AS PER REQUIREMENT

Cleaning and Disinfectant Agents

- Hospital Grade Disinfectants
- Alcohols (60-90% ethyl or isopropyl)
- Chlorine - sodium (bleach) and calcium hypochlorite
- Phenolics
- Quaternary Ammonium Compounds (Quats)
- Iodophors
- Accelerated Hydrogen Peroxide (AHP)

CHECK IF INFECTION CONTROL MANUAL SHOWING PERIODIC UPDATE AND SURVEILLANCE ACTIVITIES AVAILABLE/ MONITORING TAKES PLACE

THE FACILITY SHOULD FOLLOW STANDARD PRACTICES AND MATERIALS FOR DISINFECTION AND STERILIZATION OF INSTRUMENTS/ EQUIPMENT

The organisation provides adequate space and appropriate zoning for sterilization activities.

Documented procedure guides the cleaning, packing, disinfection and/or sterilization, storing and issue of items.

Reprocessing of instruments and equipment are covered.

Regular validation tests for sterilization are carried out and documented.

There is an established recall procedure when breakdown in the sterilization system is identified.

GENERAL HOSPITAL

OBJECTIVE:

To reassemble the instrument sets in a standard way, received from OP and other clinical departments and units, make sure that the instruments and ancillary equipment are in good condition.

INDICATION:

This step applies to any instrument going back into a set. Instrument sets should be reassembled as soon as possible after drying the instruments, to avoid recontamination by the air, in the CSSD packaging area, by CSSD Technician.

EQUIPMENT:

- Large work surface.
- Working tables.
- Good lighting.
- Magnifying glass.
- Silicon tubing.
- Lubricant spray, silicon free.
- Sets reassembling sheets, kept up-to-date.
- Square extra instruments, implants.
- Wire baskets.
- Instruments box, containers, gear with specific items, ancillary equipment, external fixation, or other orthopedic equipment.

TECHNIQUE:

- Wash hands.
- Make sure that the instruments are dry.
- Check the Instruments one by one, using magnifying glass if necessary and make sure they are all in good condition and in working order.
- If they are not functioning properly, lubricate them with a silicon free lubricant oil or spray; replace them if that does not correct the problem.
- Replace any instruments marked earlier with a string: "damaged instruments".
- Reassembled the sets, strictly following the pre-established lists; refer to the binder holding the sheets with reference name and in some cases, images of instruments, equipment.
- Arrange the instruments in a wire basket in surgical order, aligned in the same direction, on the tray or proper place in special trays, boxes. Put the heaviest instruments in the bottom of the basket.
- Cover the ends of sharp instruments with a small piece of silicon tubing to prevent them from piercing the sterilization paper during handling of wrapped packs, and also protect them from rusting.
- Check the kit: Forceps at the first, needles.
- Place bowls, knife trays, needle down to prevent from collecting condensed water in the sterilizer.
- The instrument sets are now ready for packaging.

IMPORTANT REMARKS:

- Check all instrument sets by DE CSSD Technicians, set prepared by and set checked by.

GENERAL HOSPITAL

COLLECTING INSTRUMENTS FROM OPERATION THEATRE

OBJECTIVE:

To collect used instruments for transport to CSSD cleaning, decontamination area, while ensuring staff safety and minimizing the risk of spreading germs in the environment.

INDICATION:

Any damaged material (BDMU) in an operation theatre, whether used or unused, must be collected for each procedure, as quickly as possible, by the scrub nurse, circulating nurse or OT Technician in special boxes.

EQUIPMENTS:

- Plastic bin or container with lid cover and handle for transport, sized appropriately for the amount of material to be collected.
- A coloured plastic bucket, smaller than the bin, to be placed into the bin to make it easier to remove the materials.
- Color coding tags.
- Disposable nitrile gloves.

TECHNIQUE:

- Put on one sterile glove.
- Remove the lid from the bin.
- Collect the instruments.
- Wrap the instruments with newspapers to remove the organic matter; this procedure should have been done throughout the surgical aseptic technique.
- Place all instruments in a set or around opened containers, as well as any unusable item like hook, suction tube, delivery back, electric drill, demonstrator, powered drill, modelling the procedure, in the color-coded bucket or bag, put in the plastic bin.
- Close the bin with its lid to transport it to the CSSD decontamination area.
- Take off gloves and wash hands with disinfectant solution and water.

IMPORTANT REMARKS:

- Place small packs from damaged instruments in a bag or if they may be better yet, in a small bag - to prevent the spillage. Do when the bin is emptied.
- Place heavy instruments in the bottom of the bucket.
- Mark defective instruments with a letter like 'd', for example, for replacement when the set is assembled.
- Be sure not to put compresses, gapes, in these disinfectant solution, until they are soaked.
- Be sure to dispose of any sharp materials in appropriate receptacles.
- Take care not to contaminate the inside of bin with soiled gloves.

STAFF SHOULD BE TRAINED FOR ALL INFECTION CONTROL PRACTICES, HAND HYGIENE GUIDELINE, OCCUPATIONAL RISK AND ITS PREVENTION

NHS
National Patient Safety Agency

Your 5 moments for hand hygiene at the point of care

1 BEFORE PATIENT CONTACT	WHEN? Clean your hands before touching a patient when approaching him/her WHY? To protect the patient against harmful germs carried on your hands
2 BEFORE A CLEAN/ASEPTIC PROCEDURE	WHEN? Clean your hands immediately before any clean/aseptic procedure WHY? To protect the patient against harmful germs, including the patient's own, from entering his/her body
3 AFTER BODY FLUID EXPOSURE RISK	WHEN? Clean your hands immediately after an exposure risk to body fluids (and after glove removal) WHY? To protect yourself and the healthcare environment from harmful patient germs
4 AFTER PATIENT CONTACT	WHEN? Clean your hands after touching a patient and his/her immediate surroundings when leaving the patient's side WHY? To protect yourself and the healthcare environment from harmful patient germs
5 AFTER CONTACT WITH PATIENT SURROUNDINGS	WHEN? Clean your hands after touching any object or furniture in the patient's immediate or close vicinity when leaving – even if the patient has not been touched WHY? To protect yourself and the healthcare environment from harmful patient germs

Maintaining a clean and safe environment is a very complex process.

Other complicating factors

- Must be done frequently
- Occupied spaces
- Differing expectations
- Competing priorities
- Human behavior

How to Handwash?

WASH HANDS WHEN VISIBLY SOILED! OTHERWISE, USE HANDRUB

Duration of the entire procedure: 40-60 seconds

SS 8 - Hospital should ensure Bio-Medical Waste management practices as per the statutory norms (BMW (Amendment) Rules, 2018)

Interpretation – The organization shall be authorized by the appropriate authority for management of bio-medical waste. The waste should be segregated and collected in different color coded bags and containers as per statutory norms and same should be available at all the point of waste generation. Management of biomedical waste including its segregation, transportation, management and disposal of waste should be done by an authorized agency with a designated place for waste collection and segregation near the premises.

Means of verification:

1. Availability of color-coded bins at the point of waste generation along with the display of work instructions for segregation and handling of Biomedical waste
2. The waste should be handed over to an authorized agency and not discharged in any drain. If outsourced, check the contract document of outsourced services. Register with the weight of waste collected from different colored bags should be maintained
3. Facility has secured designated place for segregation and storage of Bio-Medical waste before disposal at the waste collection site
4. Transportation of bio-medical waste should be done in a closed container/trolley

AVAILABILITY OF COLOR-CODED BINS AT THE POINT OF WASTE GENERATION ALONG WITH THE DISPLAY OF WORK INSTRUCTIONS FOR SEGREGATION AND HANDLING OF BIOMEDICAL WASTE

THE WASTE SHOULD BE HANDED OVER TO AN AUTHORIZED AGENCY AND NOT DISCHARGED IN ANY DRAIN. IF OUTSOURCED, CHECK THE CONTRACT DOCUMENT OF OUTSOURCED SERVICES. REGISTER WITH THE WEIGHT OF WASTE COLLECTED FROM DIFFERENT COLORED BAGS SHOULD BE MAINTAINED

ANNUAL REPORT ON BIO-MEDICAL WASTE MANAGEMENT (2021)
MAHARASHTRA POLLUTION CONTROL BOARD - (2021-2022 - 2022-2023)

Common Biomedical Waste Treatment Facility – Process of Treatment

FACILITY HAS SECURED DESIGNATED PLACE FOR SEGREGATION AND STORAGE OF BIO-MEDICAL WASTE BEFORE DISPOSAL AT THE WASTE COLLECTION SITE

TRANSPORTATION OF BIO-MEDICAL WASTE SHOULD BE DONE IN A CLOSED CONTAINER/TROLLEY

SS 9 - HOSPITAL SHOULD ENSURE THAT SERVICES I.E. (LAUNDRY, HOUSEKEEPING, DIETARY, SECURITY, AMBULANCE, MORTUARY, CENTRAL STERILE SUPPLY DEPARTMENT (CSSD) ETC. ARE AVAILABLE (IN-HOUSE OR OUTSOURCED).

Interpretation – The services like laundry, housekeeping, dietary, security, mortuary, ambulance CSSD etc. should be available in-house or out-sourced. The hospital shall ensure that they establish adequate controls by having a policy to monitor/ audit these services. If these services are outsourced, then they should have MoU/ agreement for the same.

Means of verification:

1. Checklist for Desktop Assessment - Availability Yes/No & If outsourced, MoU should be available for the same.
2. Internal audits of the services to be conducted on regular intervals

CHECKLIST FOR DESKTOP ASSESSMENT - AVAILABILITY YES/NO & IF OUTSOURCED, MOU SHOULD BE AVAILABLE FOR THE SAME

AREAS TO BE CLEANED

S.NO.	AREA/ ITEM	DISINFECTION METHOD	FREQUENCY
1.	Floor	Cleanser	3 in each shift/ week
2.	Walls	Pesticide Spray 2% Glutaridehyde + Formaldehyde	Once daily/ Once in two weeks
3.	Fans	Wet Mopping	One in two weeks

INTERNAL AUDITS OF THE SERVICES TO BE CONDUCTED ON REGULAR INTERVALS

Sample Internal Audit Agenda

Internal Audit Agenda - Best Bet Laboratories

Audit Objectives:

- to monitor compliance of the laboratory to our own quality management system
- to monitor compliance to ISO 15189

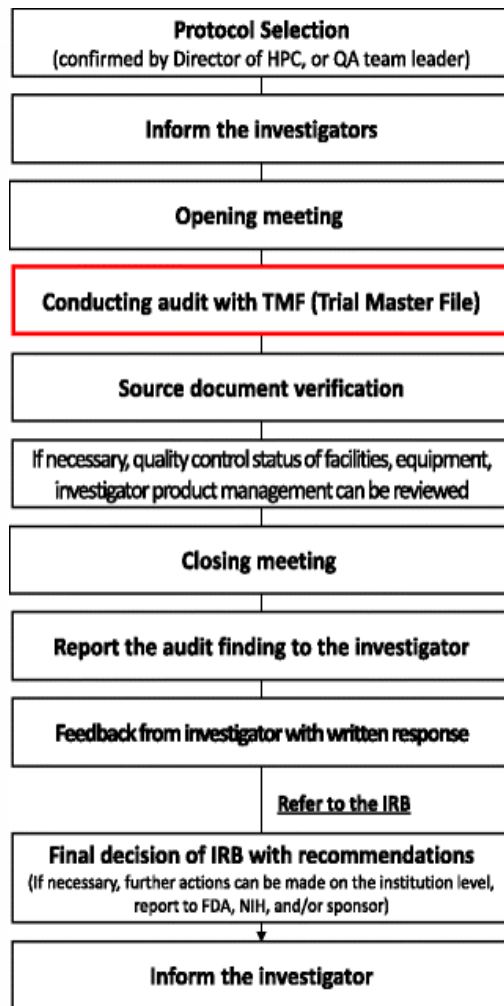

Audit Criteria:

The criteria have been defined in the checklist titled Master - Internal Audit Best Bet Laboratories. The principle reference document is ISO/IEC 15189:2013 Medical Laboratories - Particular requirements for quality and competence.

Audit Scope:

The audit will encompass all areas of Best Bet Laboratories that perform medical laboratory testing and those areas that provide quality support. All Best Bet staff is required to be available for discussion and to assist the auditors in finding the records needed.

SS 10 - SEXUAL HARASSMENT AND GRIEVANCE HANDLING PROCEDURE SHOULD BE AVAILABLE

Interpretation – There should be disciplinary and grievance handling procedures in place with a dedicated committee/team established to handle cases against sexual harassment and various other grievances.

Means of verification:

1. Committee against sexual harassment is constituted at the facility
2. Documented disciplinary and grievance handling procedure

COMMITTEE AGAINST SEXUAL HARASSMENT IS CONSTITUTED AT THE FACILITY

MEMBERS OF THE COMMITTEE FOR PREVENTION OF SEXUAL HARASSMENT

Please reach out to any of the Members of the Committee for Prevention of Sexual Harassment whose names are placed below in case you have any concerns or complaints.

DOCUMENTED DISCIPLINARY AND GRIEVANCE HANDLING PROCEDURE

DISCIPLINE AND GRIEVANCES: Discipline and Grievances are each one side of the same 'complaints coin's.

DISCIPLINE AND GRIEVANCES: Discipline is a 'Management's Complaints' against an employee. • Grievance is an 'Employee's complaint' against management.

WHY DISCIPLINING EMPLOYEES: Employees experience conflict at work and sometimes break the rules. • It then becomes your job to minimize the conflict and get things going back on track. • Disciplinary policies and actions play the prime role in prohibiting unwanted employee behaviors.

DISCIPLINARY POLICY GROUND RULES: Employees should know what they can and can't do. • You should clearly communicate the discipline that will take place if employees break your rules. • For this reason, company need to have a good disciplinary policy in place and well communicated to everyone.

DISCIPLINARY POLICY: The policy must be communicated to employees by periodically providing a copy, posting it, or including it in an employee handbook. • Employees should be required to sign an acknowledgment that they have received and read the policy. • The policy also should be covered in new employee orientation.

CORRECTIVE DISCIPLINE: The purpose of discipline is to assist employees in changing their unwanted behavior. • Absenteeism • Poor Performance or • Inappropriate Behavior • Employees should have adequate information about their current performance versus the desired performance. • This will also decrease your legal risk!

DISCIPLINARY SYSTEMS: There are many systems available for disciplining employees. • One system, called progressive discipline, is very popular. • It requires the employer to progress through each step before proceeding to the next.

DOCUMENTED DISCIPLINARY AND GRIEVANCE HANDLING PROCEDURE

TYPES OF DISCIPLINARY ACTIONS: 1. Verbal counselling 2. Written warning 3. Suspension 4. Termination

1. Verbal counselling: This is generally the first step. However, for a serious problem, skip this step. Verbal warnings should always be done privately. Verbal counselling sessions should be documented by a formal memo or informal note in the employee's personnel file.

2. Written Warning: Should include, at a minimum, the following elements: • The date of the warning • The employee's name • The name of the supervisor administering the warning • A description of the misconduct or inadequate performance • The date of the misconduct or poor performance • A signature line for the supervisor • A signature line for the employee, indicating his receiving only! • A signature line for the witness. • An action plan to fix the behavior in a given time frame!

3. Suspension: This may range from one day to two weeks or more, depending upon the circumstances, and is almost always unpaid. • Next step may be suspension of increasing length or directly go to termination. • Whatever it is, should be stated in the suspension letter!

4. Termination: Before termination, the personnel file and all relevant documents must be reviewed to ensure that the termination is appropriate and defensible in a subsequent lawsuit • Some behavior warrants automatic dismissal, like: • Violent behavior or threats of violence; • Drug and alcohol use on duty; • Carrying a weapon on company property; • Theft, destruction of company property • Insubordination; • Abandonment of job

Other forms of discipline: Demotion, • Transfer and • Reduced raises or bonuses. • Many employees can be very satisfactorily managed by economic concerns, such as bonuses and raises.

DISCIPLINE: THE UNION CONTEXT: If a union represent your employees, your disciplinary system is most likely governed by your collective bargaining agreement or CBA. • All of your managers and supervisors are well trained on how to follow the disciplinary procedure in the CBA. • The CBA will most likely have progressive discipline steps and provide that the employee can grieve any disciplinary action. • Disputes that are not resolved through the grievance process end up in the hands of an arbitrator!

FACTORS TO CONSIDER: Mitigating factors • long service with the company • history of satisfactory appraisals • prior commendations or awards • Aggravating factors • short length of service • history of unsatisfactory performance • prior instances of performance/conduct/attendance problems • Once you have made the choice, stick with it and remember to document all of your steps!

DOCUMENTED DISCIPLINARY AND GRIEVANCE HANDLING PROCEDURE

EMPLOYEE GRIEVANCES: A method for employees to use to resolve conflicts when they feel they have been treated unfairly by management.

EMPLOYEE GRIEVANCES Typical procedure: • Discuss problem with manager • Discuss problem with manager's superior • Superior may refer problem to grievance committee or CEO • Union employee grievances are handled differently...

UNION EMPLOYEE GRIEVANCES: Union grievances are often resolved through: • Arbitration - A hearing before someone empowered to resolve the dispute. • Mediation - Negotiation between two parties, using a neutral intermediary to assist in settling a dispute.

GRIEVANCE IDENTIFICATION TECHNIQUES: Observations, Grip Boxes, Exit Interview & Open Door Policy

1. OBSERVATION: Knowledge of human behavior is requisite quality of good manager. From the changed behavior of any employee, he should sniff the causes of grievances, without its knowledge to the employee.

2. GRIP BOXES: The suggestion boxes, for instance are placed at easily accessible spots to most employees in the organization. The employees can file anonymous complaints about their dissatisfaction in these boxes.

3. OPEN DOOR POLICY: Most of the organizations still don't practice this but open door policy demands that the employees, even at the lowest rank, should have easy access to the Chief Executive to get his grievances redressed.

4. EXIT INTERVIEW: These interviews are conducted to know the reasons for leaving the job. Properly conducted exit interviews can provide significant information about the strengths and weaknesses of the organization and can pave way for further improvements.

BENEFITS: Enables the management to know the pulse of its employees. □ Provides a channel to the aggrieved to express their grievances. □ Provides clues about the behavior and attitude of the managers and supervisors towards their subordinates. □ Gives an assurance to the employees about the existence of a mechanism for the prompt redressal of their grievance. □ Keep up the morale of the employees.

CONCLUSION: Managers must use judgment, empathy, consistency, and fairness when administering employee discipline. • All disciplinary actions should be documented in a factual, nonjudgmental way. • Employees can use the grievance procedure to resolve conflicts with management.

CHAPTER 4: PATIENT CARE (OVERVIEW)

The sheer availability of healthcare services does not serve the purpose until the services are accessible to the users, and are provided with dignity and confidentiality. Access to healthcare services includes physical access as well as financial access. The government has launched AB PM-JAY schemes for ensuring that the service packages are available cashless to different targeted groups. Giving quality patient care have a positive effect on patient outcomes and recovery experience. Patients' rights are also an integral part of patient care. The important patient rights include informed consent, confidentiality of medical records, legible prescription etc. This chapter includes standards such as uniform user-friendly signage, IEC for educating patients, patient-friendly admission and referral process, consent policies, retaining of medical record and education of patients.

CHAPTER 4: PATIENT CARE

PC 1	Hospital should have uniform and user friendly signage system in English and in the local language understood by Patient / family and community.
PC 2	All signage those are required by law should be displayed at all strategic location
PC 3	Contact information of key medical staff and specialist should be readily available in the emergency department
PC 4	Service counters for the enquiry are available as per the patient load and are duly managed by hospital staff for the registration of patients
PC 5	Hospital should have established procedure for admission of patients
PC 6	The patient should be referred to another facility along with the documented clinical information, in case of non-availability of services and/or beds.
PC 7	General Consent and Informed Consent should be taken during the admission and before any procedures /surgery and anesthesia/ sedation.
PC 8	User charges are displayed and communicated to patients effectively at the time of registration, admission to the ward and in case of a change in medical and surgical plan.
PC 9	Patient should be properly educated on additional care as deem required and all the vital information should be recorded for continuity of care.
PC 10	Hospitals should ensure that all medications and associated instructions are written in the prescription.
PC 11	Medical records should be retained as per the policies of Hospital based on national and local law.

PC 1 - HOSPITAL SHOULD HAVE UNIFORM AND USER-FRIENDLY SIGNAGE SYSTEM IN ENGLISH AND IN THE LOCAL LANGUAGE UNDERSTOOD BY PATIENT / FAMILY AND COMMUNITY.

Interpretation – Adequate signage should be displayed at all strategic locations which are permanent in nature. The services, departmental and directional signage, and list of departments should be prominently displayed at all strategic locations in a uniform color scheme. Also the essential information like list of emergency contact numbers, list of doctors, patient rights and responsibilities etc. should be displayed within the hospital premises. It is preferable that the signage is displayed in bilingual language for the ease and understanding of patients.

Means of verification:

1. Name of the hospital and entry-exit should be clearly displayed outside the hospital. Entry to the emergency department should also be defined and displayed strategically
2. Hospital has directional signage with a uniform color scheme.
3. List of departments (as per scope of services) should be displayed in bilingual language
4. The scope of services should be displayed in the waiting area/ OPD/ Emergency/ Reception in bilingual language
5. All the services registered under AB PM-JAY are clearly defined & displayed in prominent places in understandable language.
6. Display of floor layout at each floor
7. Display of patients' rights and responsibility & other related IEC material (outdated and torn posters/wallpapers etc. should not be put on display)
8. Hospital has IEC specific to AB PM-JAY.
9. List of doctors (as per scope of services) with their departments and availability
10. No smoking signage to be present within the hospital premises
11. Display of hand washing instruction at the point of use (5 moments and 7 steps of hand hygiene)
12. Display of emergency numbers including ambulance, blood bank, police and referral centers

NAME OF THE HOSPITAL AND ENTRY-EXIT SHOULD BE CLEARLY DISPLAYED OUTSIDE THE HOSPITAL. ENTRY TO THE EMERGENCY DEPARTMENT SHOULD ALSO BE DEFINED AND DISPLAYED STRATEGICALLY

HOSPITAL HAS DIRECTIONAL SIGNAGE WITH A UNIFORM COLOR SCHEME

ALL THE SERVICES REGISTERED UNDER AB PM-JAY ARE CLEARLY DEFINED & DISPLAYED IN PROMINENT PLACES IN UNDERSTANDABLE LANGUAGE

PC 5 - HOSPITAL SHOULD HAVE ESTABLISHED PROCEDURE FOR ADMISSION OF PATIENTS

Interpretation – There should be documented procedures for registering and admitting the patient. All patients assessed in hospital shall be registered and all admissions must be authorized by a doctor. The policy should be defined with respect to documentation and intimation to police in case of Medico Legal Cases (MLC) as per statutory requirement.

Means of verification:

1. Admission is done by written order of a qualified doctor
2. There is an established criterion for admission through the emergency department
3. There is established procedure for admission of Medico-Legal Cases (MLC) as per prevalent laws and procedure to inform the police. Records for such patients are also maintained.

ADMISSION IS DONE BY WRITTEN ORDER OF A QUALIFIED DOCTOR

Chapter: Admission and Discharge (AD) Section 1: Admission of Adult Patients

Policy

1. Civilly committed patients admitted to Utah State Hospital are screened through a community mental health center to determine the appropriateness of referral. Referrals are to be made to the hospital's Admissions Liaisons in the Admissions, Discharge and Transfer Office (ADT).
2. Criteria for admission to Utah State Hospital are defined in the Utah State Code Annotated 1953, Title 62A, as amended, and the Utah State Board of Mental Health Policies. These general policy guidelines are interpreted as follows in determining eligibility for admission to the Utah State Hospital.
 - 2.1. The patient must be suffering from a major mental illness.
 - 2.2. The patient normally has a chronic mental illness, even though the current episode may be an acute exacerbation of the illness.
 - 2.3. Community based facilities have been utilized first and found not adequate to the need, or do not exist in the area of the state where the patient is found.
 - 2.4. A longer hospitalization is anticipated than what is normally considered for short-term acute care.
 - 2.5. The severity of the illness makes management and treatment at Utah State Hospital the most reasonable alternative.
 - 2.6. Dangerousness or violence of behavior factors makes management and treatment at Utah State Hospital the most reasonable alternative.
 - 2.7. The patient's needs may be best met by a specialized treatment program only available at Utah State Hospital.
 - 2.8. Referrals are made based on the availability of bed allocation for each Community Mental Health Center (CMHC).
 - 2.8.1. If a CMHC wishes to loan or sell a bed to another mental health center, the appropriate approval forms are signed through the Admissions Office.
 - 2.9. The referred individual is an established client of a community mental health center and has been referred by that center. The referred individual may also be committed to another state institution, and meet the criteria for inter-institutional transfer as defined in Utah Code Annotated 62A-15-801.
 - 2.10. The patient may be either voluntary or meet the criteria for civil commitment as defined in Utah Code Annotated, Title 62A. Voluntary admissions are discouraged if it seems likely that the patient will request release before treatment has been completed.

ICU Management Protocol No. 1

Admission and Discharge Policy in the Intensive Care Unit

Introduction

Intensive care refers to care provided in a separate, specially-staffed and equipped hospital unit dedicated to the observation, care and treatment of patients with life threatening illnesses, injuries or complications from which recovery is generally possible. An intensive care unit (ICU) provides special expertise and facilities with the aim to restore vital organ function to normal in order to gain time to treat an underlying cause.

Principles

1. Critically ill patients with **reversible** medical conditions with a **reasonable** prospect of **meaningful** recovery should be admitted to an ICU. In the event of unavailability of ICU beds in the hospital, an ICU bed should be sourced from another neighbouring hospital.
2. Priority of admission shall be based on the urgency of patient's need for intensive care.
3. Withdrawal of therapy is advocated when continuing intensive care is deemed medically futile.
4. Triage is the strategy used to select patients for admission when unit capacity is reached.

Admission Policy

- a. It is the responsibility of the patient's attending clinician to request for ICU admission.
- b. It is the responsibility of the ICU specialist to decide if a patient meets eligibility requirements for ICU (refer to admission criteria for ICU).

THERE IS AN ESTABLISHED CRITERION FOR ADMISSION THROUGH THE EMERGENCY DEPARTMENT

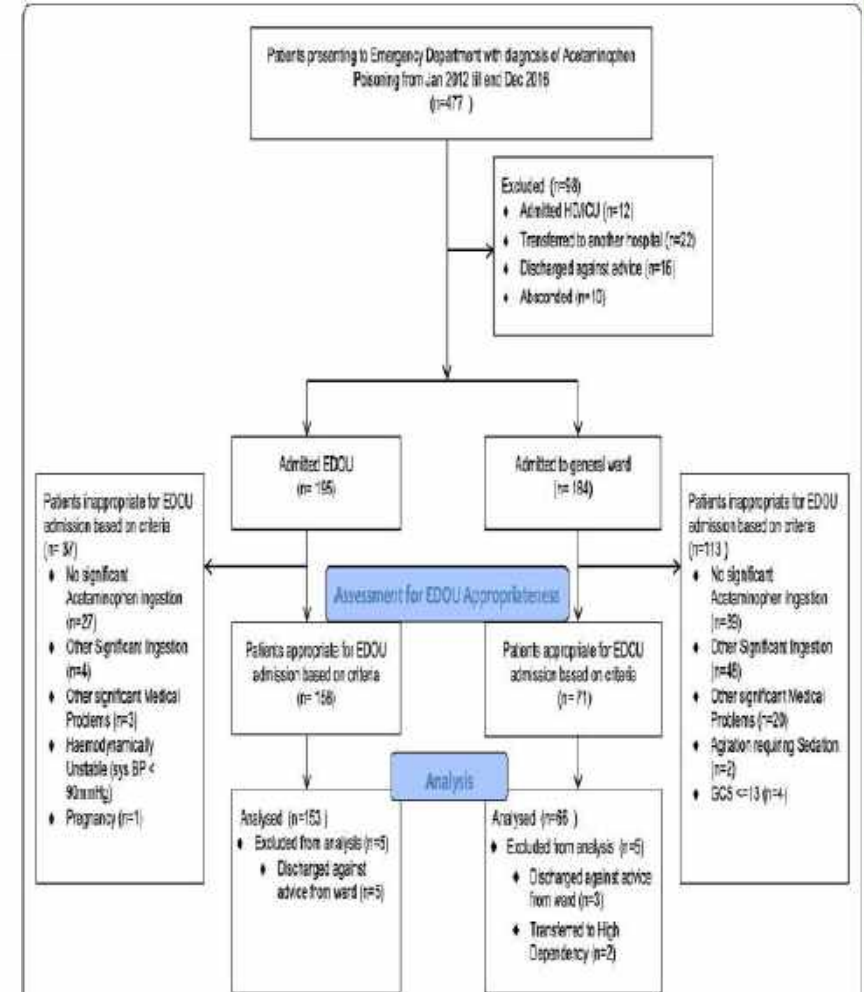

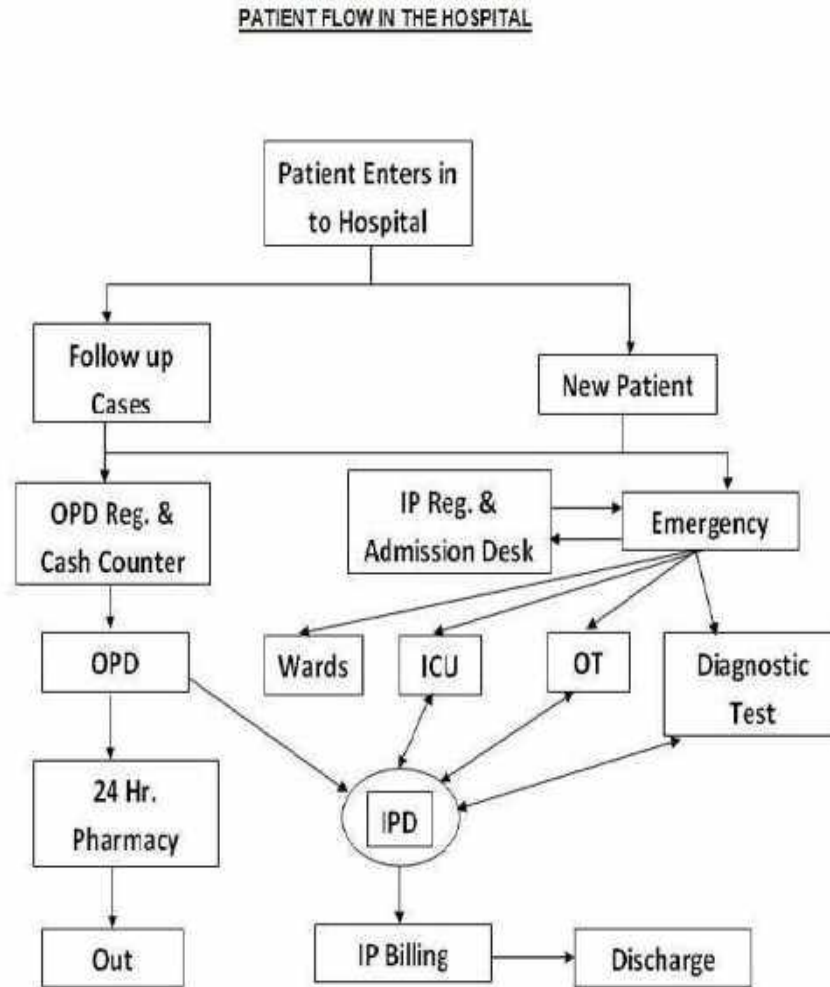

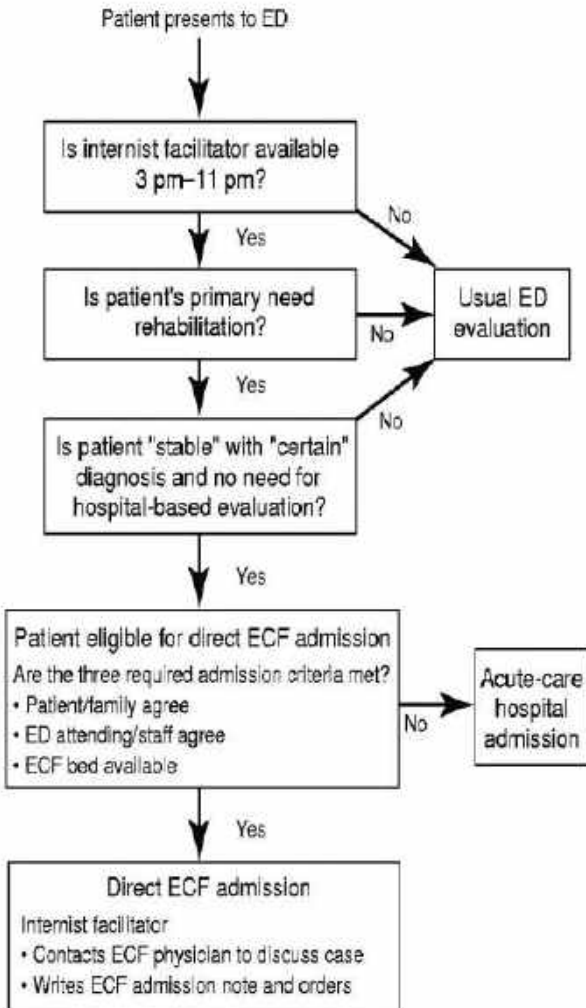

Fig. 1 Flow diagram of patient selection into study

THERE IS ESTABLISHED PROCEDURE FOR ADMISSION OF MEDICO-LEGAL CASES (MLC) AS PER PREVALENT LAWS AND PROCEDURE TO INFORM THE POLICE. RECORDS FOR SUCH PATIENTS ARE ALSO MAINTAINED

ADMISSION AND DISCHARGE

- Whenever a medico-legal case is admitted or discharged, the same should be intimated to the nearest police station at the earliest.
- It is always better to inform the police through the casualty of the hospital where the medico-legal register is usually maintained and necessary entries can be made in it.
- While discharging or referring the patient, care should be taken to see that he receives the Discharge Card/Referral Letter, complete with the summary of admission, the treatment given in the hospital and the instructions to the patient to be followed after discharge.
- Failure to do so renders the doctor liable for “negligence” and “deficiency of service”

TREATMENT OF MEDICO-LEGAL CASES

- The patient should immediately be given treatment without waiting for the medico legal formalities of reporting.
- Treatment to be started after examination and recording findings.
- First Aid to be given immediately without waiting for completion of MLC sheet
- If specialist consultation is required, patient to be referred to concern specialist for further treatment
- All cases requiring constant observation and treatment to be admitted into the hospital.

LAW AND MEDICINE

1. Medical Jurisprudence : It deals with legal aspects of medical practice of doctors.

2. Forensic Medicine : It deals with medical aspects of law and medico legal case management.

PC 6 - THE PATIENT SHOULD BE REFERRED TO ANOTHER FACILITY ALONG WITH THE DOCUMENTED CLINICAL INFORMATION, IN CASE OF NON-AVAILABILITY OF SERVICES AND/OR BEDS.

Interpretation – The documented procedure addressing the managing patients in case of non-availability of beds. Patients needing transfer including those who have come to the emergency but needs to be transferred after basic first-aid, the hospital shall have documented procedure for managing patients. The transferring/referring patients to another facility should be done through issuing referral slips.

Means of verification:

1. There is an established procedure for managing patients in case beds are not available at the facility
2. Patient should be referred while issuing a referral slip and should be bi-directional referral system. The record of the same should be maintained
3. Adequate emergency facilities should be available to provide basic first aid before transfer/referral
4. AB PM-JAY Benefices referred to AB PM-JAY empaneled Hospitals

THERE IS AN ESTABLISHED PROCEDURE FOR MANAGING PATIENTS IN CASE BEDS ARE NOT AVAILABLE AT THE FACILITY

BED MANAGEMENT POLICY – ADULT ACUTE WARDS

1. INTRODUCTION

This policy clarifies action to be taken at Bassetlaw Hospital, as bed occupancy nears or exceeds full capacity. It describes the internal escalation principles to be considered by the Ward teams and Clinical Site Management teams (CSM) and the communication cascade to Managers and Clinicians, as well as to other organisations.

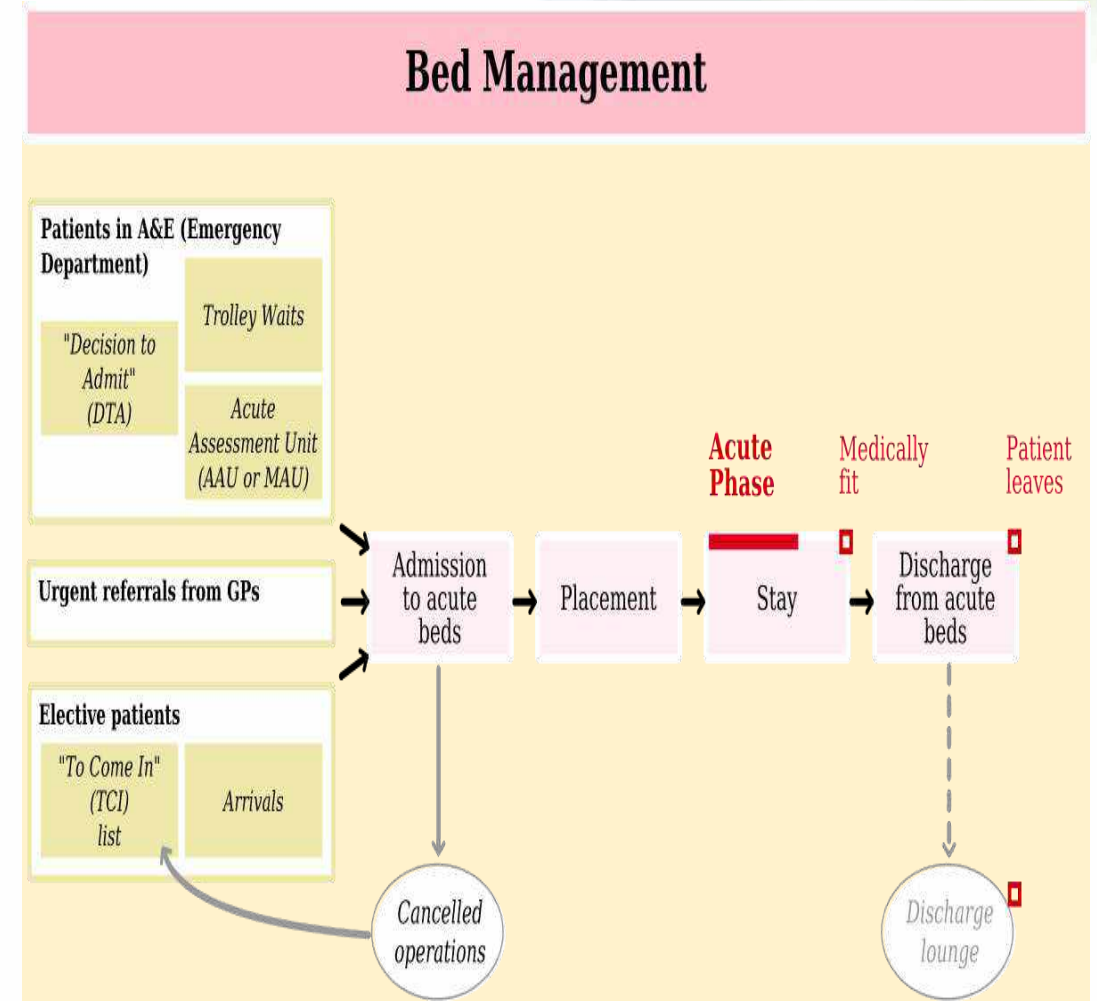

2. PRINCIPLES OF THE POLICY

This policy defines:

- 2.1 the circumstances for transferring existing in-patients within the hospital to create beds in appropriate locations for anticipated new admissions
- 2.2 the requirement of the clinical teams to undertake additional review of those patients who may be deemed fit for discharge, in order to create additional bed availability
- 2.3 the use and function of the designated discharge lounge in order to create additional bed availability
- 2.4 the communication within the hospital to alert teams with regard to the bed status, which may inform the decision to cancel non-urgent elective admissions
- 2.5 the communication necessary with other organisations e.g. the PCT and the Ambulance Services
- 2.6 the communication with the Manager on Call teams

3. MANAGEMENT RESPONSIBILITY

- 3.1 All adult beds within the Trust will be managed corporately under the direction of the Executive Team. The overall specialty bed allocation will be reviewed annually.
- 3.2 The 'bed holding' management teams are responsible for ensuring the efficient use of beds. This includes creating the capacity required to meet all elective and non-elective admissions and ensuring that all patients are regularly reviewed for discharge. The CSM is responsible for overseeing the appropriate use of the adult beds on site.

PATIENT SHOULD BE REFERRED WHILE ISSUING A REFERRAL SLIP AND SHOULD BE BI-DIRECTIONAL REFERRAL SYSTEM. THE RECORD OF THE SAME SHOULD BE MAINTAINED

Take feedback of Patient condition from the Hospital where you refer and documented.

ADEQUATE EMERGENCY FACILITIES SHOULD BE AVAILABLE TO PROVIDE BASIC FIRST AID BEFORE TRANSFER/REFERRAL

Provide basic first aid before transfer/referral.

AB PM-JAY BENEFICES REFERRED TO AB PM-JAY EMPANELED HOSPITAL

**AB PM-JAY Benefices referred to
nearest AB PM-JAY empaneled
Hospital.**

PC 7 - GENERAL CONSENT AND INFORMED CONSENT SHOULD BE TAKEN DURING THE ADMISSION AND BEFORE ANY PROCEDURES /SURGERY AND ANAESTHESIA/ SEDATION.

Interpretation – Patients and family rights include that hospital shall take informed consent, preferably in bi-lingual and language they can understand, signed by patient/relatives/caretaker at the time of admission and before undergoing any surgery or procedure which discuss about all the risks and benefits. The informed consents should be taken at all specific steps of patient care involved with responsibility.

Means of verification:

1. Consent forms available in bilingual language should be signed by the patients or any caretaker during admission and before surgery (separate forms)
2. All risks, benefits and alternatives about anaesthesia should be discussed and mentioned as part of the consent form signed by the patients or their caretaker.

CONSENT FORMS AVAILABLE IN BILINGUAL LANGUAGE SHOULD BE SIGNED BY THE PATIENTS OR ANY CARETAKER DURING ADMISSION AND BEFORE SURGERY (SEPARATE FORMS)

એનેસ્થેશિયા માટેનું સંમતિ પત્રક

દર્દીનું નામ: DR. Dhaval Patel રજી. નં. 23255 ઉંમર / જાતિ: ૨૭ / F

સર્જન: DR. Dhaval Patel વોડ: A-૨

એનેસ્થેસિસ્ટ: DR. Meena Shah

હું નીચે સહી કરનાર સંપૂર્ણ હોશમાં સાબુત મનથી મારા પર કોઈપણ પ્રકારના એનેસ્થેશિયા માટે સંપૂર્ણ સંમતિ આપું છું.

આ માટે જરૂરી હોય તેવા પ્રકારનો એનેસ્થેશિયા વાપરવાની પરવાનગી આપું છું. મને ઘણા વિભાગોની સંપૂર્ણ વિગત જેવી કે ડાયાબિટીસ, બલ્ડ પ્રેશર, હૃદયની બિમારી, શોક (લોહીનું ઓછું દળાણ), ડિડ-નીની બીમારી, ફેફસાની બિમારી વિગેરે... ડોક્ટરે મને સમજાવેલ છે.

મને એનેસ્થેશિયા અને તેની વિપરીત અસરો (કષ્ટ અથવા પડી જવું, ફેફસામાં લોહીની ગાંઠો પડી જવી, શાસ્ત્રનીમાં કુરબીની તપાસ દરમ્યાન ઓક્સિજન ઓછો પહોંચતા મગન પર સોજો આવી જવો અને આના જેવી બીજી ઈતર અકસ્મિત આકસ્મિક ગુસ્સાઓ) બેઠોશ કરવાની દવા દ્વારા થઈ શકે છે તેની જાણ કરવામાં આવેલ છે.

હું કોઈપણ એનેસ્થેસિસ્ટ, મદદનીશ ડોક્ટરો દ્વારા તથા નર્સો દ્વારા મદદ લેવા સંમતિ આપું છું.

ઓપરેશન દરમ્યાન મને એનેસ્થેશિયા માટેની કોઈપણ દવાઓ અને લોહી આપવાની સંમતિ આપું છું અને તેનાથી થતી વિપરીત અસરો મને જાણ કરેલ છે.

આ લેખિત મંજૂરી દ્વારા અમે હોસ્પિટલ સ્ટાફ તેમજ ડોક્ટરોને કોઈપણ અકસ્માત, વિપરીત અસર, કોમ્પ્લીકેશન તેમજ શારીરિક મુશ્કેલી અથવા મોડર્નપણ અંગે જવાબદાર રહેવાતા નથી. પ્રાપ્ત સુવિધાઓના અનુસંધાને પૂરી કાળજી લેવા કોઈપણ પ્રકારનું જોખમ થવાનો સંભવ છે. તે અંગે ડોક્ટર દ્વારા વિગતવાર જણાવ્યું છે.

ઉપરની સંપૂર્ણ વિગતો મેં વાંચી છે, અને સમજી છે, મારી ભાષામાં સમજાવેલ છે. તે પ્રમાણે ઓપરેશનમાં અને શીરી સુધારવામાં:

વિશેષ નોંધ :

ASA-I સામાન્ય પ્રકારનું જોખમ
 ASA-II ગંભીર પ્રકારનું જોખમ
 ASA-III ગંભીર પ્રકારનું જોખમ
 ASA IV
 ASA-V ટકાવ પર મુશ્કેલી ધરાવતું જોખમ

દર્દીની સહી: _____

AB PM-JAY BENEFICIARIES ARE PROVIDED CASHLESS SERVICES

BIMAR NAHI RAHA LACHAAR, HO RAHA MUFT UPCHAAR

World's largest healthcare scheme PM-JAY will make India, 'Ayushman'.

For the first time in the history of India, crores of poor and vulnerable Indians will benefit through the Pradhan Mantri Jan Arogya Yojana, PM-JAY. Now every entitled family will have access to cashless and paperless healthcare coverage for all critical diseases.

Benefits to over **10 crore** poor and vulnerable families and more than **50 crore** beneficiaries across the country

Annual healthcare benefits of up to **Rs. 5 Lakh** for every entitled family

Access to healthcare services in all government and empanelled private hospitals

Toll-Free helpline number
14555/1800111565

PC 9 - PATIENT SHOULD BE PROPERLY EDUCATED ON ADDITIONAL CARE AS DEEMED REQUIRED AND ALL THE VITAL INFORMATION SHOULD BE RECORDED FOR CONTINUITY OF CARE.

Interpretation – Patient should be educated for additional care in respect to usage and effect of medication, diet and nutrition which can be done with the help of discharge summary and growth summary respectively. All the vital information must be recorded for reassessment of patients undergoing observation in the language the patient/ family members can understand.

Means of verification:

1. Patients should be educated for usage and effect of medication, diet and nutrition, immunizations and to prevent infections (as deemed appropriate)
2. Discharge summary should contain a diagnosis, history, physical examination, investigation details, treatment provided and instructions thereof in easy to understand manner (Check 3 samples)
3. There should be a fixed schedule for reassessment of patient under observation based on clinical need

PATIENTS SHOULD BE EDUCATED FOR USAGE AND EFFECT OF MEDICATION, DIET AND NUTRITION, IMMUNIZATIONS AND TO PREVENT INFECTIONS (AS DEEMED APPROPRIATE)

How can I stay healthy with HIV?

Take antiretroviral treatment every day, as prescribed

Stay in touch with my doctor and follow their advice

Eat a balanced and nutritious diet

Exercise and keep fit

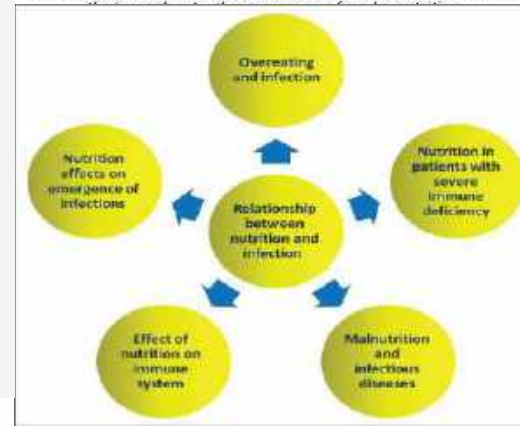

Ask for support from friends, family and others with HIV

Deaths among children aged 28 days to five years 6.6 million/year

The shaded area shows the % of deaths from this infection

DISCHARGE SUMMARY SHOULD CONTAIN A DIAGNOSIS, HISTORY, PHYSICAL EXAMINATION, INVESTIGATION DETAILS, TREATMENT PROVIDED AND INSTRUCTIONS THEREOF IN EASY TO UNDERSTAND MANNER

3. MEDICAL AUDIT COMMITTEE

- Chairperson : Medical Superintendent, GMERS General Hospital, Himmatnagar
- Member Secretary : AHA, GMERS General Hospital, Himmatnagar
- Members:

Sr No.	Designation
1	KMO
4	Pathologist
5	Orthopaedic Surgeon (Dr. Ambirish J Vyas)
6	AO
7	MO (Rajesh K Varma)
8	Matron
9	Senior Head Nurse

Background

- Audit in the wider sense is simply a tool to find what you do now- often to be compared with what you have done in the past or what you think you may wish to do in the future.
- Medical audit involves the study of some part of the structure, process and outcome of core clinical activities carried out by those personally engaged in the activity. It measures whether set objectives have been attained or not. It thus assesses the quality of care delivered.

Involves

- A systematic examination of performance parameters
- Comparison of results against set criteria
- Assessment of quality of care with a view to improvement

Why audit

- Educational value for participants
- Improve effectiveness and efficiency of care.
- Reassure Consumers.

How to audit

1. Define standards you should realistically reach for the area which you intend to audit. Standards should be
 - Realistic
 - Owned/Ownable
 - Parallel to existing standards
2. Set the criteria by which you will measure those standards
3. Compare your results against your defined standard. Is change needed
4. Review the results of any changes made

Objectives of the committees to use different performances parameters from various hospital departments to demonstrate that outcome are continuously being improved upon. All audits will be documented.

Meetings of the Committee: thrice in a Year, Minutes of the meeting will be maintained and form the basis for a) remedial actions b) new initiatives c) the creation of a cultures of continuous quality improvement in the various department of the hospital.

1. Availability and labelling of medicine/ equipment?	Yes
2. Expired control done regularly?	Yes
3. Expiry date of essential and a list of records?	Yes
4. Medication in/ out defined?	Yes
AMBULANCE SERVICE	
1. Number of in house ambulances/ ambulance in working condition	2
2. General condition of ambulance	Good
3. Availability of ambulance driver/ person called/ responsible	Yes
4. Average number of trips made per day	Not yet started
SECURITY AND SERVICE	
1. Number of security guards available	12 guards
2. Fire safety arrangements installed and checked	Yes
3. Has the facility got NDC from the government?	Yes
4. Entry and exit controlled by security guards	Yes
DISASTER PLAN	
1. Training given to staff?	Yes
2. Disaster plan available?	Yes
3. Evacuation routes defined?	Yes
INFORMATION SERVICES	
1. Availability of cashiers?	Yes
2. Source of patient information?	Not yet started

Handwritten Discharge Card form with fields for patient details, diagnosis, and treatment. Includes a signature line at the bottom.

Handwritten Laboratory Investigations form with fields for patient name, date, and various test results. Includes a signature line at the bottom.

THERE SHOULD BE A FIXED SCHEDULE FOR REASSESSMENT OF PATIENT UNDER OBSERVATION BASED ON CLINICAL NEED

PC 10 - HOSPITALS SHOULD ENSURE THAT ALL MEDICATIONS AND ASSOCIATED INSTRUCTIONS ARE WRITTEN IN THE PRESCRIPTION

Interpretation – The organization shall ensure that the at the minimum the prescription shall have the name of the patient, unique patient number, name of medicine with the frequency of administration, name and signature of the doctor. All hand written prescription should be legible, clear and understandable by the patient/family member i.e. preferably in capital letters.

Means of verification:

1. Prescription should be legible, clear and be explained in the language understood by the patients and is comprehensible by the clinical staff
2. Every medical advice and procedure is accompanied with date, time and signature, unique patient number.

PRESCRIPTION SHOULD BE LEGIBLE, CLEAR AND BE EXPLAINED IN THE LANGUAGE UNDERSTOOD BY THE PATIENTS AND IS COMPREHENDIBLE BY THE CLINICAL STAFF

PC 11 - MEDICAL RECORDS SHOULD BE RETAINED AS PER THE POLICIES OF HOSPITAL BASED ON NATIONAL AND LOCAL LAW

Interpretation – Hospital must abide by the national and local laws for retaining medical records for each category of records: Out-patient, in-patient and MLC. The retention and destruction process should be included in the process to maintain confidentiality and security of both manual and electronic records system. Also, there should be a documented process for medical records of AB PMJAY scheme beneficiaries.

Means of verification:

1. Hospital has a policy of retention period with respect to different kinds of records and their disposal.
2. Confidentiality of patient records should be maintained by keeping them properly in the record room or digitally saved on a secure network
3. Hospital has process documentation for AB PM-JAY scheme

HOSPITAL HAS A POLICY OF RETENTION PERIOD WITH RESPECT TO DIFFERENT KINDS OF RECORDS AND THEIR DISPOSAL

Medical Superintendent
GEMRS General Hospital
Himmatnagar

MEASUREMENT	YES	NO
1. Do these separate sheets for medical records?	Yes	
2. How is general condition of the department?	Yes	
3. Availability and accuracy of the data collected?	Yes	
4. Past control of the department?	Yes	
5. Preparation of report and follow up records?	Yes	
6. Information on the defect?	Yes	
SPECIAL MEASUREMENT		
1. Number of the basic concerned employees in working condition?	Yes	
2. General condition of the building?	Yes	
3. Availability of the program design process collection committee?	Yes	
4. Average number of the patients per day?	Yes	
SOCIETY AND SERVICE		
1. Number of the patients registered?	Yes	
2. How many patients are treated and discharged?	Yes	
3. How the facility get feedback from the department?	Yes	
4. How many and why called for recovery patients?	Yes	
HEALTHY PLAN		
1. How many patients are treated?	Yes	
2. How many patients are discharged?	Yes	
3. How many patients are admitted?	Yes	
SPECIAL MEASUREMENT		
1. Availability of facilities?	Yes	
2. How many and why called for recovery patients?	Yes	

Medical Superintendent
GEMRS General Hospital
Himmatnagar, Gujarat-382002

CONFIDENTIALITY OF PATIENT RECORDS SHOULD BE MAINTAINED BY KEEPING THEM PROPERLY IN THE RECORD ROOM OR DIGITALLY SAVED ON A SECURE NETWORK

POLICY FOR SECURITY, PROTECTION FROM LOSS, TAMPERING OR UNAUTHORIZED USE

• The MRD shall apply various methods and tools to prevent any damage /tampering to the medical records occurring due misplacement, pests, fire or any other factor.

Specific Information:

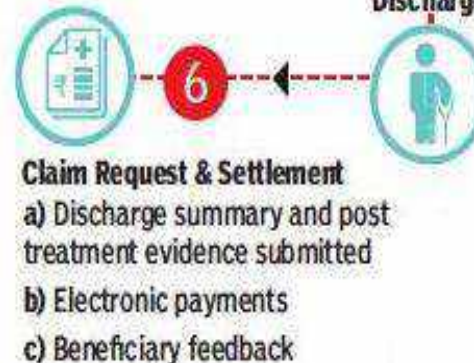

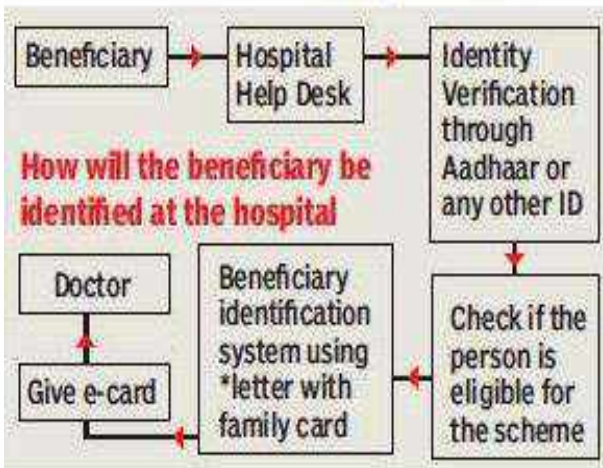

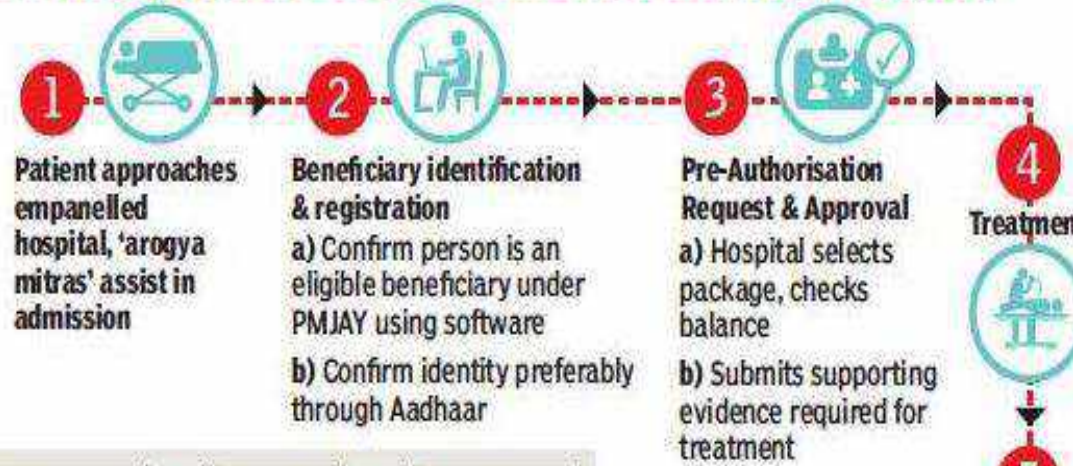

- No files will be taken out of department except for the conditions mentioned in the policy for access.
- Files are issued outside the department in accordance to process mentioned in the policy for access to medical record.
- A reminder dummy is placed in the filing cabinet.
- A retrieval process is in place to take care of files issued.
 - – A record issue slip is filled by the person taking out the file which includes the purpose as well as the expected date of return.
 - – Telephone call is made to the person on the expected date of return and a request is made to return the file.
 - – If any extension is to be made, the same is noted down on the same issue slip.
 - – In case the file is still not returned and no extension has been sought, the medical record technician goes to the person to collect the documents.

HOSPITAL HAS PROCESS DOCUMENTATION FOR AB PM-JAY SCHEME

How a patient can access care under PMJAY

HOW A PATIENT CAN ACCESS CARE UNDER PMJAY

CHAPTER 5: HEALTH OUTCOMES (OVERVIEW)

The importance of measuring and reporting the healthcare outcomes is to improve patient experience of care and fosters improvement and adoption of best practices, thus further improving outcomes. This chapter has standards for **measuring healthcare outcomes** like OPD and IPD census, mortality rate, average length of stay, Surgical Site Infection, Urinary Tract Infection, Blood Stream Infection, Ventilator Associated (VAP) Infection / Hospital Acquired Pneumonia, Transfusion reaction, Bed occupancy, Patient and employee satisfaction, reporting of adverse events, theft and security related events etc. The data provided by health outcomes guide decision and effective policy making process.

CHAPTER 5: HEALTH OUTCOMES

HO 1	Monthly Out Patient Department (OPD) and In-Patient Department (IPD) census
HO 2	Mortality Rate and average length of stay
HO 3	Infection Rates - Surgical Site, Urinary Tract, Blood Stream, Ventilator Associated (VAP)/ Hospital Acquired Pneumonia
HO 4	Transfusion reaction (if applicable)
HO 5	Bed occupancy
HO 6	Percentage of Patient satisfaction
HO 7	Percentage of Employee satisfaction
HO 8	Waiting time - Out Patient Department (OPD) and discharge
HO 9	Reporting of Adverse events
HO 10	Reporting of Thefts / Security related incidents
HO 11	Reporting of needle stick injuries

HO 1 - MONTHLY OUT-PATIENT DEPARTMENT (OPD) AND IN-PATIENT DEPARTMENT (IPD) CENSUS

Interpretation: A monthly Out-Patient Department (OPD) and In-Patient Department (IPD) census data can help to monitor how much OPD patients are converting into IPD, how many patients visited the OPD and IPD and track the trend of OPD to IPD conversion. The rate is generally affected by poor patient satisfaction, high cost of IPD or low motivation of doctors to admit OPD patient.

Means of verification:

1. Out Patient Department (OPD) census for last 6 months
2. In-Patient Department (IPD) census for last 6 months
3. AB PM-JAY In-Patient Department (IPD) census for last 6 months

MONTHLY OUT-PATIENT DEPARTMENT (OPD), IN-PATIENT DEPARTMENT (IPD) AND AB PM-JAY IN-PATIENT DEPARTMENT (IPD) CENSUS

HO 2- MORTALITY RATE AND AVERAGE LENGTH OF STAY (ALS)

Interpretation: Mortality statistics provide a valuable measure for assessing community health status. The importance of mortality statistics derives both from the significance of death in an individual's life as well as their potential to improve the public's health when used to systematically assess and monitor the health status of a whole community. ALS is a very common performance measure which is used not only important for hospital performance but also for clinical quality and infection control.

Means of verification:

1. Mortality Rate (from the data of last 6 months)
= $\frac{\text{Number of Patient died}}{\text{Total number of patient admitted}} * 100$ Average
2. Length of Stay (from the data of for last 6 months)
= $\frac{\text{Sum of days spend by each patient}}{\text{Total number of patient admitted}}$

MORTALITY RATE

Jan'16	1.64%	11/670
Feb'16	1.89%	13/688
Mar'16	1.25%	9/721
Apr'16	1.76%	12/682
May'16	1.70%	12/704
Jun'16	0.99%	7/709
Jul'16	1.71%	13/759
Aug'16	1.84%	15/814
Sep'16	2.16	21/974

$$\frac{\text{No of deaths} \times 100}{\text{No of discharges and death for the month}}$$

RCA –

1. Most of the deaths were associated with the multi-organ involvement / failure, supra added infection, pneumonia, septicemia etc.
2. Sick patients being referred from near by RMP's & small nursing home/clinics who have very less chance of survival. given the short duration of treatment protocol to be followed in view of their deteriorating condition.

CAPA –

1. Prevention of hospital acquired infection.
2. Regular mortality meet to review the delivery of care/ adequacy of treatment or deficiencies so that remedial measures can be taken.

AVERAGE LENGTH OF STAY (ALS)

	BOR	ALOS
Jan'16	71.28%	3.72
Feb'16	72.44%	3.45
Mar'16	69.94%	3.39
Apr'16	77.07%	3.83
May'16	74.42%	3.7
Jun'16	71.06%	3.39
Jul'16	83.43%	3.78
Aug'16	91.10%	3.95
Sep'16	99.16%	3.66

HO 3 - INFECTION RATES

Interpretation: An infection rate is the probability or risk of infection in a population. It is used to measure the frequency of occurrence of new instances of infection within a population during a specific time period. It will help to identify if any recurrent infections persist and improve infection control in the hospital.

Means of verification:

1. Surgical Site Infection (from the data of for last 6 months)
= Number of surgical site infections/ Number of patients operated *100
2. Urinary Tract Infection (from the data of for last 6 months)
= Sum of Urinary Tract Infection Complaints/ Total Number of patients admitted *100
3. Blood Stream Infection (BSI) (from the data of for last 6 months)
= Number of Catheter related BSI/ Number of patients on IV line * 100
4. Ventilator Associated Pneumonia (VAP)/ Hospital Acquired Pneumonia (HAP) (from the data of last 6 months)
= Sum of Ventilator Associated Pneumonia/ Number of patients on ventilator *100

SURGICAL SITE INFECTION

Bench mark

1	Criteria	Target
2	% of Compliance	Not > 4.2 %

No of surgical site infections in a given month X 100
No of surgeries performed in that month

Jan'16	0.00%	0/168
Feb'16	0.00%	0/173
Mar'16	0.00%	0/193
Apr'16	0.00%	0/216
May'16	0.00%	0/204
Jun'16	0.00%	0/187
Jul'16	0.00%	0/153
Aug'16	0.00%	0/175
Sep'16	0.00%	0/180

Observation – No incidences of SSI was observed during Jan'16 to Sep'16.

CAPA:-

URINARY TRACT INFECTION

Bench mark

1	Criteria	Target
2	% of Compliance	Not > 6.5%

No of urinary catheter associated UTIs in a month X 1000
No of urinary catheter days in that month

Jan'16	0.00%	0/269
Feb'16	0.00%	0/320
Mar'16	0.00%	0/229
Apr'16	0.00%	0/272
May'16	0.00%	0/281
Jun'16	4.61%	1/217
Jul'16	4.39%	1/228
Aug'16	3.89%	1/257
Sep'16	0.00%	0/239

RCA – Reasons for incidences of CAUTI might have been–

1. Proper catheter care might not given in each shift
2. Prolonged catheterization

CAPA - changing of Antibiotics & foleys catheter done as corrective actions and training of staff regarding Catheter care is being imparted regularly.

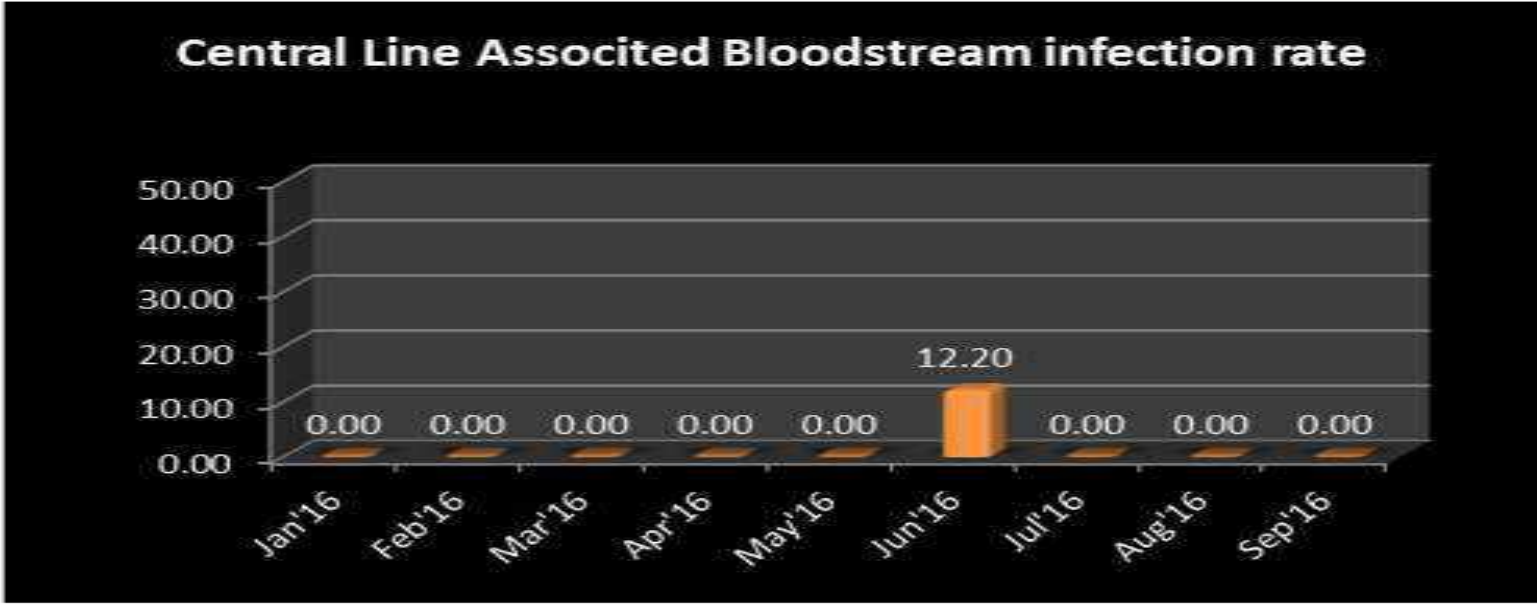

BLOOD STREAM INFECTION

Bench mark

1	Criteria	Target
2	% of Compliance	Not > 6.1%

Jan'16	0.00%	0/159
Feb'16	0.00%	0/107
Mar'16	0.00%	0/94
Apr'16	0.00%	0/94
May'16	0.00%	0/39
Jun'16	12.2%	1/82
Jul'16	0.00%	0/121
Aug'16	0.00%	0/129
Sep'16	0.00%	0/86

No of central line associated blood stream infections in a month X 1000
No of central line days in that month

RCA – most possible causes of the same found to be as -

1. Underlying heart & lung disease – ARDS, Septic Shock & AKI.
2. Proper sterile techniques were not followed and emergency insertion was done
3. Prolong catheterization

CAPA – antibiotic changed according to the sensitivity pattern and training of staff on preventive bundle

VENTILATOR ASSOCIATED PNEUMONIA (VAP)/ HOSPITAL ACQUIRED PNEUMONIA (HAP)

Bench mark		
1	Criteria	Target
2	% of Compliance	Not > 19.5%

$$\frac{\text{No of Ventilator Associated pneumonias in a month} \times 1000}{\text{No of ventilator days in that month}}$$

Jan'16	0.00	0/108
Feb'16	0.00	0/152
Mar'16	9.62	1/104
Apr'16	15.87	2/126
May'16	7.58	1/132
Jun'16	18.52	2/108
Jul'16	0.00	0/128
Aug'16	8.85	1/113
Sep'16	7.09	1/141

- RCA** – Most possible causes of VAP were found as -
1. underlying debilitating disease / neurologic disease or trauma
 2. Asepsis not followed during insertion.
 3. Prolonged duration of ET/tracheal tube.

CAPA - Antibiotic was changed according to the sensitivity pattern

4 – REPORTING OF TRANSFUSION REACTION

Interpretation: They are responsible for completing blood request forms, administering blood, monitoring transfusions and being vigilant for the signs and symptoms of adverse reactions. These guidelines are intended to enhance the implementation of standard clinical transfusion practices for improved patient safety.

Means of verification:

1. Number of Transfusion Reactions in last 6 months

REPORTING OF TRANSFUSION REACTION

Bench mark

1	Criteria	Target
2	% of Compliance	Not > 2.0%

$$\frac{\text{No of transfusion reactions} \times 100}{\text{Total no of transfusions}}$$

Jan'16	0.00%	0/208
Feb'16	0.65%	1/154
Mar'16	0.90%	2/221
Apr'16	0.81%	1/123
May'16	0.58%	1/172
Jun'16	1.05%	2/190
Jul'16	0.00%	0/222
Aug'16	0.43%	1/234
Sep'16	0.00%	0/234

RCA – In most of the cases, minor reactions were observed as Itching, redness & in a few of cases severing has also been observed which might have occurred cause of inadequate temperature of blood unit and irregularity to antigen & antibodies of human body.

CAPA - Continuous supervision & adequate monitoring of patients & regular training of staff regarding transfusion reactions are being done.

HO 5 - BED OCCUPANCY

Interpretation: A good hospital management includes an effective allocative planning for beds in a hospital. Bed-occupancy rates and length of stay are the measures that reflect the functional ability of a hospital.

Means of verification:

1. Bed Occupancy = $\frac{\text{Inpatient days of care}}{\text{Total number of beds available}} \times 100$

BED OCCUPANCY

	BOR	ALOS
Jan'16	71.28%	3.72
Feb'16	72.44%	3.45
Mar'16	69.94%	3.39
Apr'16	77.07%	3.83
May'16	74.42%	3.7
Jun'16	71.06%	3.39
Jul'16	83.43%	3.78
Aug'16	91.10%	3.95
Sep'16	99.16%	3.66

HO 6 - PERCENTAGE OF PATIENT SATISFACTION

Interpretation: Patient satisfaction is an important and commonly used indicator for measuring the quality in health care. A measure of care quality, patient satisfaction gives providers insights into various aspects of medicine, including the effectiveness of their care and their level of empathy.

Means of verification:

1. Copy of the filled feedback form clearly showing the questions asked (at least 5 samples)
2. Patient Satisfaction = $\frac{\text{Number of patients responding extremely satisfied}}{\text{Total number of patients surveyed}} * 100$

COPY OF THE FILLED FEEDBACK FORM CLEARLY SHOWING THE QUESTIONS ASKED

[Your Clinic Name Here]

Patient Satisfaction Survey

We would like to know how you feel about the services we provide so we can make sure we are meeting your needs. Your responses are directly responsible for improving these services. All responses will be kept confidential and anonymous. Thank you for your time.

Your Age: _____

Your Race/Ethnicity: Asian

Your Sex: Male

Pacific Islander

Native

Black/African American

Hispanic or Latino

American Indian/Alaska

Female

White (Not

Hispanic or Latino (All

Please circle how well you think we are doing in the following areas:	GREAT 5	GOOD 4	OK 3	FAIR 2	POOR 1
Ease of getting care:					
Ability to get in to be seen	5	4	3	2	1
Hours Center is open	5	4	3	2	1
Convenience of Center's location	5	4	3	2	1
Prompt return on calls	5	4	3	2	1
Waiting:					
Time in waiting room	5	4	3	2	1

Patient Satisfaction Survey

Dear Patient:

We are committed to excellence. We are interested in knowing what you think about our services. Your performance by completing this brief 15-minute survey regarding your visit.

Thank you for taking time to share your experience with us.

Date of your procedure: _____ / _____ / _____ (Please use Appointment Time)

		excellent	very good	good	fair	poor
1	If you spoke to the facility by phone, how helpful was the person you spoke with?	5	4	3	2	1
2	Ease of scheduling your procedure	5	4	3	2	1
3	The ease of the check-in process	5	4	3	2	1
4	The comfort, cleanliness, and amenities of the facility	5	4	3	2	1
5	Clear and sufficient instructions on what to do and what to expect before your procedure	5	4	3	2	1
6	The wait time in the endoscopy unit, compared to your expectations	5	4	3	2	1
7	The courtesy and caring of your physician	5	4	3	2	1
8	The courtesy and caring of the nursing and support staff	5	4	3	2	1
9	Skills of assisting staff, for instance when starting your IV	5	4	3	2	1
10	Comfort level within the procedure room	5	4	3	2	1
11	Usefulness of the information provided about what was going on during your procedure	5	4	3	2	1
12	Clear and sufficient instructions on what to do and what to expect after your procedure	5	4	3	2	1
13	Overall how well you rate for teamwork between the doctor, nurses and other staff	5	4	3	2	1
14	Overall how satisfied were you with the procedure experience	5	4	3	2	1

PATIENT SATISFACTION

Figure 1 Assessing Satisfaction Before & After Fast Track Implementation

The figure below compares patient satisfaction scores before and after implementation of an ED Fast Track program:

Source: Adapted from: Hwang C, et al. *West J Emerg Med.* 2015;16:34-38.

SAMPLE EXECUTIVE HEALTHCARE DASHBOARD

- 1 Drill down into a specific questions (e.g., amount of time the care provider spent with you and overall rating of care received)
- 2 Filter the question by date, campus, service type, location or section
- 3 Analyze performance of selected questions side by side, trended over time

HO 7 - PERCENTAGE OF EMPLOYEE SATISFACTION

Interpretation: Strong employee satisfaction is linked with significant improvements in patient care and satisfaction therefore it becomes crucial to study the percentage of employees who are satisfied and perform to their best of efforts in the hospital.

Means of verification:

1. Copy of the filled feedback form clearly showing the questions asked (at least 5 samples)
2. Employee Satisfaction = $\frac{\text{Number of employees responding extremely satisfied}}{\text{Total number of employees surveyed}} * 100$

COPY OF THE FILLED FEEDBACK FORM CLEARLY SHOWING THE QUESTIONS ASKED

Satisfaction Survey Template

Employee Satisfaction Survey

This is a survey for the employees of [Write Name of Company Here]. This survey is intended to give the management of the company guidance to improve the workplace environment. This survey is to be answered anonymously.

Ratings:

Please give your assessment of the Company on the following matters by circling one the numbers from one to ten where one is for awful and then for being great.

Compensation to Employees	1	2	3	4	5	6	7	8	9	10
Opportunity for Advancement	1	2	3	4	5	6	7	8	9	10
Benefits	1	2	3	4	5	6	7	8	9	10
Friendly Environment Work	1	2	3	4	5	6	7	8	9	10
Training	1	2	3	4	5	6	7	8	9	10
Performance Evaluation	1	2	3	4	5	6	7	8	9	10
Supervision	1	2	3	4	5	6	7	8	9	10
Culture	1	2	3	4	5	6	7	8	9	10
Job Security	1	2	3	4	5	6	7	8	9	10
Flexibility in Job Performance	1	2	3	4	5	6	7	8	9	10
Overall Satisfaction with Job	1	2	3	4	5	6	7	8	9	10

Employee Morale:

Describe general employee morale: _____

Any recommendations to improve employee morale: _____

Guidance:

Are you given proper guidance to perform your job? _____

Employee Satisfaction Survey Sample¹ [2.1.2.b.1]

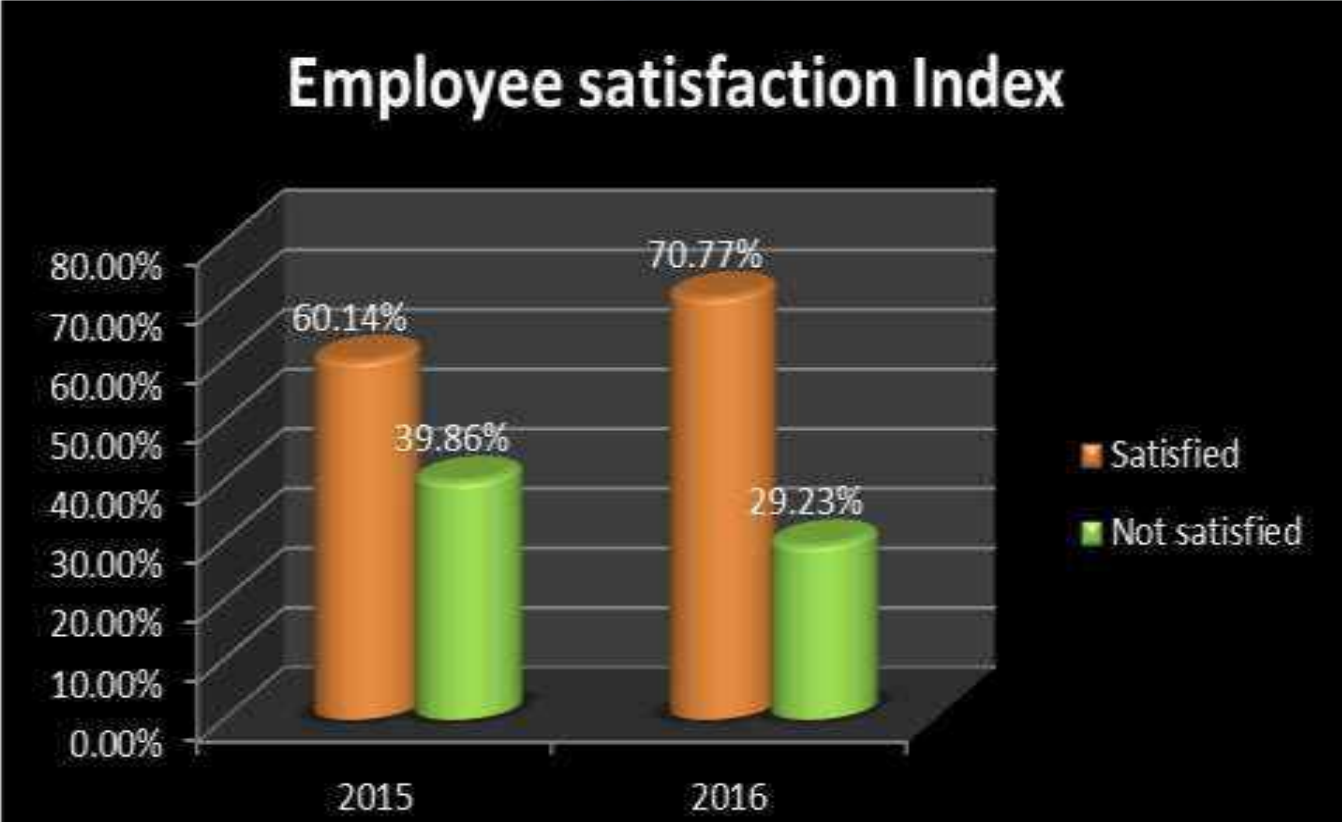

NOTE: Personalize the list of programs, job positions, shift, or departments to be surveyed and checked by respondent.

Division	<input type="checkbox"/> X Program	<input type="checkbox"/> Administration	<input type="checkbox"/> Prevention staff	Date:

Evaluation Component Please circle your level of agreement with the following:	Strongly Disagree	Disagree	Neither Agree nor Disagree	Agree	Strongly Agree
I believe management encourages and recognizes new ideas.	1	2	3	4	5
I am committed to staying at the organization for the next 12 months.	1	2	3	4	5
I am satisfied with the opportunities for growth within the organization.	1	2	3	4	5
I am satisfied with the product or service I provide.	1	2	3	4	5
I am satisfied with the products or services the organization provides.	1	2	3	4	5
I believe clients/consumers are treated with respect by staff.	1	2	3	4	5
Members of my team pull together to complete a task.	1	2	3	4	5
My team will utilize constructive suggestions or criticism.	1	2	3	4	5
Management's expectations are consistent with the level of resources given.	1	2	3	4	5
I am satisfied with how the organization addresses external issues impacting our services and products.	1	2	3	4	5
I am satisfied with how the organization addresses internal issues impacting our services and products.	1	2	3	4	5
The organizational lines of communication flow easily.	1	2	3	4	5
If I share my work problems with my direct supervisor he/she would respond appropriately.	1	2	3	4	5
I am satisfied with the level and amount of supervision I receive.	1	2	3	4	5
I am satisfied with how my supervisor has worked with me to identify strengths and development areas.	1	2	3	4	5
My supervisor provides me resources to improve my work.	1	2	3	4	5
My supervisor encourages high achievement by reducing the fear of failure.	1	2	3	4	5
I receive fair and honest performance evaluations.	1	2	3	4	5
I believe that I receive the recognition I deserve for my contribution.	1	2	3	4	5
I am satisfied with the amount of training I receive to do my job.	1	2	3	4	5
My work environment is comfortable and adequate to the needs of the program/department.	1	2	3	4	5
My team utilizes appropriate problem solving skills.	1	2	3	4	5
I am given the tools I need to provide the services or products assigned to me.	1	2	3	4	5
The salary is competitive to similar organizations providing similar services.	1	2	3	4	5
The benefits are competitive to similar organizations providing similar services.	1	2	3	4	5

EMPLOYEE SATISFACTION

	Satisfied	Not Satisfied
Aug-Sep'15	60.14 %	39.86%
May-Jun'16	70.77 %	29.23 %

Observation – Satisfaction level of employee was found to be higher than previous survey.

PA – Suggestions made in the survey have been considered by the management as the same is in process.

HO 8 - WAITING TIME - OUT PATIENT DEPARTMENT (OPD) AND DISCHARGE

Interpretation: Delay in discharge of the patient increases the pressure on beds of the hospital and delay in discharge is bad for both hospitals and the patients. Thus it becomes important to calculate the waiting time in the hospital in order to decrease the waiting time and increase patient safety by providing prompt services.

Means of verification:

1. Out-Patient Department Waiting Time = $\frac{\text{Sum of time from when the patient entered the outpatient clinic to the time the patient actually leaves the OPD}}{\text{Total Number of Out-Patients}}$
2. Discharge Waiting Time = $\frac{(\text{Total time taken for medical record to reach the billing department from the ward} + \text{Total time taken in the billing department})}{\text{Total Number of In-patients}}$

OUT-PATIENT DEPARTMENT WAITING TIME

	Dept: Cardiology (Dr A)	Dept: Ortho	Dept: Int. Medicine	Dept: Cardiology (Dr B)	Dept. Resp. Medicine
Benchmark	(20 mins)	(20 mins)	(20 mins)	(20 mins)	(20 mins)
Jan'16	21.01	9.62	18.85	-	-
Feb'16	19.53	9.45	16.14	16.92	-
Mar'16	17.50	9.53	16.12	14.07	-
Apr'16	15.59	10.78	17.14	15.19	12.35
May'16	18.27	15.35	18.02	23.38	11.76
Jun'16	15.56	15.38	17.26	14.04	12.72
Jul'16	16.81	11.27	34.61	14.12	13.73
Aug'16	17.00	10.00	32.23	15.02	16.56
Sep'16	17.23	8.98	38.56	16.20	17.45

Jan'16	18.79
Feb'16	17.4
Mar'16	19.57
Apr'16	17
May'16	19.30
Jun'16	18.28
Jul'16	19.24
Aug'16	18.00
Sep'16	18.28

Observation – Average waiting time for Medicine Speciality was found to be in higher side due to increased number of patient during last 3 months however waiting time for other speciality was found to be within satisfactory range.

Observation – Average waiting time for ultrasound was found within the limit.

•Some case are excluded from the data which have taken more time to maintain the pressure for the requisite procedure however they were already informed for the preparation.

PA - counselling of patient for the same is being reinforced along with written preparation guidelines in the dept.

DISCHARGE WAITING TIME

	Cash (3 - 4 hrs.)	TPAs (5 – 6 hrs.)	Others (4 - 5 hrs.)
Jan'16	4	5.76	4.21
Feb'16	3.14	5.24	4.05
Mar'16	4.11	6.35	4.52
Apr'16	2.37	6	4.23
May'16	3.37	6.18	4.03
Jun'16	3.51	6.29	3.52
Jul'16	4.06	6.4	4.35
Aug'16	3.31	6.5	4.06
Sep'16	3.56	5.57	4.15

Observation –

Time for discharges were found to be little high in cash patients from the period of Jan '16 to Sep'16; most possible reasons for the same were :

1. Time taken in billing activity.
2. Bill after being ready is sent to respective departments i.e. lab, imaging and pharmacy to verify the same.
3. Refund of medicine from pharmacy takes time

CAPA-

1. Concept for planned discharges is followed strictly, summary of the potential discharges is prepared by the Duty doctor in night and typed by the night MT /early morning so that the same can be available to the consultant during morning rounds.,
2. Reduction of discharge TAT due to introduction of Apex (HIS) as entry of all investigations are made directly when the requisition is raised, which ensures early billing and reduced billing errors; leading to early preparation of accurate bill.
3. Refund of medicines in during night hrs.

HO 9 - REPORTING OF ADVERSE EVENTS

Interpretation: Adverse events are usually defined as an unintended injury or complication resulting in prolonged hospital stay, disability at the time of discharge or death caused by healthcare management rather than by the patient's underlying disease. A substantial part of these events are avoidable and it is important to report them in order to prevent such events in future.

Means of verification:

1. Data for last 6 months

REPORTING OF ADVERSE EVENTS

Bench mark

1	Criteria	Target
2	% of Compliance	Not > 2.0%

Jan'16	0.30	2/670
Feb'16	0.73	5/688
Mar'16	1.39	10/721
Apr'16	1.17	8/682
May'16	0.43	3/704
Jun'16	1.27	9/709
Jul'16	0.66	5/759
Aug'16	0.61	5/814
Sep'16	0.10	1/974

Adverse drug reactions

No. of adverse drug reactions X 100

No. of discharges and deaths

RCA – on analysing it was found that most of the medications errors were due to :

1. In most of the cases Rights of medication were not followed :

- a. wrong time
- b. wrong dose
- c. wrong route
- d. wrong documentation
 - 1. delayed documentation
 - 2. early documentation
 - 3. missed documentation i.e. medicine given but not documented
 - 4. Patient refused but not documented.

2. Wrong transcribing due to lack of cross checking.

3. In a few cases – prescription error by doctor.

4. Non – availability of drugs in pharmacy lead to delayed administration.

CAPA –

1. Staff was counselled to follow the rights of drug administration and cross check the doctor's orders while transcribing and administration of drugs.

2. Staff was instructed to follow the right procedure of drug administration and to document after administration.

3. The pharmacy was told to ensure the availability of the drugs at right time.

4. Checking & updating of drugs as required.

5. Training regarding "Management of Medication" in order to prevent such medication errors are reinforced as preventive action.

HO 10 - REPORTING OF THEFTS / SECURITY RELATED INCIDENTS

Interpretation: Thefts of medical equipment or medical records is a major concern in hospitals. Health records are being digitized and hence there is the danger of health information becoming compromised or stolen outright. It is important to decrease the number of such incidents by enhancing security in the facility.

Means of verification:

1. Data for last 6 months

REPORTING OF THEFTS / SECURITY RELATED INCIDENTS

Vessel Name: _____

Vessel Type: _____

Contact details: Ph: _____ Mob: _____

Incident Details:

Break-in Theft Damage

Description of damage/equipment theft: _____

What action has been taken?: _____

Was any authority notified? _____

CAMPUS SECURITY INCIDENT REPORTING PROTOCOL

Objective

The Campus Security Incident Report Form should be used to record details of serious incidents that occur on the UL campus. Examples of serious incidents include activities that result in significant damage to property, physical assault, theft, riotous behaviour or any incident that causes serious distress/disruption to others.

A formal mechanism for reporting of incidents is currently used by campus security staff. However, security staff might not have been requested to attend, or alerted to, all serious incidents that occur on campus. The attached form is intended to address this and it provides a standard procedure for the recording of serious incidents. This process is to be adopted by staff/managers of campus facilities in order to ensure that the University is officially advised, in a timely manner, of all serious incidents that occur on campus.

Submission

Staff/managers are required to complete this form within 24 hours of the occurrence of a serious incident. Hard copies of this form to be submitted as soon as possible to UL Security (Visitors Car Park) where it will be logged and circulated to the relevant personnel for information and/or action.

Electronic copies of this form should be to be sent to: UniversitySecurity@UL.ie

In addition to the above all incidents resulting in accidents involving injury to people or dangerous occurrences (i.e. near-misses) should also be reported to the UL Health and Safety Department

Biased Based Event

Bias Related Event	
Definition	Bias Related Events can be reported online. A bias related event is "A criminal offense committed against a person or property which is hate/bias based on race, national or ethnic origin, language, color, religion, sex, age, mental or physical disability, sexual orientation or any other similar factor. Bias Related Event-RCW: To see Washington State definition click: here
Examples	A swastika symbol spray painted on your front door.
Confirm Question(s)	
Are you familiar with: Bias Related Event-RCW:	<input type="radio"/> Yes <input type="radio"/> No
Is this situation still in progress?	<input type="radio"/> Yes <input type="radio"/> No
Did the damage or mischief involve the use of a gun (including BB gun, pellet gun, paintball gun, etc.)?	<input type="radio"/> Yes <input type="radio"/> No
I understand that filing a false police report is a criminal offense.	<input type="radio"/> Yes <input type="radio"/> No
Start Report	

Identity Theft

Identity Theft	
Definition	Obtaining someone else's personal identifying information and using it to obtain credit, goods or services.
Examples	Someone obtains a credit card using your S.S.N. or obtains phone service using your personal information.
Confirm Question(s)	
Reports may only be filed where there are no known suspects or security video. Are there any suspects or any security video?	<input type="radio"/> Yes <input type="radio"/> No
Reports may not be filed by a third party. Falsely reporting an incident or pretending to be someone else in order to file a report can be investigated and charged as a criminal offense. Are you filing this report for yourself?	<input type="radio"/> Yes <input type="radio"/> No
Start Report	

HO 11 - REPORTING OF NEEDLE STICK INJURIES

Interpretation: Needle stick injury is defined as a penetrating wound typically induced by a needle point or other sharp instrument or object which could be infected with another person's secretion. These injuries can lead to transmission of blood-borne viral infections. A continuous follow-up and reporting of needle stick injuries in surgeons is important to prevent future events of needle stick injuries for higher patient safety.

Means of verification:

1. 6 months at least or annual

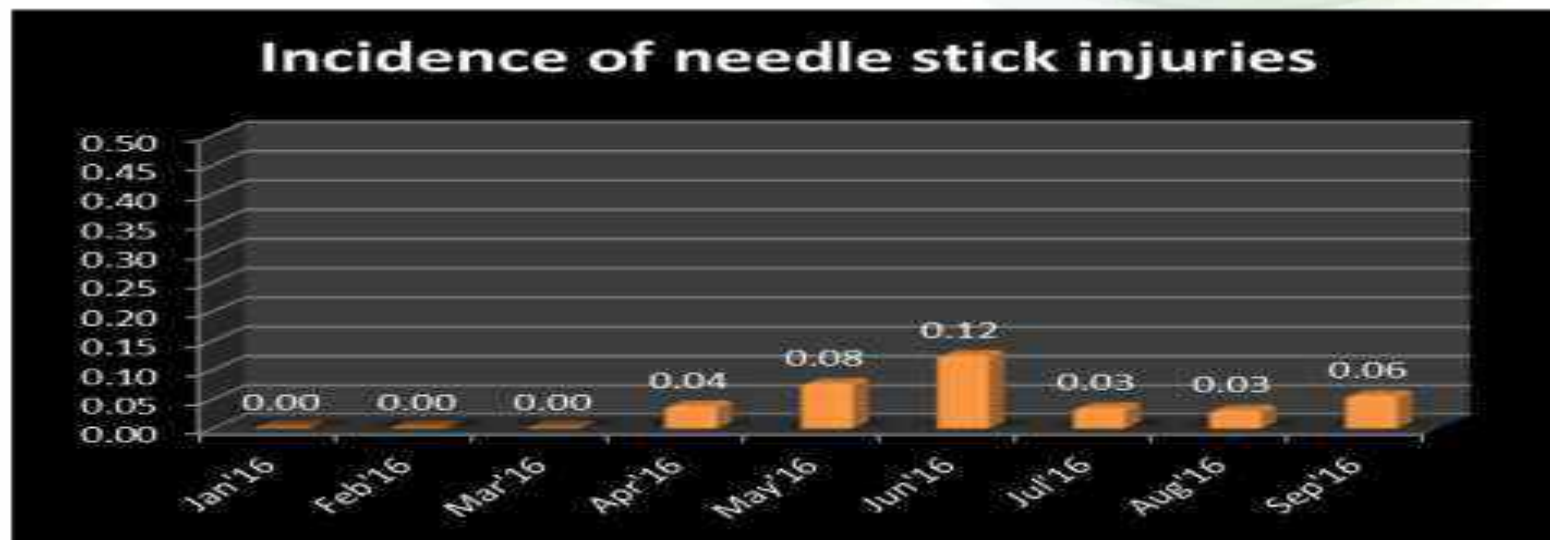

REPORTING OF NEEDLE STICK INJURIES
